TOTAL ACTIVE CSOs = 108

Notes:

This information was developed through computer model simulations processed on March 10, 2004. It is NOT measured data.

The rainfall data utilized as input was an average rainfall year developed through a statistical analysis evaluating 54 years of rainfall data (1948 to 2002) for Jefferson County, KY.

The model simulation was done assuming the peak capacity at MFWTP equal to 350 mgd. However, sustainability of 350 mgd has not yet been proven.

OR - Ohio River
SF-BGC - South Fork of Beargrass Creek
MF-BGC - Middle Fork of Beargrass Creek
L-BGC - Lower Beargrass Creek
SBR - Sneads Branch Relief Sewer
CRD - Central Relief Drain

CSO Eliminate
Sewer Separated

1.0 Summary

In 2007, Louisville Mayor Jerry E. Abramson signed a resolution for the Louisville Metro Department of Public Health & Wellness (LMPHW) to enter into an agreement with the Environmental and Public Protection Cabinet of Kentucky and Metropolitan Sewer District to organize and conduct community health screenings. This resolution was in response to a court decree issued by the United States District Court, Western District of Kentucky, Louisville Division, filed April 25, 2005. To fulfill the requirements of the decree, these screenings with results, follow-up and referral will be completed by June 30, 2008.

The Community Health Screenings is the largest project of its kind in Louisville, Kentucky and the only project of its scope. The project was organized into segments and the target area was subdivided into zones which allowed for efficient planning of health screenings for 30,000 persons under controlled conditions. The LMPHW entered into a six-month planning phase that included defining the nature and types of health screenings to be offered, securing accessible location permitting parking, water, electricity, and patient confidentially; scheduling health department staff; recruiting community partners; soliciting community residents; designing data collection instruments, and organizing an event to provide an optimal experience for the participants, partners and staff that fulfilled the requirements of the Supplemental Environmental Projects consent decree.

During the screening period, September 10 – November 9, 2007, 2,407 persons participated in the health screening event of which 98 were children. Seventy-two (72%) of the participants were African Americans and 27% were Whites. These participants self-selected any of 14 types of health screenings as appropriate for age and gender. Following the event, the Department of Public Health & Wellness contacted all participants who were screened and as appropriate linked participants to health care providers for primary health care or further screening.

This report includes statistical data which details the results of the Community Health Screening Project and presents demographical information. The data explores health behavior patterns and economic indicators. Sixty-seven percent (67%) of the screening participants reported that they had one or more known diseases. Of previously diagnosed diseases, 50% of the participants reported having one or more cardiovascular diseases which were the greatest of the diseases reported.

Of particular note, the Community Health Screenings Project was not established nor decreed to be a cause and effect study and does not yield such results.

2.0 Background

In April 2005, a consent decree, known as the Supplemental Environmental Projects consent decree, was filed in the United States District Court, Western District of Kentucky, Louisville Division. Exhibit A of this decree stipulated that Public Health Screenings - Western Louisville would be conducted at a designated cost of $1,000,000. This sum came from the settlement among the U. S. Environmental Protection Agency, the Commonwealth of Kentucky Environmental and Public Protection Cabinet, and the Metropolitan Sewer District over alleged environmental violations. The Louisville Metro Department of Public Health & Wellness entered into an agreement with the state to conduct the Community Health Screenings Project in the designated areas surrounding "Rubbertown." To augment the scope of the project, the Commonwealth of Kentucky committed an additional $200,000.

Rubbertown is an area with industrial facilities in the vicinity. The facilities include wastewater treatment, chemical and rubber production, electricity production, and other manufacturing plants typical of industrialized areas.

The surrounding neighborhoods identified for the screenings were Cane Run, Riverside Gardens, St. Denis, Chickasaw, Park DuValle, Hallmark, Algonquin, California, Parkland, and Park Hill. These neighborhoods were grouped into four zones which had a designated place, date, and time for health screenings. The Louisville Metro Department of Public Health & Wellness (LMPHW) was in each zone for a period of two weeks for a total of 85 hours dedicated to each of the four areas.

Medical staff screened for high blood pressure, cholesterol levels, diabetes, low iron levels, lead in children under the age of six, respiratory tests for health problems such as asthma and screenings for colon, breast, cervical, bladder and prostate cancers. All tests were performed by licensed, professional medical staff.

The LMPHW established a steering committee to oversee the process and give recommendations. A stakeholders group was formed to assist with planning on the grassroots level and to facilitate the success of the screenings. LMPHW staffed a planning committee to assure a well-designed project. Community healthcare providers committed to the project, as well as the University of Louisville School of Public Health and Information Sciences to assist LMPHW in accomplishing the screenings and tests associated with the Community Health Screenings Project.

3.0 Methodology

3.1 Memorandum of Agreement

The Louisville Metro Department of Public Health & Wellness (LMPHW) entered into a Memorandum of Agreement (MOA)with the Commonwealth of Kentucky Environmental and Public Protection Cabinet to provide health screenings for a designated population that resides in parts of Louisville Metro that surround Rubbertown, an industrialized area. The agreement involved health screenings, providing results, counseling and recommendations for follow-up care. The project is to conclude by June 30, 2008. LMPHW became responsible for designing the health screening processes, developing an implementation plan, organizing available resources to conduct the screenings, collecting and compiling data, and providing outcomes of the screenings. LMPHW enlisted partners from the health community to assist in the screenings and to provide follow-up healthcare.

Planning Structure

LMPHW retained a project director to coordinate the health screenings project, guide the planning committee and oversee the eight weeks of health screenings. The project manager developed a timeline and defined the project tasks. The planning committee members were assigned to one of five working committees: Finance, Logistics, Communication, Staffing, and Enrollment.

Financial Plan

The planning committee worked with the LMPHW business manager to develop a budget that itemized the projected expenses which included tests, laboratory fees, staffing requirements, medical equipment, educational materials and costs such as communication and logistical expenses. The planning committee sought community partners and volunteers to offset staffing expenses.

The committee calculated the value of the total screening package to be $1,400 per participant. Because of the fiscal acumen of the planning committee and the volunteerism of the community, participants were screened at a cost of $275 each.

While 2,407 clients screened is considered very well by most estimates, the response was less than anticipated resulting in a surplus of funds. The remaining funds will be used according to the stipulations in the consent decree.

Logistics Plan

The Logistics Committee was responsible for identifying four venues from which to conduct the community health screenings. Each screening site required access to the facility for a 2-week block of time, evening and Saturday access, and sufficient parking for both clients and employees. In addition, there were privacy concerns for specific types of exams and counseling, requiring separate rooms for different functions.

The initial effort to identify community sites such as schools, government owned buildings, community centers, churches, meeting halls, and even vacant store front, was not successful. The most common reasons were due to insufficient space (4800 sq. ft) and the available configuration, as well as, the need to have 2-weeks of continuous operation. The committee then investigated the option of utilizing a large corporate tent. This investigation revealed an improved alternative of a temporary command center, which is utilized by FEMA and others during large natural disasters. The command center utilizes semi-permanent wood wall to construct individual rooms and spaces with an outer canvas shell. Sites were then identified.

Zones

To effectively manage the identified population, the planning team divided the designated area into to four manageable zones. Zone 1 included the neighborhoods of Cane Run, Lake Dreamland, Riverside Gardens, and Saint Denis. The health department scheduled screenings in zone 1 from September 10, 2007, thru September 22, 2007, that was held on the Farnsley Middle School Campus at Lees Lane and Cane Run Road.

The LMPHW moved the health screenings for residents in zones 2 and 3 to Chickasaw Park. Residents in zone 2 , the Chickasaw neighborhood, came to the health screenings scheduled October 1-12, 2007. LMPHW provided health screenings for zone 3 residents from October 15-26, 2007. The residents in zone 3 live in the neighborhoods of Park DuValle, Algonquin, and Hallmark.

LMPHW contracted to have a tent erected on the Farnsley Middle School Campus and at Chickasaw Park. This tent easily accommodated the health screenings for zones one, two, and three.

The residents of zone 4 came from the Parkland, Park Hill, and California neighborhoods. The health department arranged for this zone's screenings to take place in St. Stephen Church from October 29, through November 9, 2007.

The Logistics Committee was responsible for providing a venue manager to oversee set-up, manage day-to-day operations, and assure break-down was completed.

Each site had two managers who remained on site during hours of operation and coordinated operations with the screening manager. Requisitions for supplies, vendor contacts, and transport issues and staff support operations were all coordinated by this committee. Emergency plans were created prior to set up of each site. Overall, all sites ran smoothly.

Communication Plan

The memorandum of agreement required the development of a communication plan to create messaging geared to specific area outlined by the consent decree. The residents of these neighborhoods are 75% African American, 21% White, and 1% Latino.

To ensure quality and consistency of our messaging and to aid in campaign creative development, production, testing and implementation, LMPHW contracted with Bill Bossier of Renaissance Creative Services, a minority owned, multicultural advertising agency in Louisville. To test our creative concepts and messaging, the project's steering committee and stakeholders committee functioned as focus groups. Both committees were racially diverse, a mix of professions from private, public and faith-based sectors, and included members who lived or worked in the project's target area. We shaped and finalized the campaign based on the committees' suggestions and feedback.

The overall theme of the communication plan was based on the well-known image and voice of Dr. Adewale Troutman, Director of Health, who urged residents to attend the health screenings. Key messages included: 1) the screening value of $1,400 but are of "no cost to you" 2) "your health is worth it" 3) publication of a hotline number to drive calls for more information and to make appointments.

Our campaign theme and logo was "Community Health Screenings Project – Check Your Health"

The campaign goal was to use a wide variety of tactics to create awareness of the project, drive callers to the hotline to learn more and to schedule appointments if needed and most importantly, to come to the screenings.

The communication strategies included using a telephone hotline, direct mail, print, radio, and television advertising; and grassroots campaigning.

1. Telephone Hotline – 574-5643

The hotline operated from August 17 to November 16. All communications promoted calling the hotline to learn more about the project, announce locations, dates of screenings and hours of operations and schedule appointments when necessary. Three employees staffed the hotline.

2. Direct mail

Each zone received two direct mailings except Chickasaw which received three.
Zone 1 – Cane Run, Riverside Gardens, St. Denis
Zone 2 – Chickasaw
Zone 3 – Park DuValle, Hallmark, Algonquin
Zone 4 – California, Parkland, Park Hill
Direct mail was sent to 14,000 households living in the target area

3. Print Advertising

- *Louisville Defender* – ¼ page four-color ad ran weekly 9/10 – 10/29

- *Southwest Weekly* – ¼ page four-color ad ran the weeks of September 3 and September 10. This publication is specifically geared for the Cane Run, Lake Dreamland Zone.

- On Sunday, December 2, a half page "thank you" ad ran in *The Courier Journal* to express the health department's appreciation to the community, partners, staff and volunteers.

- The print ads took a similar format as the direct mail piece and addressed neighborhoods, the types of screening, the value of the screenings, the hotline number, as well as the screening location and hours of operation.

4. Radio Advertising

- WLOU/WLLV AM – A 60-second spot ran six times a day for six weeks beginning September 24 and ending November 2.
- WXMA-FM 102.3 "The Max" 60-second ad played 44 times during the week of September 10. The spot aired between 6 a.m. and 7 p.m.
- WGZB-FM 96.5 – A 60 second ad ran 400 times for 8 weeks beginning September 17 and ending November 2. The playing time of these ads rotated throughout each day but none played after midnight.
- WMJM-FM 101.3 - 60 second ad ran 488 times for 8 weeks beginning September 17 and ending November 2. The playing time of these ads rotated throughout each day but none played after midnight.

Dr. Troutman recorded the 60 second radio ad over a musical background as an urgent and important message. To be consistent with all other tactics, he used consistent messaging calling out neighborhoods, specifying the types of screenings, their value, and the importance of attending as well as promoting the hotline.

5. Television Advertising

- WDRB Fox 41 – Ran 10 spots September 10 – 23 placing them during the most frequently watched shows including morning and evening news.
- WBKI the CW Network – 359 spots aired for 9 weeks beginning August 27. Spots were rotated throughout the day focusing on most-watched shows such as news, Oprah and other shows.
- Metro TV channel 25 –aired the TV spot numerous times throughout September and October at no cost.

6. Grassroots Campaigning

Dialogic Phone Calls. The dialogic system, an automated phone calling system, can be programmed with specific messages then programmed to call households with landlines throughout the city. This is especially useful in times of emergency or disaster but has been used for other important instances as well. The system is housed in Emergency Management Services. Dr. Troutman recorded a brief message explaining the screenings, urging residents to attend, and encouraging them to call the hotline. Two rounds of calls were made in each zone during the week before the screenings took place in that zone. Recipients heard the message live when they answered the call or the system left the message on voicemail or answering machine. A total of 17,021 calls were attempted throughout the four zones. 9,722 of those were completed.

Stakeholders Committee. The Stakeholders Committee gave great insights and suggestions into the creation and implementation of the campaign. Additionally, the committee members were great advocates in spreading the word whether it was securing speaking engagements, distributing flyers and posters, or email blasting the information to their contacts, family and friends. Several volunteered at the screenings.

Speaking Engagements. Members of the LMPHW Planning Committee spoke to more than 12 groups, including Councilwoman Mary Woolridge's District Community Forum, Rubbertown Community Advisory Council, West Jefferson Community Task Force, Making Connections - Metro United Way, and Chickasaw Federation. At each speaking engagement, flyers were distributed and attendees were urged to distribute more.

Email Blasts. Various government agencies, nonprofit organizations and faith based entities helped promote awareness by distributing informational flyers via their

memberships or contacts. Some of those included MSD, Air Pollution Control District, Cane Run Neighborhood Place, Bridges of Hope Neighborhood Place, Dept. of Public Health and Wellness, Shively Area Ministries, the Urban League and Cane Run Road Business Association.

Flyers and Posters Distributed. In addition to distributing flyers and posters at speaking engagements and through our stakeholders, numerous volunteers and employees joined in the effort.

- In the Cane Run area we went door-to-door to numerous businesses and asked them to display the poster and flyers.
- We also distributed flyers at the California Farmers Market, LMPHW clinics as well as the Cane Run and Bridges of Hope Neighborhood Places.
- During home visits, the HANDS and Healthy Start community health outreach workers took flyers to their clients who live in the target area and encouraged them to attend.
- Several churches asked for flyers and posters to promote the screenings to their memberships.

Signage: A large "mobile" billboard was placed at the entrance to each screening site to promote the hotline and hours of screening.

- Banners were created and hung at the site.
- Yards signs were used to mark the site.
- Operations based indoor and outdoor signage that was consistent with all communications pieces hung at the sites.

Newsletters. The LMPHW community newsletter, *Health Matters,* included a story on the Community Health Screenings Project and Councilwoman Judith Green included a story in her district newsletter.

Yard Signs. Yard signs were created as a unique way to help spread awareness of the project. As each client left the screening site, we inquired if they would like to place a sign in their yard to let their neighbors know about this important project.

Incentive Bags. The stakeholders recommended incentives for the project because it was their opinion that most people are drawn to events where they receive prizes, gifts, or other incentives. When participants completed their screenings, they received an incentive bag that included a t-shirt and some other trinkets such as a pill case, a pen, a jar opener, a notepad, a chip clip, and a telephone guide to the programs and services of the Department of Public Health and Wellness. The bag also served as a useful way for them to carry health education materials and any medical paperwork they acquired during the screening process.

Website. A special section about the project was created on the health department website. It included background, frequently asked questions, a map of the zones and screening locations, the times of operation, the hotline number, links to our partners helping with the project as well as a way to email for further information or answers to questions. Louisville Metro Government's website also featured information on the project.

Other. The health department's public information office (PIO) issued press releases and media advisories to encourage news media to cover the launch of the project as well as a midway progress report. The PIO sent a press release to the media to encourage attendance before the project ended. All TV, radio and print outlets were very supportive and provided a great deal of news coverage of the project. In addition:

- The *Louisville Medicine* and *Medical News* published articles about the project.
- St. Stephen Church, a host site for the screenings, showed our TV commercial to it's membership before several services
- Dr. Troutman promoted the screenings "live" on the Sunday radio show "Street Talk" on 96.5
- Dr. Troutman promoted the project on several of his weekly call-ins to WLOU/WLLV AM

Staffing Plan

Screening hours were varied in an effort to accommodate participants, and included evenings and Saturdays. Clients were seen by appointment and on a walk-in basis. Although a focus area was identified as those who reside in the area of Rubbertown, no one was turned away who came for a screening.

