Public Notice | Orientation Meeting

Presenting an overview of MSD's Consent Decree and a brief introduction of the Lexington & Payne CSO Basin Project

JANUARY 19, 2016 | 6:30 PM

**LOCATION: GIRL SCOUTS OF KENTUCKIANA BUILDING
2115 LEXINGTON ROAD | LOUISVILLE, KY 40206**

You are invited to an Orientation Meeting, held by MSD, introducing a project in your area. This meeting will provide you with information about MSD's Consent Decree, the role of **underground** storage basins in reducing sewer overflows, and a brief overview of the Lexington & Payne Combined Sewer Overflow (CSO) Basin Project.

This and other basins are part of MSD's larger endeavor to reduce sewer overflows into Louisville's waterways. Planned basins throughout our city are designed to capture rainwater and sewage, which otherwise can overwhelm the sewer system during rain events and flow untreated into our waterways. These underground basins retain the mixture of rainwater and sewage until the rain subsides and system capacity is available. The mixture is then gradually released back into the system and conveyed to a water quality treatment center.