The medical staff conducted screenings that included high blood pressure, cholesterol levels, diabetes, low iron levels, lead in children under the age of six, height and weight, respiratory tests for health problems such as asthma (spirometry), screenings for breast, cervical, prostate, bladder, and colon cancers. Individual educational counseling and educational materials were provided as appropriate. Referrals were given for abnormal results identified on site.

Each of the three screening sites was divided into 4 functional areas. The screening site manager worked in conjunction with the logistics site manager for day-to- day operations. The staff included LMPHW employees, clinical volunteers, and community volunteers. Each of the 4 functional areas (registration, clinics 1 and 2, staff and volunteer) worked under the supervision of a designated leader.

Functional areas and services

Registration area

Included greeter and check-in functions, health history, and check-out.

Clinic area 1

Blood pressure, height and weight, spirometry, health education station.

Clinic area 2

Colon cancer screening, prostate screening, breast and cervical cancer screening, lab.

Staff & volunteer area

Check in and check out of staff and volunteers and general management of staff/volunteer accommodations.

Staffing for the screenings was multidisciplinary and consisted of LMPHW staff, community volunteers, and staff from partnering organizations and agencies. Daily staffing consisted of approximately 36 persons. Both self selection and assignments were used in the staffing process. Job descriptions were developed for each position and an orientation provided.

Health Education

Health education, an integral part of the community health screening events, encouraged healthy behaviors through interactions with participants and printed materials on a wide variety of health topics. Health educators were trained to assist with colon cancer screening and spirometry histories, which provided ample opportunities to promote healthy behavior. With training from an endoscopy nurse and materials provided by the Colon Cancer Prevention Project, health educators spoke with community participants about the importance of colonoscopies in the prevention and early detection of colon cancer. During the discussions about family history and personal behavior, educators suggested options for improving related health behavior, including increasing fruit and vegetable consumption. Similarly, health education during the completion of the spirometry history included discussions about smoking history, previous successful attempts at stopping smoking, and new options available for smoking cessation.

Each of the screening sites hosted a health education materials table which included attractive, readable materials on health behaviors that significantly impact, prevent or lessen chronic diseases, including hypertension, diabetes and arthritis. Hands-on displays provided strong visual cues for positive behavior related to eating, smoking and blood sugar control. Among the most popular of these were jars

containing liquids labeled, a "Year's Worth of Tar" and "Year's Worth of Phlegm". Screening participants also commented frequently on the "Healthy and Unhealthy Meals" displays, which contained realistic food displays. Other displays included fat content of specific foods, the consequences of obesity on major organs, and ketchup bottles designed to show the difference in blood thickness caused by elevated blood glucose.

Participants picked up the Department's "Health and Wellness Class Schedule," which lists free exercise opportunities, and classes for diabetes management, healthy eating, and weight loss. Schedules of Cooper Clayton method smoking cessation classes were shared both on the table and in spirometry history-taking sessions. Other educational materials included lead safety and children, Healthy Start program information, family planning classes, cardiovascular health, stroke prevention, sexually transmitted diseases and HIV/AIDS, pandemic flu, diabetes, healthy eating and exercise. Based on the frequency of restocking print materials, the most selected were brochures entitled, "25 Ways to Add Fruits and Vegetables to Your Day," "21 Ways to Add Physical Activity to Your Day" and the "Losing Weight for People Who Hate Diets".

Enrollment Plan

The enrollment process for the Community Health Screenings Project consisted of several parts: development of an enrollment process for participants, development of a hotline for appointment making and question answering and development of a records process for all who are screened.

Enrollment process

A method was developed to capture relevant participant information. Enrollment was the first step in the screening process. The individual's information such as name, address, date of birth and other information were gathered via the hotline using a registration form specifically developed for the screening project

Screening hotline

The planning committee determined there was a need for a hotline for participants' calls. Because of the immense community response which inundated the capacity of the line, the purpose of the hotline was re-defined as an informational hotline rather than an appointment scheduling hotline. Callers continued to make appointments for specialty services such as urology screening, breast and cervical screening. All others were encouraged to be "walk ins" at the screening sites during the posted times of operation. Three temporary workers operated the phone line to answer questions or schedule appointments. LMPHW staff forwarded reminder cards to all who scheduled appointments.

Records process

The records process for the screening was initiated during the enrollment process. The information on the participants' registration forms was initially asked by the temporary workers who operated the hotline. This function also was refitted when the hotline became an informational line. The registration forms were completed over the hotline for those who made appointments. The forms then were filed and delivered to the appropriate site at the appropriate time to begin the medical record. Staff completed the registration form in person when participants walked into the screening site. The remainder of the record keeping was completed as the participants went through the screening stations.

The medical record forms were uniform. All records had sections for health history and assessment, laboratory work; spirometry, urology, breast & cervical cancer and colon cancer education. At the close of each day of screening, all medical records were secured confidentially and returned to the health department offices for further review and follow up.

4.0 The Health Screenings

The language of the Supplemental Environmental Projects consent decree stated that LMPHW "perform public health screenings for residents of neighborhood adjacent to the industrialized areas of the western portion of Louisville Metro... The parameters of the screening shall include the types of health concerns most commonly associated with living in close proximity to industrialized areas including certain forms of cancer." Based upon the language of the decree, the LMPHW consulted experts to determine specific health screenings that would meet the established criteria. The health screenings selected included the following:

- Blood pressure
- Spirometry
- Blood Cholesterol
- Blood Glucose
- Urine test for hemoglobin
- Blood Hemoglobin – females
- Blood Hemoglobin – males
- Blood Triglycerides (fasting adults)
- Clinical Breast Exams
- PAP Smears (females)
- PSA Blood Test (males)
- Prostate Exam (males)
- Blood Lead Level (children)
- Colon Cancer Screening

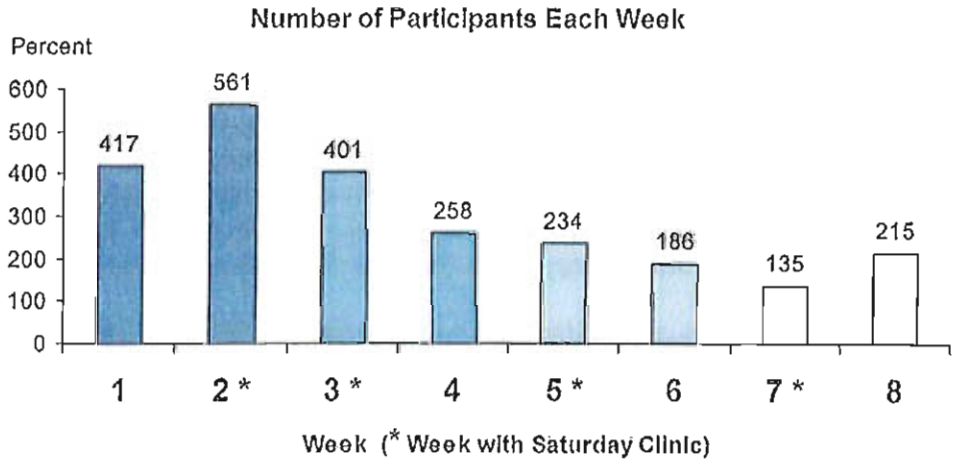
4.1 Screening Participant Data

Several methods were used to promote awareness of the health screening opportunity among the residents of the court ordered target area. However, anyone who came to the screening sites could participate. An important fact to remember is that the participants are not representative of either the people living in the target area or the people of Louisville Metro (LM). Participants in the health screening project were those individuals who both learned about the health screening project and elected to participate. In addition, each participant who attended also elected which screening tests in which to participate.

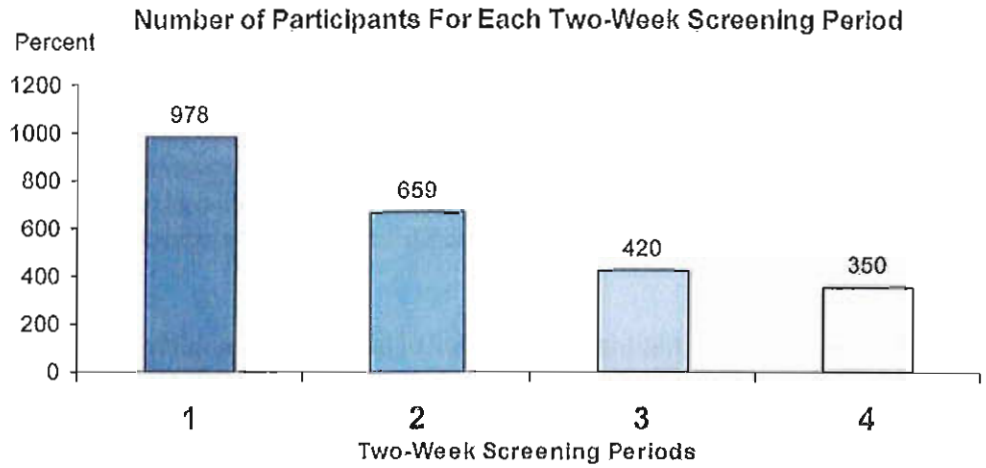
Two thousand-four hundred and seven (2,407) people participated in the health screening event. The target area had approximately 31,555 residents. If all of the participants had lived in the target area, the participation would represent about 8% of the target population. However, analysis of the current address for each participant determined that only 1,206 participants (or about 4% of the target population) currently lived in the target area.

The target area was divided into four zones of about equal population. The closest, suitable site in each zone was used for a two-week period, with the residents of that zone receiving additional publicity to promote awareness. Each zone had one week with Saturday clinic hours.

Below is a graph of the participation by each week. Except for the final zone, the week with the Saturday clinic had more participants than the week without the Saturday clinic.



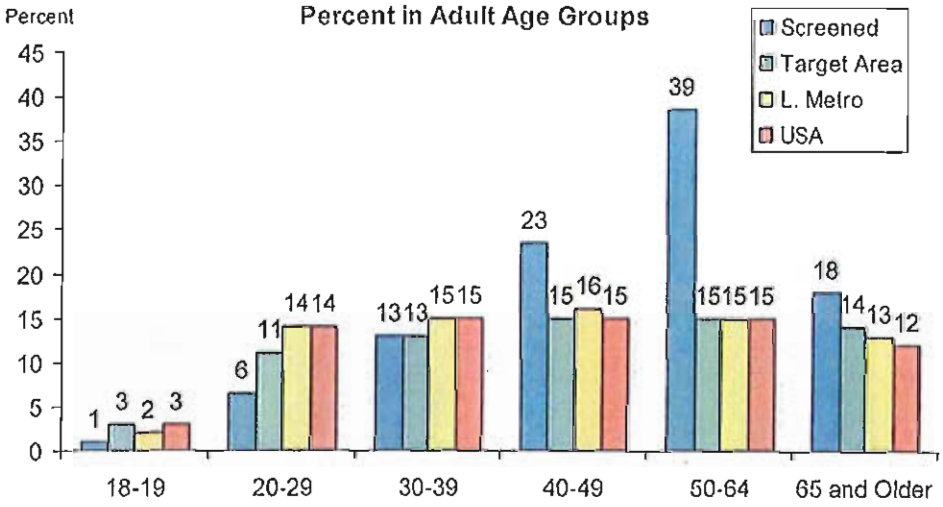
There was a steady decrease in participation as the screening project progressed from Zone One to Zone Four. The first zone had nearly 1,000 participants in the two-week period of screening for that zone. The second zone had 659 participants, followed by 420 for zone three and 350 for zone four.



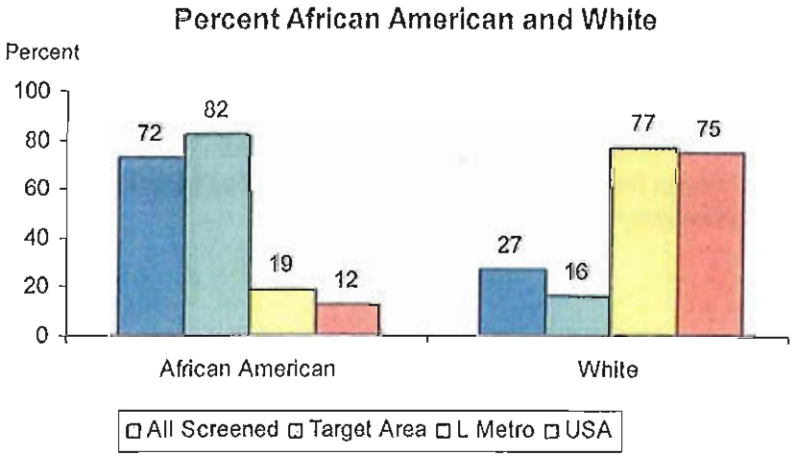
4.2 Demographics

Of the 2,407 screening participants, 2,309 were adults and 98 were children. Based on Census data[1], the adult age distribution of the adult population in the target area, Louisville Metro, and the United States (USA) are very similar. In the graph below and throughout this report, the blue bars represent the percent of screened adults (those participating in the health screenings) in each age group, the green bars represent the percent of the adult population in the target area, gold represents the Louisville Metro adult population, and red represents the United States adult population.

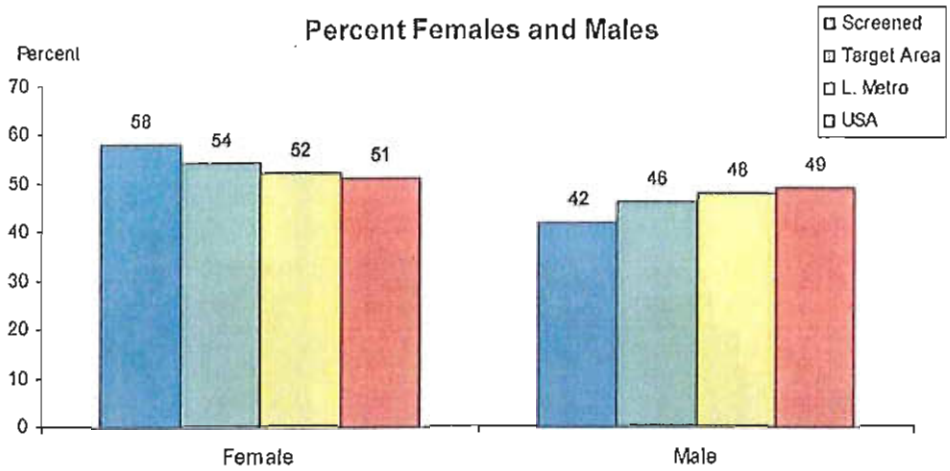
People age 40 years and older attended the screening event at a higher proportion than they represent in the comparison populations. In fact, the majority of the people participating in the screenings (62%) were between the ages of 40 and 64 years of age, which is much larger than their proportion in the comparison populations (about 30%).



Seventy-two percent (72%) of the participants in the screening project were African Americans and 27% were Whites. According to census data[1], African Americans comprise 82% of the population in the target area, 19% of the Louisville Metro population and 12% of the United States (USA) population. The percent of those screened who were African American was similar to, but less than, the percent in the target area population.



Slightly more females attended the screening event compared to their proportion in comparison populations.[1]

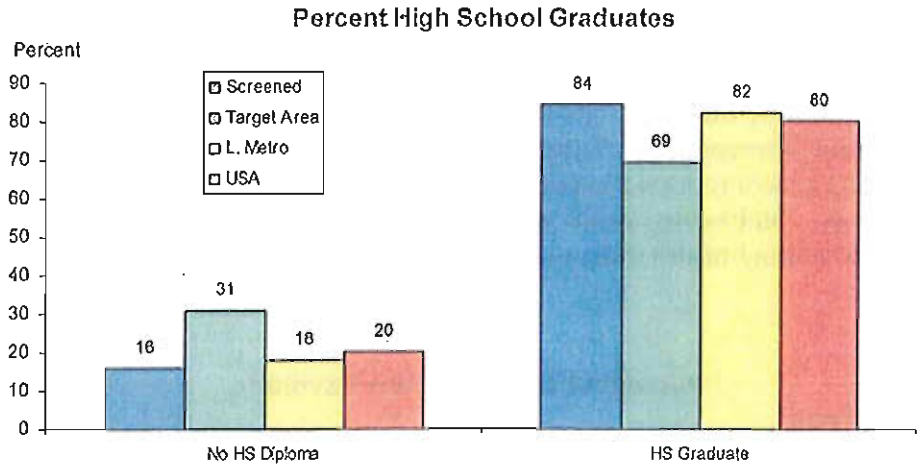


In summary, the screening participants tended to be older than the target population, with those 40 years of age and older significantly more likely to attend. Women and Whites attended at a slightly higher rate than their representation in the target area population.

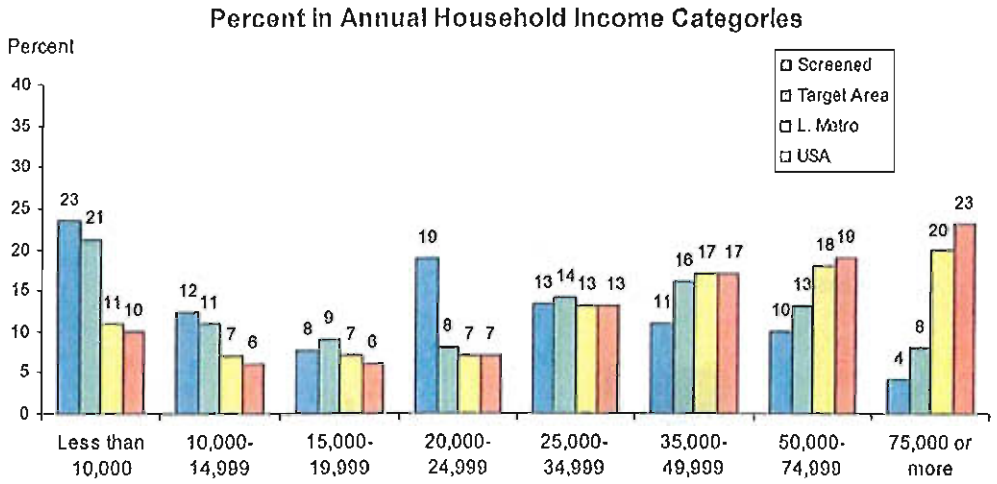
4.3 Economic Indicators

There is a strong positive relationship between economic indicators and health status. A lower economic status can create health problems associated with poor housing, an inadequate diet, and a lack of access to health services.

One economic indicator is education. Of those screened, 84% were high school graduates. This percent is higher than the percent of high school graduates in Louisville Metro and the United States, and much higher than the percent in the target area.[1] Education has been found to be a motivating factor for people seeking health care and engaging in healthy behaviors.



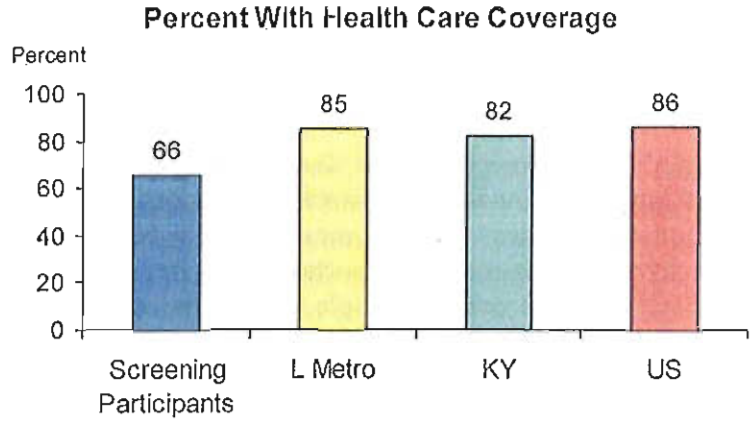
Income is another economic indicator. Twenty-three percent of those screened reported an annual household income less than $10,000, compared to 21% for the target area and 11% for Louisville Metro.[1] Overall, more people in lower income categories participated in the screenings than their proportion in the population. Limited financial resources can be a factor that encourages people to take advantage of an opportunity to receive health related testing and education at no charge.



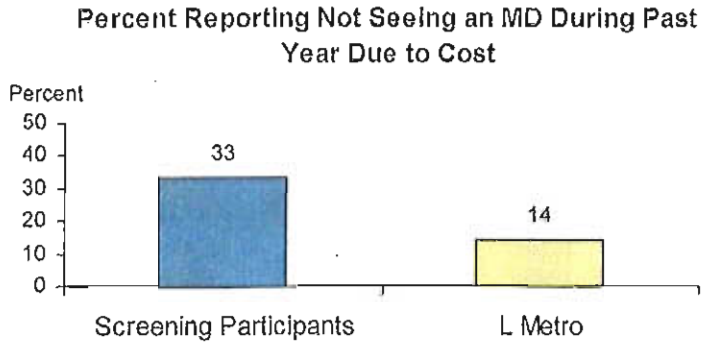
Participants in the screening project tended to have a higher educational attainment and a lower income than the target area population.

4.4 Health Related Indicators

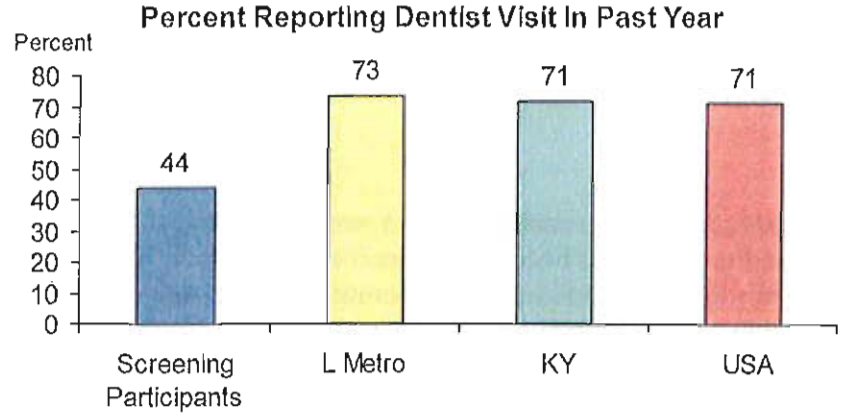
The percent of the population having some type of health care coverage is an indicator of access to health care services. Because this is a question that is asked on standardized surveys, other data are available for comparison to the participant group.[2] Sixty-six percent of screening participants reported having health care coverage, compared to 82 to 86% reported in surveys of adults in Louisville Metro, Kentucky, and the United States. Not having health care coverage, or having inadequate coverage, is a motivator to attending health screening events where there is no charge for services.



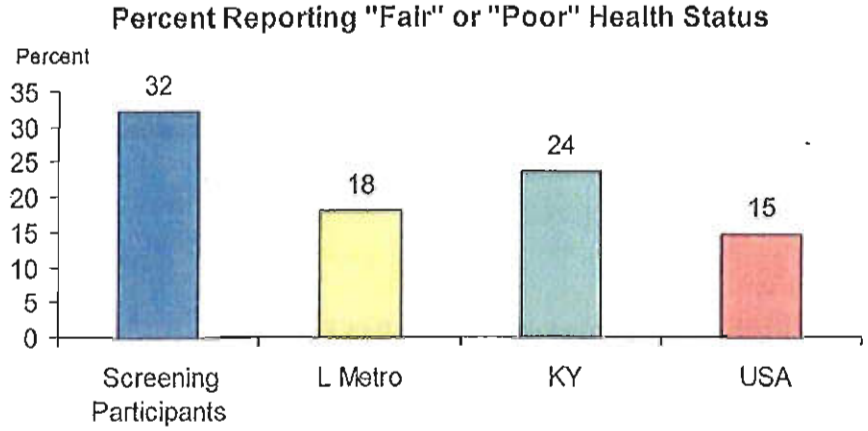
Another standard survey question is: "Was there a time during the last year when you needed to see a physician but did not because of the cost?" One third (or 33%) of all the screening participants reported not seeing a physician during the past year due to cost, compared to only 14% for the Louisville Metro adult population.[2]



Regular visits to a dental health professional promote the prevention and early detection of dental problems. Early detection of dental problems will result in better oral health outcomes. Approximately 44% of screening participants reported visiting a dentist in the past year, compared to 71 to 73% for Louisville Metro, Kentucky, and the United States.[2] The regularity of dentist visits is an indicator of one's access to dental health care and the importance placed on preventive health care.



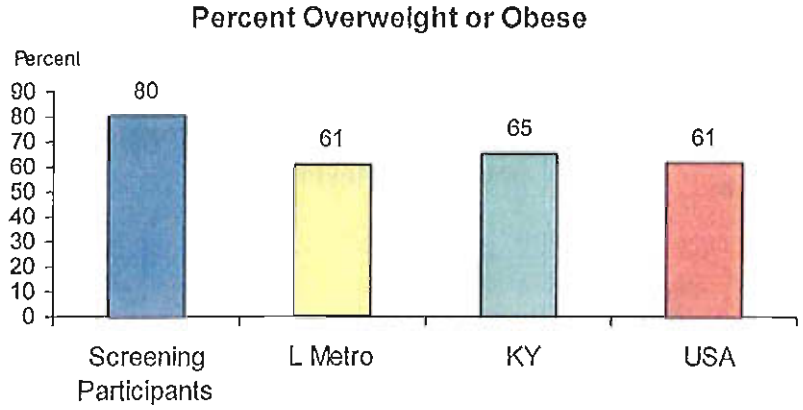
Another standard question used to measure health status is: "In general, is your health Excellent, Very Good, Good, Fair, or Poor?" In surveys of adults, the percent reporting "Fair" or "Poor" health status ranges from 15% in the US to 24% in Kentucky (Louisville Metro is 18%).[2] However, 32% of the participants in the screening project reported fair or poor health. Awareness that your health status is at the bottom of the scale may be a motivator to seek health assessments at a health screening event.



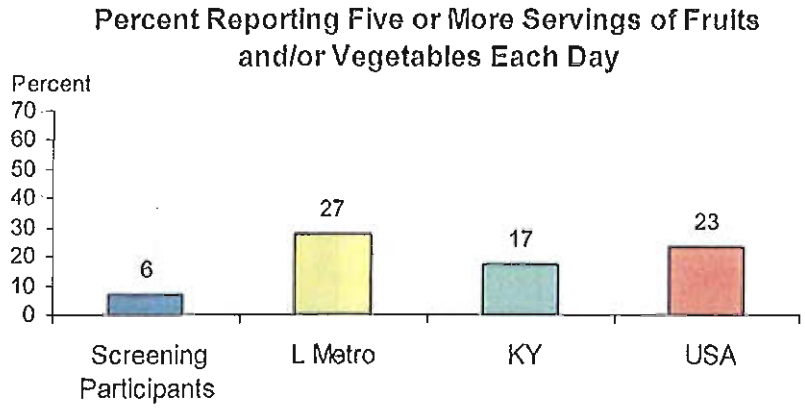
The participants in the screening project were more likely to be without health care coverage and to report their health status as "fair" or "poor" than comparison populations. They also tended to have a higher rate of not seeing a physician due to cost and not visiting a dentist during the previous year than expected from the comparison populations.

4.5 Behavioral Risk Factors

Heart disease is the leading cause of death in Louisville Metro and the United States. Being overweight or obese is a major risk factor for heart disease. Obesity also increases the risk of having a stroke, high blood pressure, and diabetes. On health surveys, respondents are frequently asked to provide their height and weight for use in determining if they are overweight or obese. The participants in the health screening project were asked to have their height and weight measured and recorded for the purpose of making that same determination. Eighty percent of screening participants were overweight or obese, compared to approximately 61 to 65% for Louisville Metro, Kentucky, and US populations.[2]

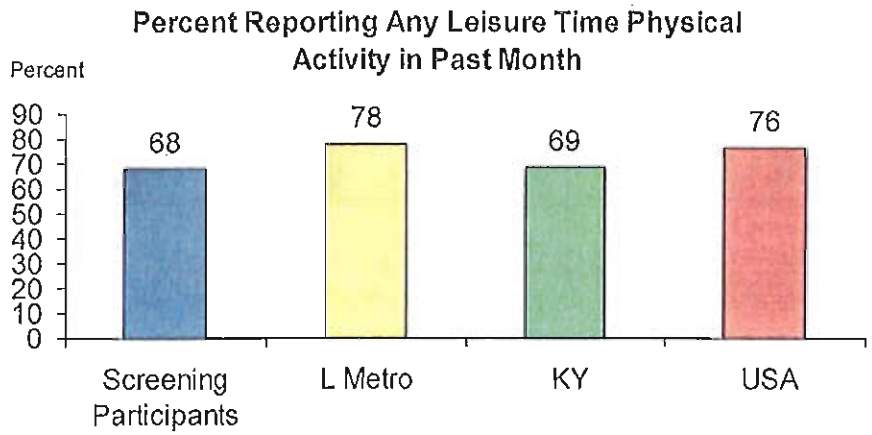


Proper nutrition is important to an individual's ability to prevent diseases and the complications from existing diseases. It is recommended that people consume five or more servings of fruits and/or vegetables every day for optimal health. Six percent of the screening participants reported eating five or more fruit and vegetable servings each day. This is significantly lower than that reported in surveys for Louisville Metro and the United States.[2]

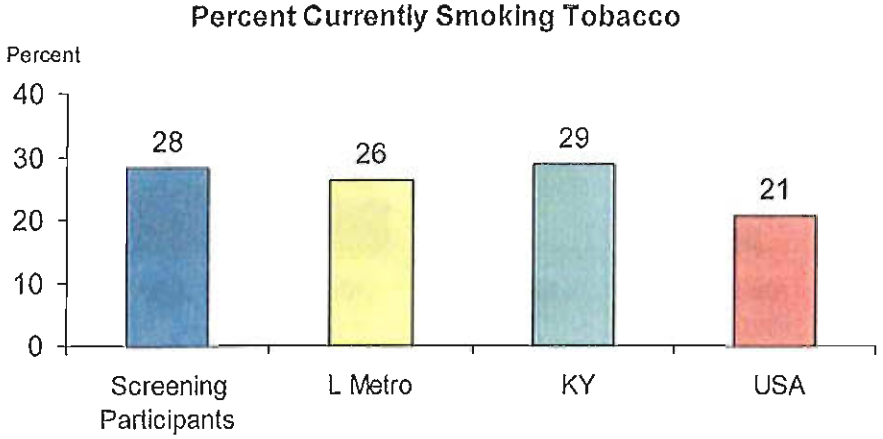


Exercise can reduce overweight and obesity levels as well as the incidence of high blood pressure, diabetes, and high levels of cholesterol and triglycerides in the blood stream. A standard question to measure leisure time activity is: "During the past month did you engage in any physical activity outside of your job?" Sixty-eight percent (68%) of the screening participants reported having any leisure time physical activity in

the past month. While this is similar to the percent for Kentucky adults, it is lower than the percent for Louisville Metro (78%) and for the US overall (76%).[2]



Cigarette smoking contributes to the occurrence of stroke, heart disease, and lung cancer.[3] Current tobacco smoking rates are similar among the screening participants (28%), Louisville Metro adults (26%), and Kentucky adults (29%).[2] However, the smoking rate is lower for the US overall (21%).[2]



The screening participants engaged in less healthy behaviors than comparison populations. They had a higher rate of individuals who were overweight or obese, a lower rate of individuals who ate adequate servings of fruits and vegetables, and a

lower rate engaging in leisure time physical activity.

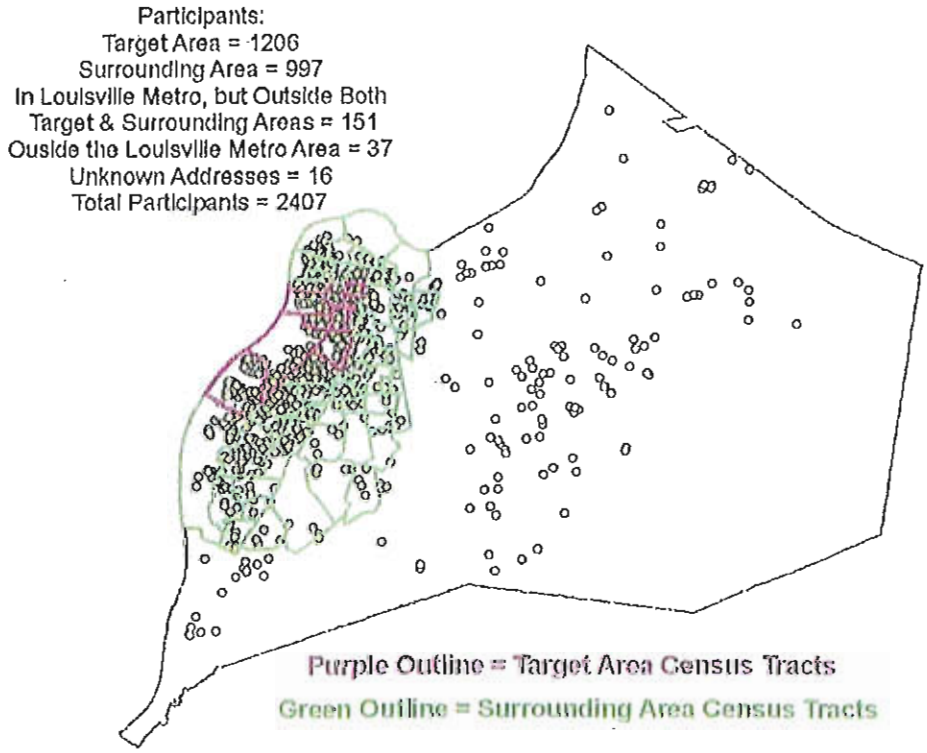
4.6 Screening Participant's Residence Areas

Geographic Information System (GIS) analysis determined that a large number (997 or about 41%) of the participants lived in an area surrounding, and in close proximity to, the target area (see map below).

The screening participant's were categorized into the following areas:

- The *Target Area* as defined by the court decree (1206 participants)
- The *Surrounding Area* around the target area (997 participants)
- In Louisville Metro, but the area outside the target area and the surrounding area (*LM Outside Area*) (151 participants)

In addition to the people living in these three areas, 37 participants lived outside of the Louisville Metro area and 16 participants reported addresses within Louisville Metro that were not valid in the GIS system.



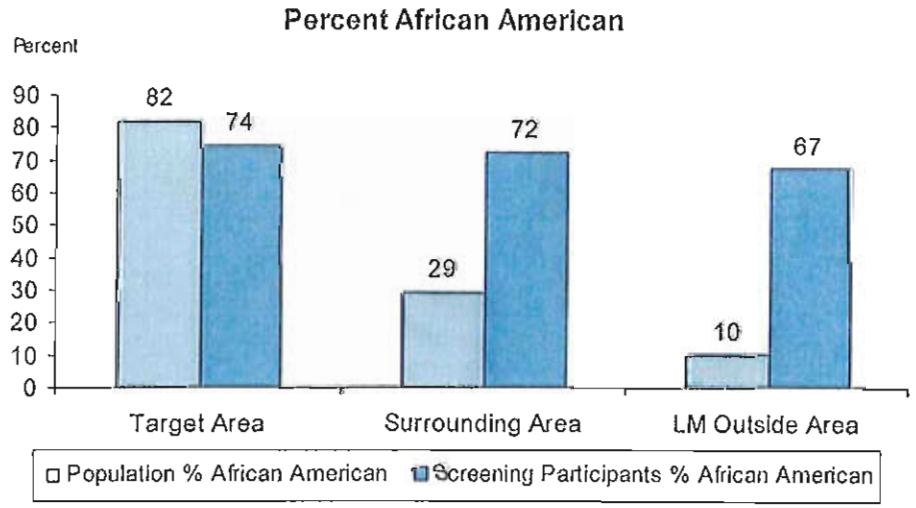
4.7 Demographic and Social Indicators By Residence Area

When analyzed by the area of the community in which the participants resided, there were several demographic indicators where the screening participants were significantly different. A significant difference is a difference that is not likely to occur due to chance.

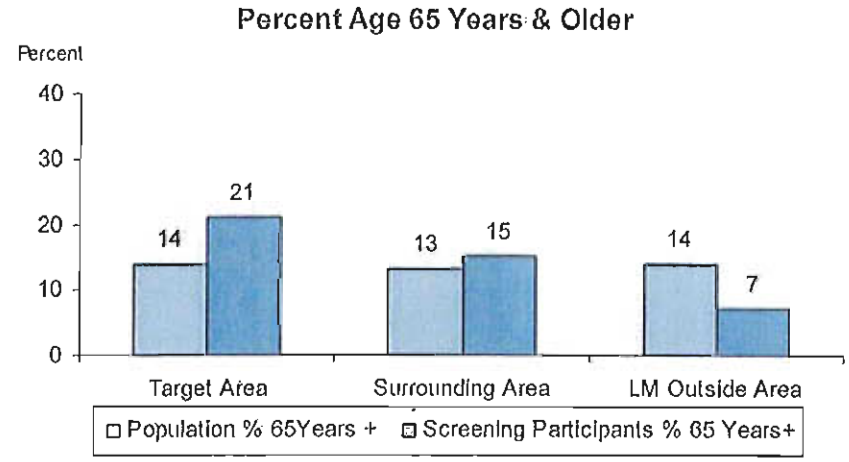
Table 1. Population Demographics of the Community Areas[1]

Population Parameter	Target Area	Surrounding Area	LM Outside Area	L. Metro
Total Population	31,555	201,684	460,365	693,604
Percent White	16	67	86	77
Percent African American	82	29	10	19
Percent 65 years +	14	13	14	14
Percent Income < $10,000	21	18	7	11
Percent HS Graduates	69	72	87	82
Percent Females	54	52	52	52

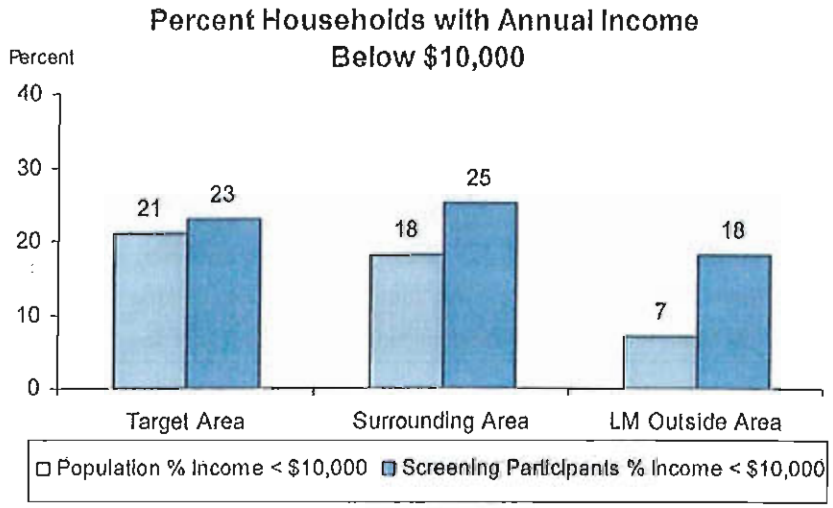
Except in the target area, African Americans participated at a much higher rate than their representation in the population.[1] The graph below compares the percent of the population to the percent of the screening participants in each area who are African American.



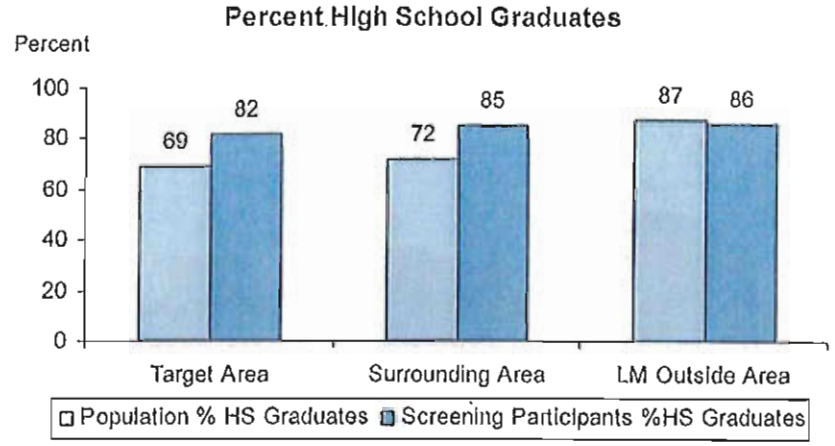
People age 65 years and older were significantly more likely to attend the screening if they lived in the target area and least likely to attend if they lived in the LM Outside Area. The graph below summarizes the percent elderly in the population compared to the percent of elderly participants in each areas.[1]

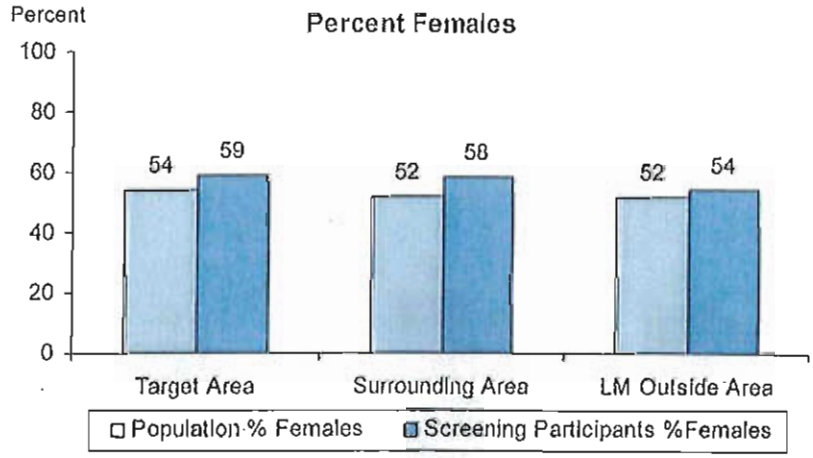


Lower income people were more likely to attend the screening event than their proportion in the population. This is especially true in the LM Outside Area, which was the farthest distance from the screening sites.



While the educational level and gender of the screening participants tended to be higher than their proportion in the population for each community area, the differences between the three areas in the community for education and gender were not significant.



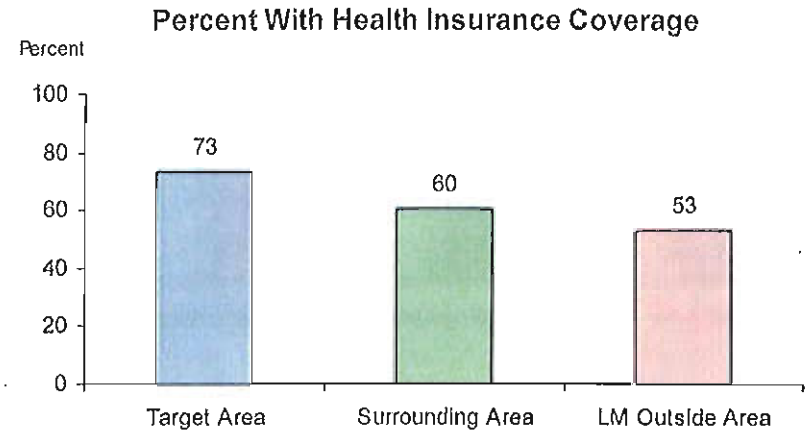


4.8 Health Related Indicators by Residence Area

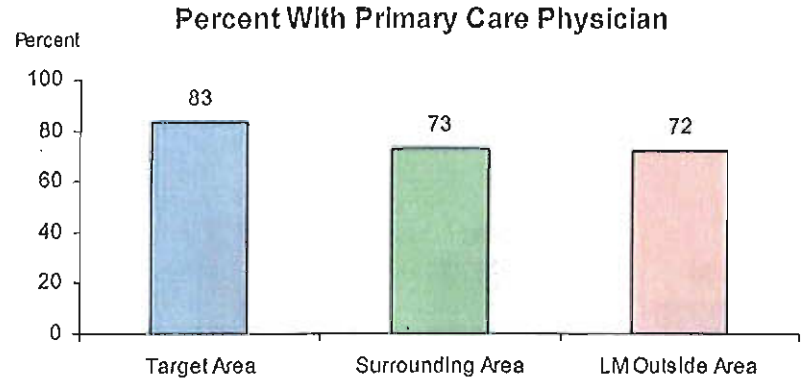
When analyzed by the area of the community in which the participants resided, there were several health related indicators where the people who chose to participate in the screenings from these three areas were significantly different. A significant difference is a difference that is not likely to occur due to chance.

The percentage of people who had health coverage was 73% for the target area, 60% for the surrounding area, and 53% for the area that is outside both the target area

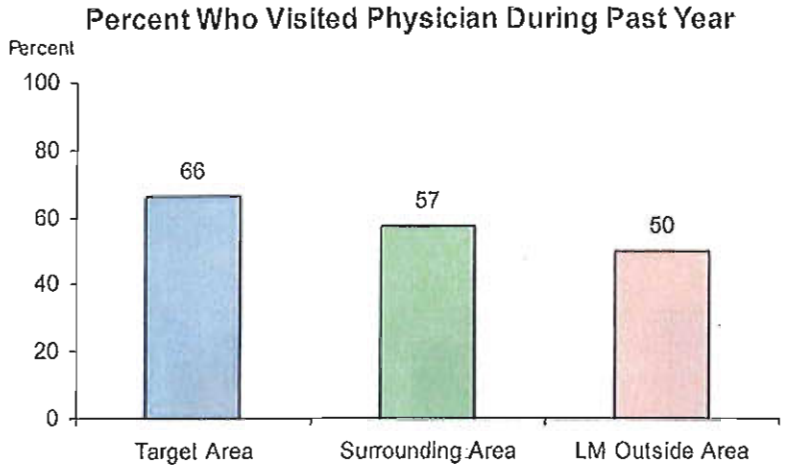
and the surrounding area. This means that the greater distance the person traveled, the less likely he or she had any health coverage. The lack of health coverage was likely a motivator to travel a greater distance to participate in the health screening.



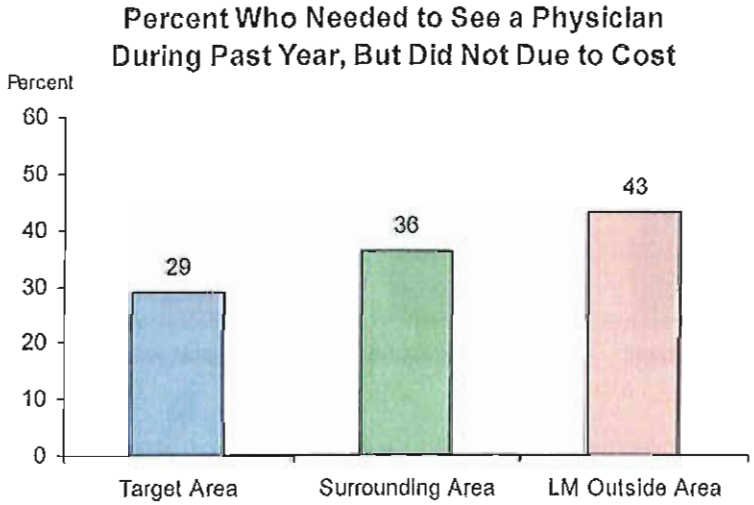
Similarly, the greater distance the person traveled, the less likely he or she was to have a primary care physician.



Whether the participant had seen a physician during the past year was significantly different by their residence area. People traveling a greater distance were less likely to have seen a physician during the past year.



Whether the participant had needed to see a physician during the past year, but did not because of cost, was significantly different for participants from the three residence areas. People traveling a greater distance were more likely to have needed to see a physician during the past year, but did not due to the cost. This likely influenced their decision to travel a greater distance to participate in health screening and education at no charge to them.



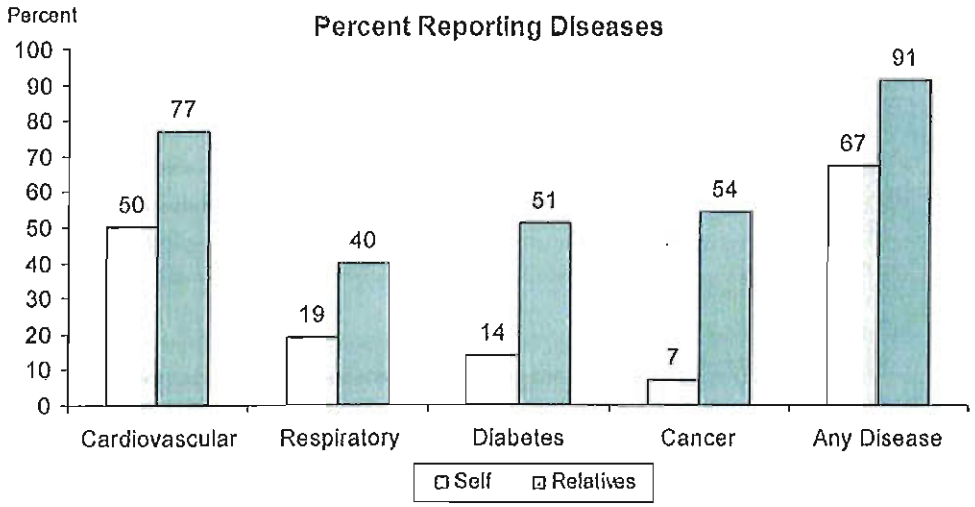
4.9 Screening Participant's Disease History

The leading causes of death in Louisville Metro and the United States are heart disease, followed by lung cancer, stroke, and chronic obstructive pulmonary disease.[4] Participants completed a disease history, including these diseases, and reported which diseases they and their blood relatives had. Table 2 lists each disease, the percent of participants reporting having the disease, and any available prevalence rates for the disease.

Table 2. Disease Prevalence Rates

Disease	% Participants With Disease	Comparison Prevalence Rates [5, 6]
Hypertension	38.7	23.5
Heart Disease	9.4	11.0
Stroke	3.9	2.6
Elevated Cholesterol	25.0	
Other Cardiovascular	2.0	
Diabetes	13.8	7.9
Asthma	14.7	11.0
Emphysema	2.9	1.8
Chronic Obstructive Pulmonary Disease	3.3	
Other Lung Disease	2.0	
Lung Cancer	0.5	0.1
Colon Cancer	0.3	0.2
Prostate Cancer (Males)	2.7	2.0
Breast Cancer (Females)	2.5	2.0
Cervical Cancer (Females)	1.4	1.2
Skin Cancer	1.0	
Bladder Cancer	0.2	
Brain Cancer	0.1	
Other Cancer	1.9	
Any Cancer	7.2	7.2
Stomach Disease	10.5	Ulcers 6.6
Blood Disease	2.6	
Skin Disease	3.8	
Liver Disease	2.2	1.5
Autoimmune Disease	2.5	
Brain Disease	1.5	
Nervous System Disease	3.0	
Kidney or Bladder Disease	5.4	Kidney 1.5
Other Disease	6.5	

Half of the participants reported having one or more cardiovascular diseases (which included heart disease, stroke and other cardiovascular diseases), 19% reported respiratory diseases (which included acute and chronic obstructive pulmonary diseases and lung cancer), 14% reported diabetes, and 7% reported cancers. When reporting if one or more of their blood relatives had any diseases, 77% reported relatives with cardiovascular diseases, 40% reported relatives with respiratory diseases, 51% reported relatives with diabetes, and 54% reported relatives with cancers. Sixty-seven percent of the screening participants reported that they had one or more known diseases and 91% of the participants reported that they had one or more blood relatives with known diseases.



4.10 Screening Tests

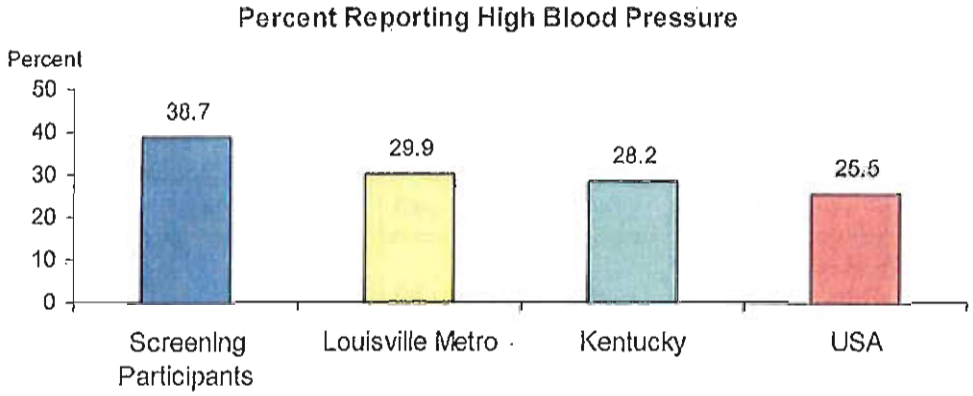
Table 3 reviews each screening test, the number of participants who completed that test, the number of tests completed on participants without a known, related disease, the criteria for interpreting an abnormal result, and the estimated disease prevalence rate (the expected rate in the population) for the associated disease or diseases.

Table 3. Screening Test Results and Comparison Prevalence of Associated Diseases

Screening Test	# of tests completed	# tests on those without known history of related diseases	% of those W/O history with abnormal results	Criteria for determining abnormal result	Estimated Prevalence - Source = Ref. #5 unless otherwise noted
Blood Pressure	2308	1399	25.7	Systolic > 139 OR Diastolic > 89	23% HI BP 32% African Americans 21% Whites
Spirometry	1442	1163	3.3	Moderate or Severe Reduction in airflow	2% emphysema 11% asthma 4% bronchitis
Blood Cholesterol	2050	1517	12.1	> 239	11% heart disease
Blood Glucose	2049	1760	2.2	Fasting > 125; non-fasting > 225	Diabetes: 7% whites 12% AA
Urine test for hemoglobin	1264	1264	8.0	Positive for hemoglobin	
Blood Hemoglobin – Females	1160	1160	1.5	< 9.1	9-16% young females 6-9% older females [7]
Blood Hemoglobin – Males	877	0	0	< 9.1	2-3% adult males [7]
Blood Triglycerides (fasting adults)	586	586	15.2	> 199	11% heart disease
Clinical Breast Exams (females)	481	477	3.1	Suspicious or Abnormal finding	2% CA
PAP Smears (females)	380	380	5.5	Suspicious or Abnormal finding	1% CA
PSA Blood Test (males)	603	603	6.5	> 4.0	2% CA
Prostate Exam (males)	342	342	8.2	Abnormal finding	2% CA
Blood Lead Level (children)	47	0	0.0	> 9	3 to 4% of high risk in LM [4]
Colon Cancer Screening	1800	unknown	unknown		Less than 1% Colon CA [6]

A common cardiovascular disease is high blood pressure, also called hypertension. Estimates of the incidence of high blood pressure vary from 20 to 40% of the population, depending on age, gender, and race,[8] with an overall rate for the US population of 22%.[5]

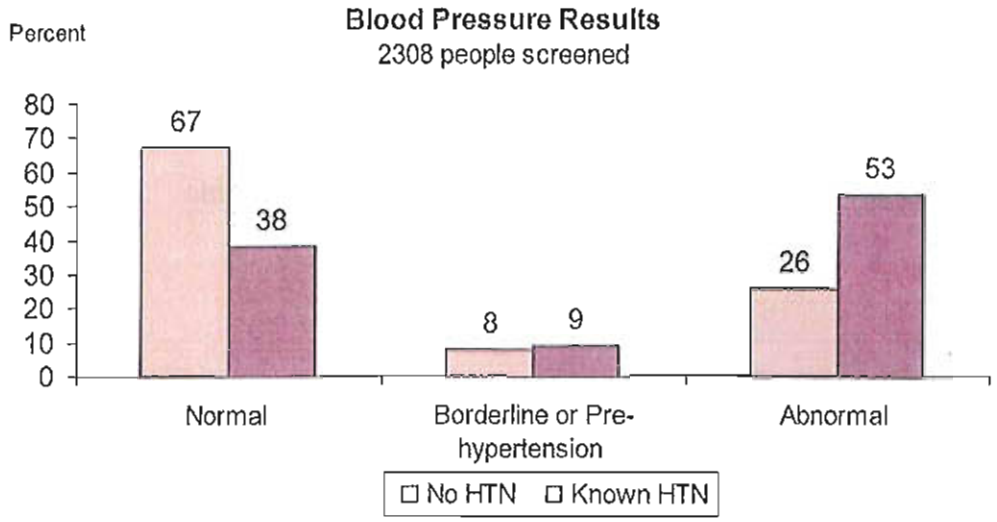
It is common in health surveys to ask if the individual has been told by a health professional that they had high blood pressure. Hypertension can lead to stroke, heart attack, heart failure or kidney failure. Thirty-nine percent of the screening participants reported having high blood pressure, compared to 26 to 30% for surveys completed in Louisville Metro, Kentucky, and the US (from BRFSS Survey Data[2]).



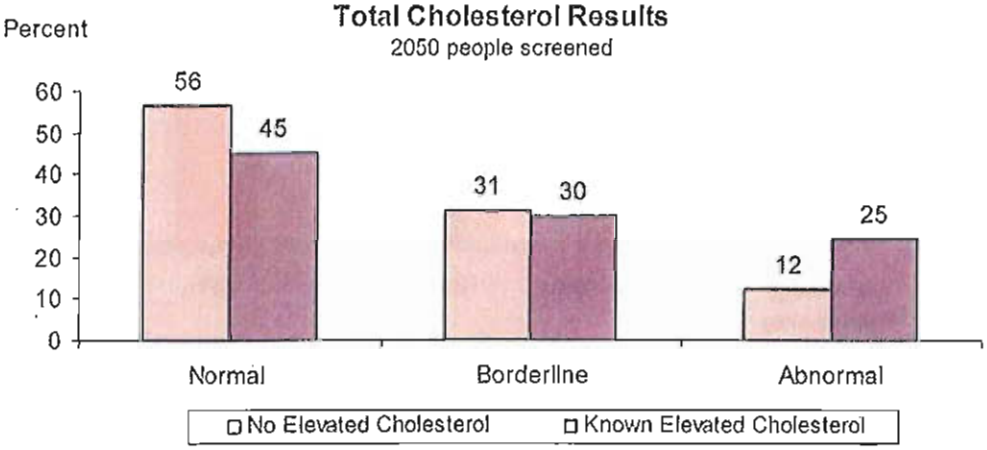
A normal blood pressure is considered to be 120/80 (120 systolic reading and 80 diastolic reading) or lower. An abnormal blood pressure is a systolic reading of 140 or more OR a diastolic reading of 90 or more. Consistent blood pressure readings in this range suggest hypertension, or high blood pressure. Anything less than this abnormal result, but greater than the normal result is considered borderline, or pre-hypertension.

Blood pressure screening was completed for 2,308 of the screening participants. Of the participants screened for blood pressure, 1,399 people reported no history of hypertension while 909 (or 39%) reported having hypertension.

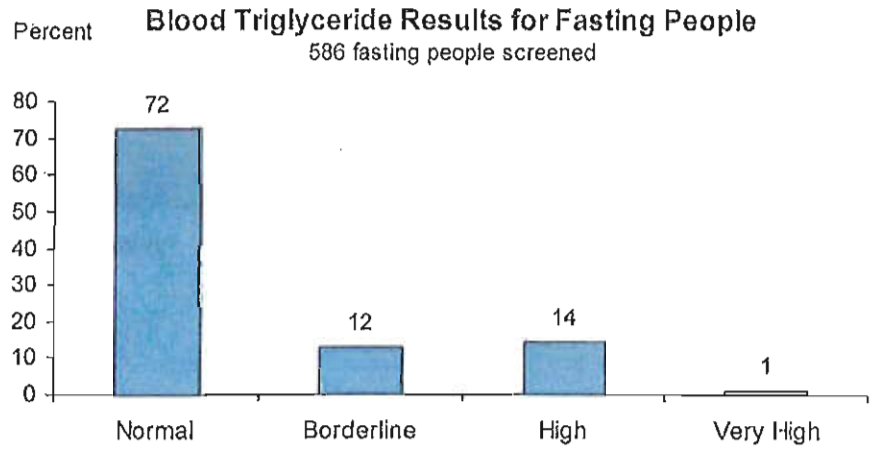
In participants who did not have a history of high blood pressure or hypertension (HTN), 26% had an abnormal blood pressure reading. These individuals were advised to get follow-up for potential hypertension. Of the participants known to have hypertension, 53% had an abnormal blood pressure reading at the screening event. This indicates that the majority of the participants already diagnosed with high blood pressure did not have their disease under control.



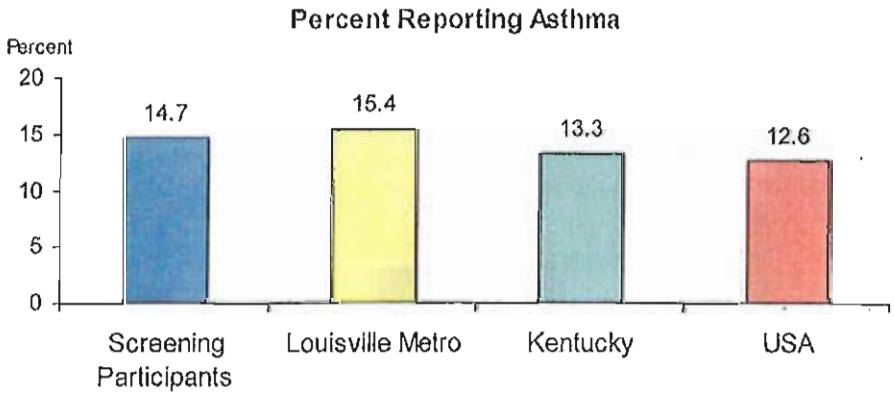
High blood cholesterol and/or triglyceride levels are another major risk factor for heart disease. Almost half of the individuals screened with no known history of elevated cholesterol measured either borderline (31%) or abnormal (12%). Of the screening participants with a history of elevated cholesterol, over half of them were borderline (30%) or abnormal (25%). This indicates that a fourth of the participants with a known history of high cholesterol still had an abnormal level. In addition, 30% of participants with a known history of high cholesterol had borderline levels of cholesterol in the blood stream.



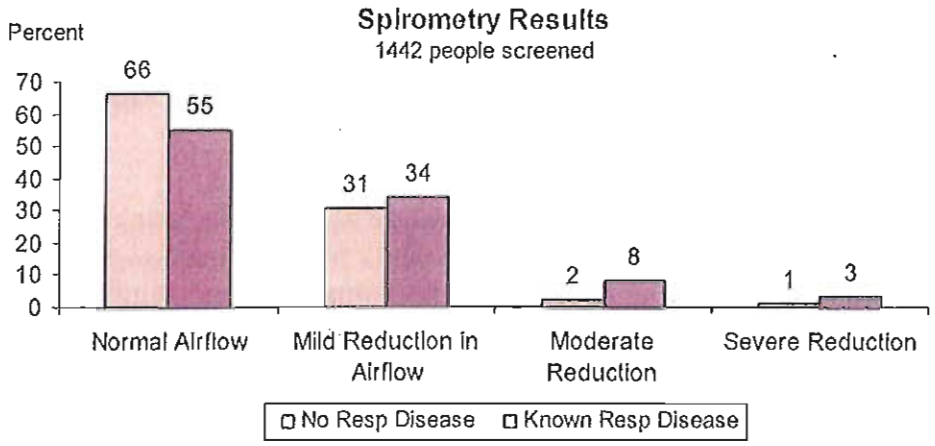
A measure of the triglyceride level in the blood stream is only useful if the person has not eaten for 12 hours. Of the people screened, 586 had not eaten within 8 to 12 hours. Of these participants, 82 (or 14%) had a high triglyceride level and seven (or 1%) had a very high level.



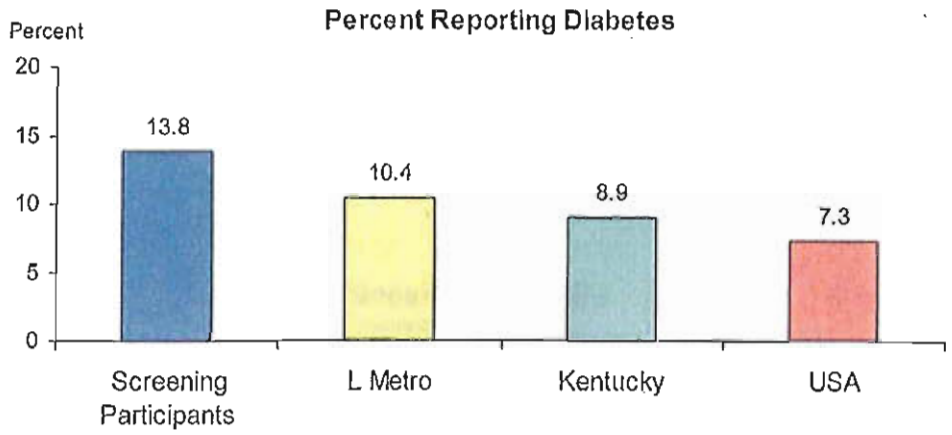
Asthma is one of the respiratory diseases that obstructs airflow in and out of the lungs and included as a commonly asked about disease on health surveys. Approximately 15% of screening participants and Louisville Metro residents reported knowing they have asthma, compared to the 13% reported in Kentucky and the US.[2]



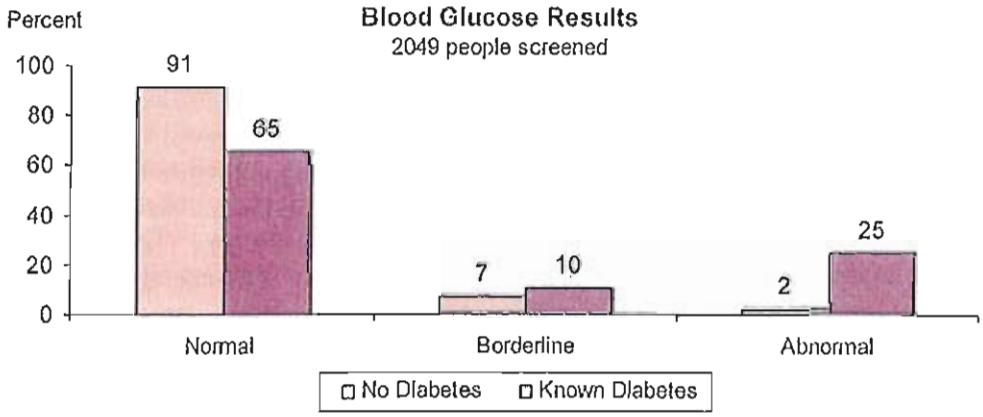
A spirometry test measures how well an individual is moving air into and out of the lungs and is useful in diagnosing respiratory diseases affecting airflow. Of the 1,163 individuals screened without a history of respiratory disease, 24 people (2%) had a moderate reduction in airflow and 14 (or 1%) exhibited a severe reduction. Of the 279 people with a history of respiratory disease, 23 people (8%) had a moderate reduction in airflow, and 9 (or 3%) had a severe reduction.



Diabetes is characterized by high levels of blood glucose resulting from defects in insulin production, insulin action, or both. Insulin is a hormone produced by the pancreas to regulate blood sugar. Behavioral factors that can contribute to diabetes include increased fat consumption, decreased physical activity, and obesity. This is another disease incidence that is frequently asked on health surveys. The highest percentage of those reporting diabetes occurred in the screening participants (14%), followed by Louisville Metro (10%), Kentucky (9%), and US (7%)[2].

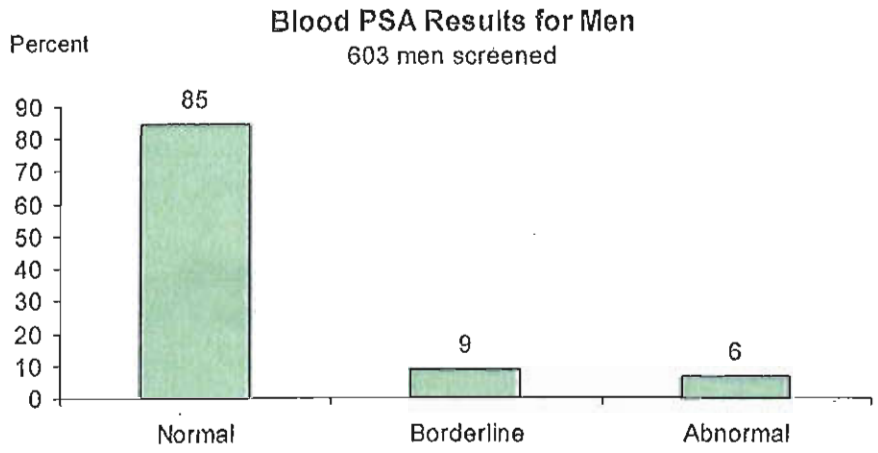


Of the participants with no known history of diabetes, 91% of the screening participants had a normal blood glucose level, while 2 % were abnormal and 7% were between normal and abnormal, or considered borderline. Of those with a known history of diabetes, 65% had normal blood glucose results, 7% borderline, and 25% abnormal. This indicates that 25% of participants with diabetes may not be well controlled.

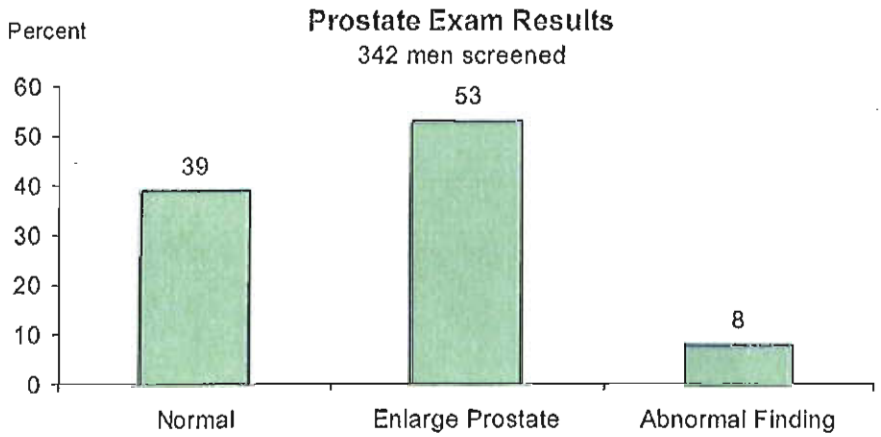


Screening tests related to several cancers were part of the screening project. Men were offered two tests for prostate cancer, a prostate specific antigen (or PSA) blood test and a rectal exam.

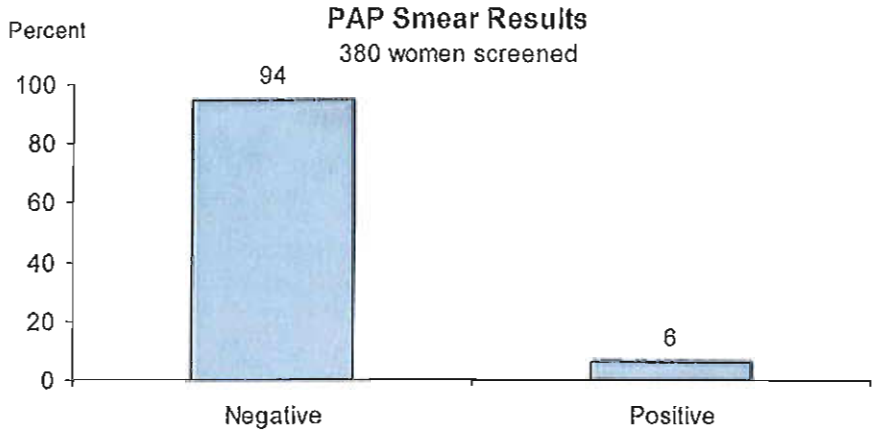
Of the 603 males who had the blood test, 39 (6%) men exhibited abnormal blood PSA results. In addition, 53 men (or 9%) were at a borderline level.



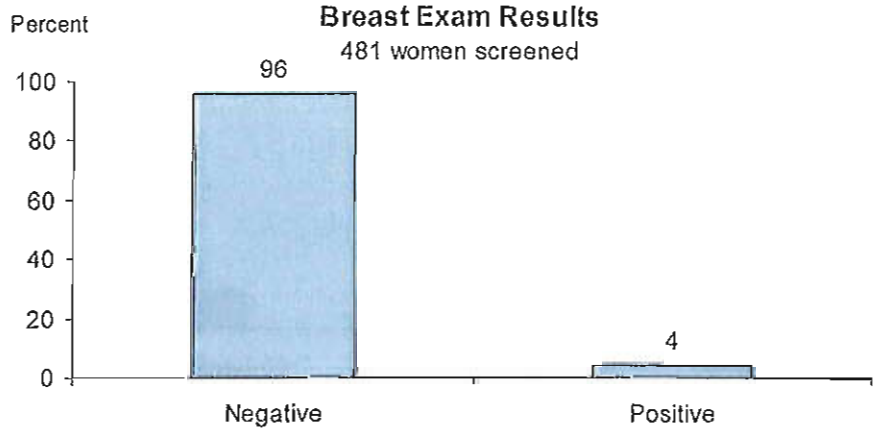
Rectal exams were completed on 342 males. Although over half (53%) of these men had an enlarged prostate, only 28 (or 8%) had an abnormal or suspicious finding.



The Pap test, also called the Pap smear, is a screening test for cervical cancer. Having regular Pap tests will increase the chance that any cervical cancer is detected during an early, treatable stage. Of 380 women screened with a Pap smear, 21 (or 6%) had a positive or potentially abnormal finding and require follow-up.

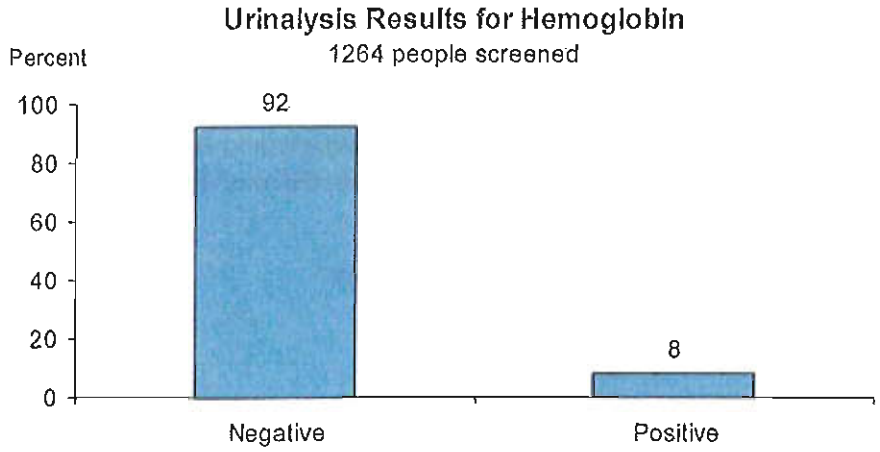


In the United States, breast cancer is one of the most common cancers in women, regardless of race or ethnicity. There are three main tests used to screen for breast cancer: mammogram, breast self-exam, and clinical breast exam. The screening sites offered women a clinical breast exam to check for any signs or symptoms of breast cancer. While 481 women had a clinical breast exam at the screening site, four of them already knew they had a problem with their breasts. Of the 477 who did not have a previously identified problem, fifteen women (or 3%) had an abnormal finding from the clinical breast exam and were referred for a mammogram.



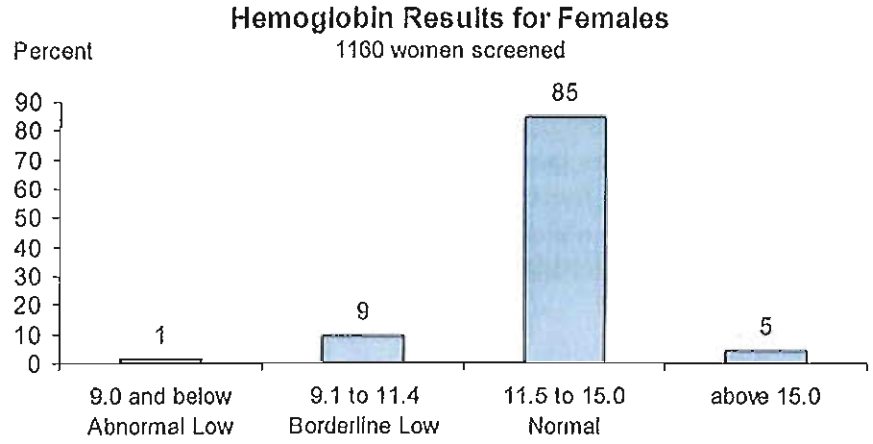
In addition, employees from the Louisville Metro Public Health and Wellness determined that 297 women were due for a preventive mammogram based on their age or medical history. They assisted these women in obtaining a preventive mammogram.

Testing the urine for the presence of blood (hemoglobin) is a preliminary screening test to see if bladder cancer is a possibility. A urinalysis for hemoglobin was conducted on 1,264 people. There were 101 individuals (or 8%) with a positive result for hemoglobin. Those with a positive result were offered a urine cytology test for the presence of suspicious cells for bladder cancer.

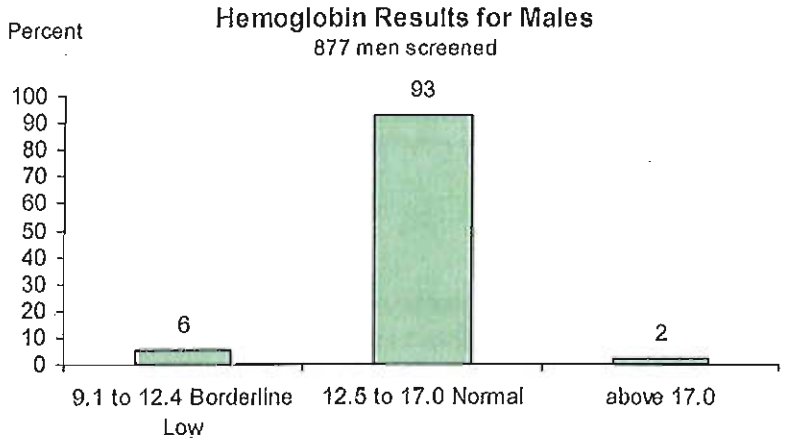


The hemoglobin level in the blood stream was another screening test offered at the screening sites. Above-normal hemoglobin levels may be the result of dehydration, excess production of red blood cells in the bone marrow, severe lung disease, or several other conditions. Below-normal hemoglobin levels may be related to anemia that can be the result of iron deficiency, inherited hemoglobin defects such as sickle cell anemia, cirrhosis of the liver, kidney disease, or other chronic illnesses. Women and men have a slightly different normal level of hemoglobin in the blood.

Of the 1,160 women screened for blood hemoglobin level, the majority (85%) had normal hemoglobin results. Nine percent had borderline results and 1% (or 17 women) had abnormally low results. In addition 5% were higher than normal.



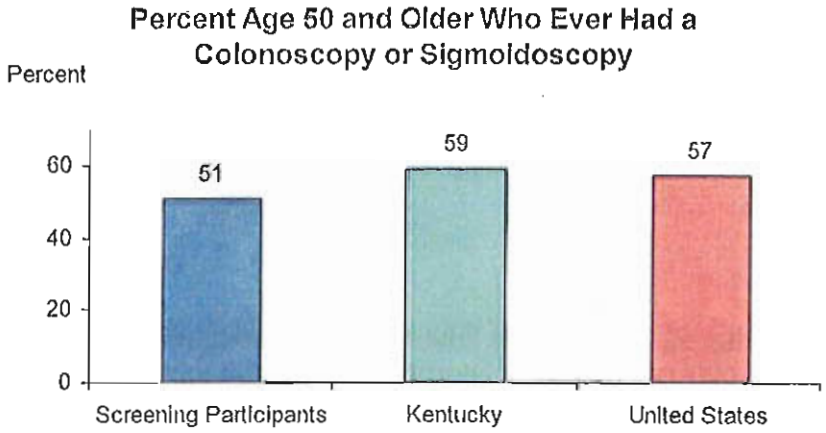
Among the 877 men screened, 52 exhibited borderline low results. No men were found to have abnormally low levels. Two percent were abnormally high.



Each site had a colon cancer screening and education station where staff members asked screening questions for colon cancer and provided colon cancer education. Eighteen hundred (1,800) participants stopped at this station. Of these participants, 46% were at high risk for colon cancer and 73% said they were willing to have a colonoscopy test performed.

There were 1,302 participants who were 50 years of age or older and participated in the colon cancer screening. Of those participants, 772 (or 59%) said they were willing to have a colonoscopy test.

All screening participants were asked if they had ever had a colonoscopy or sigmoidoscopy, which are the preferred colon cancer screening tests for adults who are 50 years of age or older. Of the screening participants who were age 50 years or older, 51% reported that they previously had one of these tests. This is lower than the percent reported in the 2006 Behavioral Risk Factor Surveillance System survey for the commonwealth of Kentucky (59%) and the United States (57%).

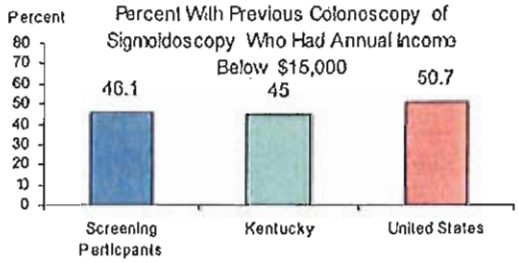


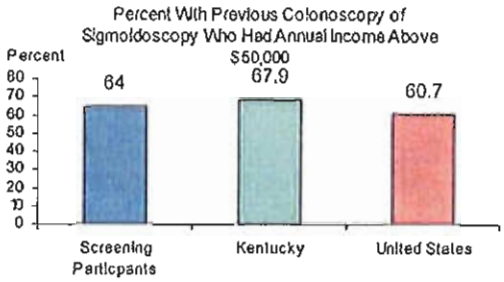
The Louisville Metro Department of Public Health and Wellness is partnering with several community entities to guide some of the screening participants who are 50 years or older and have not had one of the screening tests through the process of obtaining a colonoscopy. The plan is to navigate up to 430 of these participants. If 58% of these participants actually obtain a colonoscopy under this program, this would increase the percent of screening participants (50 and older) who have had a screening test for colon cancer from 51% to 70%. This would make the percent one of the highest ever reported for a specific population.

Additional analysis of those 50 years of age and older who have had a sigmoidoscopy or colonoscopy, shows a relationship between both income and education and the percent who have had one of these tests performed.

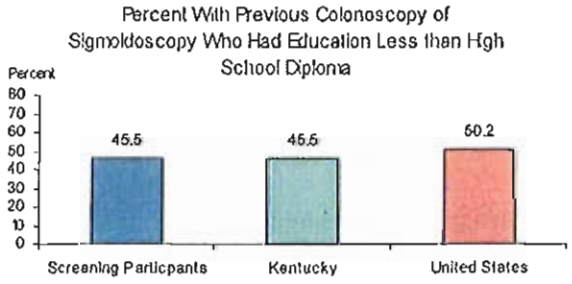
For people ages 50 and older in the United States, about 51% with an annual income under $15,000 have had one of the screening tests. However, this percent goes up to 61% for those with an annual income over $50,000.

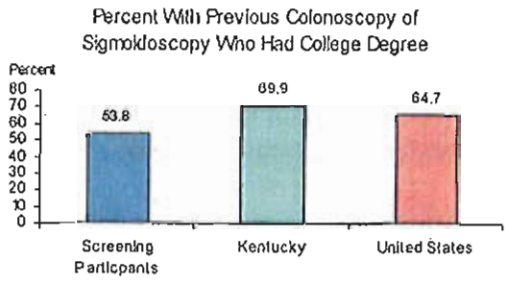
Comparing the US population to our screening participants (50 years of age and older), 46% of participants with an annual income under $15,000 had one of the tests, which is lower than the US rate. However, 64% of the screening participants 50 years of age or older with an annual income over $50,000 have had one of the tests, which is higher than the rate for the US.





When examining education, 46% of the screening participants compared to 51% of the US adults 50 and older who had less education than a high school diploma had a screening test. A higher difference was found for those ages 50 or older who had a college degree and one of the screening tests. That percent was 54% for the screening participants and 65% for adults in the United States.





At the screening sites, children under age six were offered a blood lead test to see if the level of lead in their blood stream was elevated. Forty-seven children had the lead test done and none of them had an elevated lead level.

4.11 Participant Follow-up

Screening staff told participants their blood pressure reading, spirometry results, clinical breast exam results, and rectal exam results at the time of the screening. Participants received a letter with their laboratory test results. Information on cholesterol levels, and how to reduce those levels, was included in the letters sent to the participants. Any abnormal PAP smear results were followed up by the LMPHW Cancer Prevention Program staff using their protocols.

In addition, LMPHW staff members are contacting, by phone, all the people who met one or more of the following criteria:

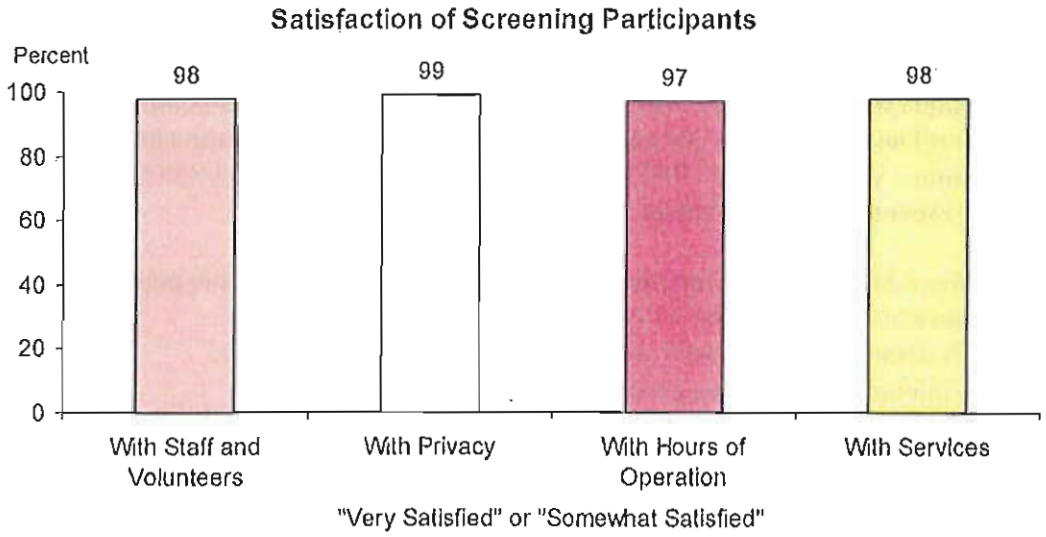
- A documented referral for the blood pressure reading
- A documented referral for spirometry results
- A blood sugar (glucose) level of greater than 125 for fasting participants or greater than 225 for non-fasting participants
- A blood hemoglobin level of less than 9.1
- A blood PSA level of greater than 2.5
- An abnormal result from a digital rectal exam
- An abnormal result from the breast exam

The LMPHW staff will ask these participants about their follow-up for the indicated health issues:

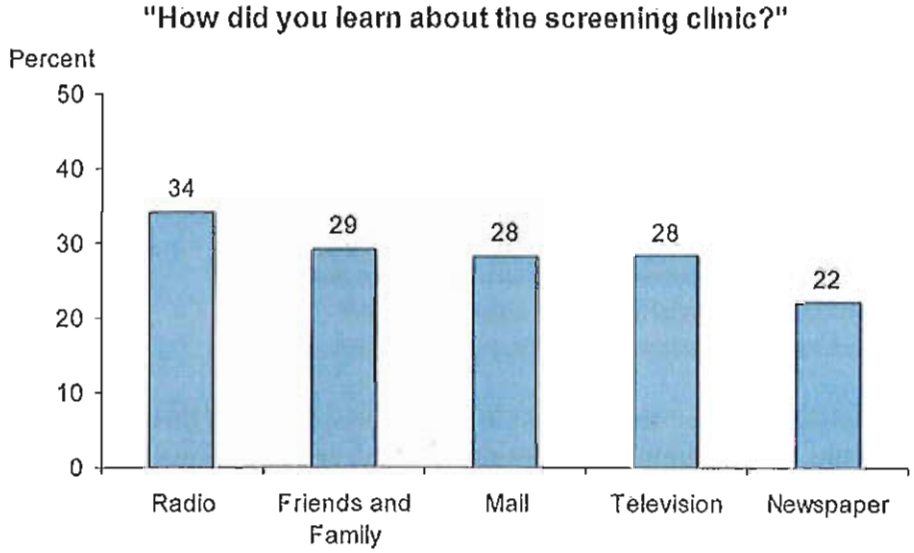
- Have they have seen a health professional?
- Did a health professional prescribe any new medications?
- Did they get any new prescriptions filled?
- Did the health professional make a new diagnosis?

4.12 Participant Satisfaction with the Screening Event

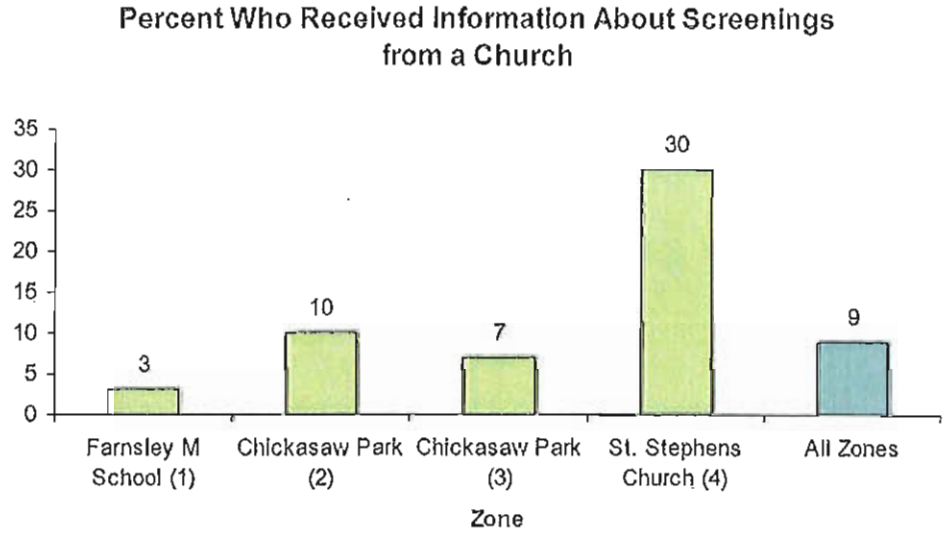
At the screening site, participants had the opportunity to complete a satisfaction survey when they had completed the screening activities. Of the 2,407 participants in the screening project, 1,913 (79%) completed a survey. The survey included four questions about the participants' satisfaction with their experience at the screening event. (The survey instrument is in Appendix A.) The vast majority of the participants (97 to 99%) were satisfied (either 'very satisfied' or 'somewhat satisfied') with the treatment by the staff and volunteers, the privacy provided at the event, the hours of operation and the screening services.



In order to maximize community awareness of this screening event, outreach activities used several media outlets. To gauge the effectiveness of each of these media, the survey asked participants, "How did you learn about the screening clinic?" Multiple responses were possible (see Appendix A) and 37% indicated they were exposed to the message from multiple media. Radio messages appear to have been most successful at reaching community members who made the decision to attend the event with 34% of survey respondents indicating radio messages.



While only 9% of survey respondents received messages about the event from their church, 30% of the respondents who were screened at St. Stephens Church indicated they learned about the event from their church. Using the church facilities as a screening site increased the church's involvement in promoting the screening event.



Fifty respondents checked none of the boxes provided to indicate how they learned of the event. However, 29 of these 50 respondents wrote in a response to indicate other ways they learned about the event. These responses included:

I walked/drove by the site. (18)
I received a phone call. (10)
I saw a flyer. (4)
I learned about the screenings from a website. (4)
I learned about the screenings at work / union hall. (3).
I learned about the screenings at a health center. (1)
I learned about the screenings at the grocery store. (1)

Eighty-eight survey respondents wrote in remarks about their experience at the screening event. These comments were categorized, and the following categories had at least four responses:

Expressions of gratitude or specific compliments for the services (26)
Frustration with the time respondents were required to wait (17)
At times particular services were unavailable and required a return on a different day (13)
Hours of the screening were inconvenient (7)
Patients were seen out of order, including patients without an appointment (7)

5.0 Observations

Funds for the $1.2 million Community Health Screenings Project occurred in response to an agreement between the United States Environmental Protection Agency (EPA) and the Louisville Metropolitan Sewer District (MSD) as a result of negotiations between MSD and the Kentucky Department of Environmental Protection over alleged violations. This agreement allowed LMPHW to assess the health status of the people who live in designated areas surrounding Rubbertown.

The LMPHW Planning Committee structured the health screenings by dividing the project into integral plans that included financial, logistics, communication, staffing, and enrollment. In theory, funds were available to screen 30,000 residents; however, it was difficult to project the actual number of participants. In planning the screening event which began September 10, 2007, and concluded November 9, 2007, the committee discussed the importance of connecting participants to a medical home. LMPHW contracted with the Family Health Centers, Inc., the University Physician Associates, and Park DuValle Health Center to provide follow-up healthcare for participants who did not have a medical home. Health department staff notified each participant of his/her screening results and provided appropriate referral sources.

Over several weeks following the screenings, The Office of Policy and Planning and Evaluation analyzed the screening data that resulted in the following observations:

- Two thousand-four hundred and seven (2,407) people participated in the event
- Participants tended to be older than the target population, with those 40 years of age and older significantly more likely to attend
- Women and Whites attended at a slightly higher rate than their representation in the target area population
- Participants in the screening project tended to have a higher educational attainment and a lower income than the target area population
- Participants were more likely to be without health care coverage and to report their health status as "fair" or "poor" than comparison populations
- Participants had a higher rate of not seeing a physician due to cost and not visiting a dentist during the previous year than comparison populations

- Participants had a higher rate who were overweight or obese, a lower rate who ate adequate servings of fruits and vegetables, and a lower rate engaging in leisure time physical activity than comparison populations

- Participant's were categorized based on the location of their residence:
  1. The *Target Area* as defined by the court decree (1206 participants)
  2. The *Surrounding Area* around the target area (997 participants)
  3. In Louisville Metro, but the area outside the target area and the surrounding area (*LM Outside Area*) (151 participants)
     - Living outside all three of these areas were 37 participants
     - An additional 16 participants reported living in Louisville Metro but did not provide an address that could not be located in one of these areas

  Significant differences between the three areas were:
  - Outside the target area, African Americans participated at a much higher rate than their representation in the population
  - People age 65 years and older were significantly more likely to attend the screening if they lived in the target area and least likely to attend if they lived in the LM Outside Area
  - Lower income people were more likely to attend the screening event than their proportion in the population
  - The greater distance the participant traveled, the less likely he or she had any health coverage, had a primary care physician, or visited a physician during the past year. The greater distance the participant traveled, the more likely he or she needed to see a physician during the past year, but did not due to the cost

- 50% of the participants reported having one or more *cardiovascular diseases*

- 38.7% of participants reported having high blood pressure (expected prevalence in a population is 23.5%)

- 25.7% of participants not reporting high blood pressure had an abnormally high BP reading

- 19% reported one or more *respiratory diseases*

- 14.7% reported asthma (expected prevalence 11%) 3.3% of those not reporting any respiratory diseases had an abnormal spirometry result

- 14% reported *diabetes* (expected prevalence 7.9%)

- 2.2% of those not reporting diabetes had an abnormally high blood glucose level

- 7% reported *cancers*

6.0 Next Steps

Discussions have taken place to define the next steps in the community health screenings project to expend the balance of the funds. Components have emerged of which two are in process.

1. **Follow-up** (in process). Health department nurses are calling participants and employing a standardized screening form to collect information. Their conversation ascertains if participants followed medical staff recommendations made as a result of the screenings outcomes. Collected information includes 1) whether participants followed up; 2) whether a new diagnosis was made; 3) whether treatment regimens are changed or a new regiment began. Medical recommendations are reinforced, and the information collected is entered into a database to evaluate the efficacy of the screenings project.

2. **Focus Groups.** This is a recommendation to convene focus groups comprised of persons who were eligible for the community health screenings but elected not to attend. The focus groups will provide valuable insight into community members' perceptions of their health, the health department, and the health care system.

3. **Colon Cancer Screening Collaborative** (in process). Of the health screenings, 1,302 colon cancer screenings were completed, and participants were identified as normal risk, at-risk, or high-risk for colon cancer. LMPHW and the Colon Cancer Prevention Project formed a partnership to provide colonoscopy screenings for insured and uninsured participants who were screened to be at-risk and high-risk for colon cancer. The partnership includes 41 gastroenterologists and surgeons, all four major healthcare facilities in Louisville Metro, four pathologists, the American Cancer Society, the American Red Cross, and Salix Pharmaceutical. The physicians and health care facilities agreed to waive any costs associated with their services for participants who are uninsured. LMPHW established a navigator position to link high-risk participants to the healthcare facilities and their navigation system.

4. **Asthma Case Management.** Asthma was among the most common chronic illnesses reported by patients seen at the screening event. 290 patients were referred for follow-up with a health-care provider due to abnormal spirometry exams which indicated lung pathology. We propose to use health screening funds to educate residents about asthma at the community and individual level. We will provide asthma educational events at sites such as area schools and workplaces. We will also provide case management to individual adults and children in the Rubbertown area with asthma. The outcomes of this health screening component will be monitored and evaluated.

ADEWALE TROUTMAN, M.D., M.A., M.P.H.
DIRECTOR

SAMPLE

Thursday, June 19, 2008

Mr. John AAFake1
123 Elm St
Louisville, KY 40202

Dear Mr. AAFake1,

Thank you for participating in the Louisville Metro Public Health and Wellness Community Health Screening! I am writing to follow up on your blood testing done at our screening this month.

Test results for each of the tests that could have been performed are shown below. ***If a particular test was not performed, no result will be shown.***

Test Name	Result
Total cholesterol level (normal levels are 100 - 199 mg/dL):	**700**
Your total cholesterol level was elevated.	
Triglyceride level (normal levels are 0 – 149 mg/dL):	**220**
Your triglyceride level was elevated.	
LDL cholesterol level - calculated (normal levels are 0 – 99 mg/DL):	**596**
Your LDL cholesterol level was elevated.	
HDL cholesterol (normal levels are 40 - 59 mg/dL):	**60**

Your HDL cholesterol level was elevated. This is a good thing! Elevated HDL levels are associated with a lower risk of heart disease.

Elevated cholesterol levels, high triglyceride levels, high LDL levels or low HDL cholesterol levels are associated with an increased risk of heart disease. You can lower your total cholesterol or raise your HDL cholesterol levels by, adopting a low saturated fat and low cholesterol diet, maintaining a healthy weight, and regular physical activity. Please find attached to this letter a cholesterol information sheet. If you are not currently being treated for this issue, you should follow up with a primary care provider for further information.

Prostate Specific Antigen level (normal levels are 0.0 – 2.5 ng/mL): **11.80**

Your PSA level was elevated. If this is a new problem and you have not arranged for follow up with a physician, please call 574-6570 to discuss follow up options.

Blood sugar (normal fasting glucose is <100 mg/dL): **250**

Your blood sugar level was elevated. Elevated blood sugar levels can be evidence of diabetes. If you have not been diagnosed as a diabetic before, you should follow up with a primary care provider for further evaluation.

Hemoglobin (normal levels are 12.5 – 17.0 g/dL): **6.0**

Your hemoglobin level was low. This indicates anemia. You should follow up with a primary care provider for further evaluation

Urinalysis (normal result is negative for free hemoglobin): **Positive**

Your urinalysis was abnormal with a positive qualitative free hemoglobin result. This means that blood was found in your urine. We recommend that you follow up for further urine testing. You may take the enclosed Lab Order Form to any LabCorp site to have further urine testing done FREE OF CHARGE. Enclosed also is a list of LabCorp addresses. If you have symptoms such as pain with urination or abnormal urine color or odor you should follow up with a primary care physician immediately.

If you see a provider for follow up please give this letter to them so that they have the exact results. If you have further questions, please contact us a 574-6570.

Sincerely,

Matt Zahn, MD

Ms. Joan AAFake2
123 Oak Lane
Apt #2
Louisville, KY 40202

Dear Ms. AAFake2,

Thank you for participating in the Louisville Metro Public Health and Wellness Community Health Screening! I am writing to follow up on your blood testing done at our screening this month.

Test results for each of the tests that could have been performed are shown below. ***If a particular test was not performed, no result will be shown.***

Test Name	Result
Total cholesterol level (normal levels are 100 - 199 mg/dL):	198
Your total cholesterol level was normal.	
Triglyceride level (normal levels are 0 – 149 mg/dL):	98
Your triglyeceride level was normal.	
LDL cholesterol level - calculated (normal levels are 0 – 99 mg/DL):	95
Your LDL cholesterol level was normal.	
HDL cholesterol (normal levels are 40 - 59 mg/dL):	60 r HDL
cholesterol level was elevated. This is a good thing! Elevated HDL levels are associated with a lower risk of heart disease.	
Blood sugar (normal fasting glucose is <100 mg/dL):	98
Your blood sugar level was normal.	
Hemoglobin (normal levels are 11.5 – 15.0 g/dL):	12.4
You do not have anemia.	
Urinalysis (normal result is negative for free hemoglobin):	Negative
Your urinalysis result was normal.	
Pap Smear result:	Negative
Your Pap Smear result was normal.	

If you see a provider for follow up please give this letter to them so that they have the exact results. If you have further questions, please contact us a 574-6570.

Sincerely,

Matt Zahn

RE: Quarterly Report – Beargrass Creek Restoration Project

Ms. Croce,

Please find below the SEP report for the Riparian Buffer SEP (Beargrass Creek Restoration - Lexington Road and Grinstead Drive).

Description of the SEP as implemented:

In January 2006, Metro Parks received $25,000 from MSD for a project involving naturalization, environmental education, and interpretive signage at the Beargrass Creek Greenway near the intersection of Lexington Road and Grinstead Drive. The primary purpose of this project is to restore riparian habitat in a degraded and high profile area; introduce area high school students to practical applications of ecological and environmental science principles; and to raise awareness of watershed issues affecting Beargrass Creek. Since award of funding, Metro Parks has initiated a partnership (now in its second year) with the Male High School Advanced Placement science class and conducted numerous volunteer days in order to advance the goals of this project. Since project initiation, focus has been on necessary removal of invasive bush honeysuckle (Lonicera mackii) from the project area in concert with performance of water quality, soil analysis, and initial biological inventory with the assistance of Male High School students.

Description of any operating problems encountered and the solutions thereto:

Metro Parks has encountered a few operating challenges that have delayed full implementation of the SEP. First, project initiation was delayed until the Fall of 2006 due to unforeseen Metro Parks staffing issues. That issue was resolved in August of 2006 with the hiring of a Landscaping Supervisor to assist with project implementation. Second, Metro Parks has not been able to

LOUISVILLE · JEFFERSON COUNTY METRO

Jerry E. Abramson
Mayor

Louisville
Metro Council

move as rapidly as desired in the removal of bush honeysuckle predominantly because the agency relies upon volunteer support for this portion of the project. Orlginally Metro Parks anticipated that we would be successful in securing the support of a local service organization to adopt the park and provide volunteer labor. To date, Metro Parks has not yet secured a formal park adoption partner and therefore the number of scheduled volunteer dates has been less than expected. Metro Parks hired its first volunteer coordinator with responsibilities for this Natural Area in August 2008 and therefore we expect that by 2009 we will schedule a significantly increased number of volunteer dates in order to complete the project in 2009. A final challenge, has been the positive commencement of an associated project within the project area that has impacted progress in implementing the restoration activities associated with this SEP. Metro Parks secured grant funding and additional support from MSD to create a wetland/storm water detention basin within the project area. Planning and construction of this basin commenced in the summer of 2008 and was completed in December of 2008. With this basin work completed, Metro Parks is able to move unimpeded to complete work on this Riparian SEP.

Description of the environmental and public health benefits resulting from the implementation of the SEP:

This SEP has increased awareness of the value of Beargrass Creek watershed to those citizens passing the site at the heavily travelled intersection of Lexington Road and Grinstead Drive as well as those citizens travelling the Beargrass Creek Greenway through the project site. Prior to initiation of this project the entrance to the project area (and to the Beargrass Creek) was completely blocked from public view by a dense understory of invasive bush honeysuckle and other noxious species. Passersby in vehicles were given not indication of the presence of Beargrass Creek and therefore an opportunity was missed to connect passersby to their potential impact on the watershed. In addition, the degraded nature of the landscape prior to initiation of this project made the area unattractive for recreational users of the Greenway. This project, along with complimentary improvements to the multi-use trails in the local area, has drastically increased the number of people passing through the project area along the greenway. Passersby and visitors to this signature Greenway entrance are able to appreciate Beargrass Creek and view the man-made features (stormwater culverts, Storm sewer overflow outlets, and created wetlands) that are a part of the landscape and contribute to the health of the Beargrass Creek. The initial signage for the project area, installed in 2008 as part of the Male High School environmental partnership, highlights human impact on this environment and our steps to improve this area through the Riparian SEP.

The following spreadsheet shows the allocation of funding spent on the project to date along with the amount which will be spent in 2009 to complete the project

Budget Item	Original Budget	Revised Budget	Previous Expenditures	Expenditures June 2006 to December 2007	Expenditures January 2008 to December 2008	Anticipated Expenditures 2009	Total Expenditures to Date
Plant Inventory	$160.00	$160.00	$0.00	$40.00			$40.00

Supplemental Environmental Program Summary Report forThe Louisville Olmsted Parks Conservancy

Project sites: Nettelroth management area, Cherokee Park
Ohio River riparian zone, Shawnee Park

The Louisville Olmsted Parks Conservancy (LOPC) has completed this project with the funds made available through the Louisville Metropolitan Sewer District and the Environmental Protection Agency.

This project focused on riparian restoration and enhancement in two of Louisville's Historic Olmsted designed parks, Cherokee Park and Shawnee Park. The riparian zones are situated along Beargrass Creek in Cherokee Park and the Ohio River in Shawnee Park. Invasive trees and shrubs were removed from both of these areas to make room for native vegetation planting. Approximately 1152 trees and shrubs were planted in both parks with 1781 Olmsted Conservancy man-hours spent on these clearing and planting efforts.

Approximately 50,000 citizens/yr pass by the riparian zone in Cherokee Park where they can see the direct impact of this project along the creek bank. Approximately 10,000 citizens/yr pass by the Shawnee Park river vistas and a hiking trail leads individuals directly through the newly planted areas.

There was a very short time delay in completion of the project due to a change in the project manager during the spring of 2007. Once this position was filled in the summer of 2007, the project was back on track. The project met no resistance from the general public and in fact we received many compliments on the work that Louisville Olmsted Parks Conservancy is doing to restore some of our critical riparian zones.

Sincerely,

Major Waltman

Major Waltman
Project Director

Louisville Olmsted Parks Conservancy Final report for the SEP requirements.

Activity summary for **Nettelroth.**

1. Report submitted on November 6, 2007:

   To date, the majority of the grant money has been applied to invasive plant removal, primarily Lonicera mackii, and the creation of two small wetland areas to capture stormwater runoff. Both of these activities are directed to improving water quality in the Middle Fork of Beargrass Creek. Research has proven that reduction of L. mackii can reduce the amount of available Nitrogen in the soil as NO3 and NH4+ which potentially can find its way into the creek.

   Collection of Stormwater runoff in wet depressions is a proven technique for improving the quality and reducing the quantity of runoff into streams.

   In the near future LOPC intends to continue the theme of water quality improvement in Beargrass Creek by decreasing the amount of open area in Nettleroth Sanctuary by clearing invasive vine species such as Ampelopsis, Celastrus, English Ivy, Euonymus, and Akebia and planting trees to re-establish a closed canopy woodland. This should help reduce the quantity of runoff and promote infiltration of water that reaches the ground. Hopefully, the increased canopy and decreased sunlight to the woodland floor will discourage the growth of the vine species.

2. Final report as of November 30, 2008:

   In 2008, 652 trees and shrubs were planted in the Nettleroth Management indicated on the map provided. Approximately 1048 man hours were spent on planting and irrigation in 2008. A detailed list of plants and quantities has been submitted with this report. As illustrated on the planting map provided, the riparian zone was enhanced with numerous plantings to help stabilize the banks of Beargrass Creek and upslope areas were stabilized with plantings to prevent the loss of soil and subsequent sedimentation of the stream. This will benefit the aquatic organisms.

   All Bush honeysuckle has been successfully removed from the management area which should decrease the amount of potential nitrate entering Beargrass Creek. This will benefit the stream by reducing the potential for eutrophication during the summer months.

   There have been no particular challenges with this project.

The following is a general itemized budget illustrating how the $35,000 for the Nettelroth was expended.

Purpose: Stabilize upslope areas and restore riparian zones along Beargrass Creek to prevent the loss of soil to the receiving waters.			
Grant Amount:			$ 35,000.00
various employees time on project - 2006	$	(7,466.00)	
Hunt Tractor (bobcat rental) - 2006	$	(404.00)	
various employees time on project - 2007	$	(8,475.51)	
various employees time on project - Jan-Nov 08	$	(9,760.10)	
planting materials purchased November 2008	$	(8,895.39)	
Current remaining amount available:			0.00

The following is a detailed list of the trees and shrubs planted in the management area:

Plant Species	Quantity
Nettelroth	*22 species*
Cornus amomum	70
Cornus drummondii	6
Cornus stolinifera	2
Gymnocladus dioica	41
Juniperus virginiana	14
Liquidambar styraciflua	11
Liriodendron tulipifera	16
Nyssa sylvatica	9
Platanus occidentalis	260
Quercus alba	4
Quercus bicolor	5
Quercus borealis	25
Quercus coccinea	2
Quercus lyrata	4
Quercus macrocarpa	39
Quercus muehlenbergii	8
Quercus palustris	23
Quercus shumardii	25
Salix nigra	65
Staphylea trifolia	6
Viburnum prunifolium	9
Viburnum rufidulum	9
	652

	Crew Hours	Volunteer Hours	
Nettelroth	1034	14	1048

Activity summary for **Shawnee:**

1. 2006: Greenhaven Tree Care, Inc. removed invasive species from the upper river bank terrace in Shawnee Park. They also removed some dead and diseased trees to make room for planting.
2. 2007: Greenhaven Tree Care, Inc. continued their work on invasive tree and shrub removal. Louisville Olmsted Parks Conservancy (LOPC) staff also contributed to this removal effort.
3. 2008: LOPC planted 500 shrubs (refer to table below for list of species) on the cleared upper terrace of the Ohio River Bank in an effort to stabilize the slope and prevent soil loss to the river.
4. There have been no particular challenges with this project.

The Louisville residents that use this park will benefit from this work in several ways:

1. The original vista to the river has been restored by removal of some invasive trees species such as Tree of Heaven and White Mulberry and removal of the invasive shrub Bush Honeysuckle.
2. The process for restoring native species that once flourished along the river banks is initiated thanks to funds from this grant.
3. The upper terrace of the river bank is being stabilized by these and other plantings reducing the amount of soil loss to the river.

Purpose: Stabilization of the upper terrace of the Ohio River channel in Shawnee Park.

Grant Amount:		**$32,067.00**
Greenhaven Tree Care, Inc. - 2006	($10,000.00)	
Greenhaven Tree Care, Inc. - 2007	($10,000.00)

Appendix G -4 – Assessing the Effect of Urbanization on Riparioan Functions – University of Louisville

Interim Report to Metropolitan Sewer District
Supplemental Environmental Program Requirements
Consent Decree Civil Action No 3:05 CV-236-5
December 11, 2008

Prepared by
Professor Margaret Carreiro
Department of Biology
University of Louisville

Assessing the Effect of Urbanization on Riparian Functions

Background Riparian zones function in several ways to improve the quality of water entering streams from non-point surface run-off and from ground water flow paths. In forested catchments where streambank height is low, riparian soils are regularly inundated, and hence often wet and anaerobic. Therefore in such riparian areas, the microbial process of denitrification occurs at high rates and serves to remove nitrate (NO_3-) from groundwater by converting nitrate to N_2 or N_2O gases that move the nitrogen into the atmosphere. However, urbanization often raises streambank height due to high current flows in urban and suburban streams during storm events. This results in longer periods of drying for streambank soils in urban and suburban catchments, and this in turn should greatly reduce denitrification rates. Decreased denitrification rates would allow greater entry of nitrate from groundwater and surface run-off into streams, exacerbating eutrophication of receiving water bodies. The actual rates of denitrification in wet soils, however, would also depend on the concentration of dissolved organic carbon (DOC) in groundwater and surface run-off, since DOC fuels denitrifier microbe activity. The amount of DOC could also vary with degree of urbanization in the catchment and with local site factors, like amount and type of vegetation in the riparian area. In addition, higher and drier streambanks interacting with the amount and kind of riparian vegetation may influence the rates of carbon dioxide (CO_2) and methane (CH_4) leaving the streambanks, and the production of these greenhouse gases could to some extent be influenced by DOC in groundwater as well.

The objectives for this study were to: **1)** measure the rates of greenhouse gas efflux (N_2O, CO_2 and CH_4) from riparian sites adjacent to streams draining catchments that vary in degree of impervious cover (degree of urbanization), **2)** measure the concentrations of nitrate and dissolved organic carbon (DOC) in groundwater adjacent to the same streams, and **3)** measure the depth to groundwater using piezometer wells, as a measure of how dry or wet the soil column would be in these riparian sites.

Accomplishments We received permission from landowners at 13 riparian locations distributed in different catchments in the Middle Fork of Beargrass Creek, Goose Creek and Harrods Creek in Jefferson and Oldham counties. The impervious cover in the catchments ranged from 1% to 42%. Urban catchments were defined as having >30% impervious cover, suburban from 10 to 29% cover, and rural from 1 to 9% cover. We established one piezometer well and two soil gas flux chambers at each of these riparian sites. Depth to groundwater was measured in the wells every two weeks from November 2007 to October 2008. Groundwater in

the wells was sampled for DOC once per month during that one-year interval. Nitrate in wells was measured once per month from November 2007 to February 2008 and from September to October 2008, but every two weeks from March to August 2008. The rate of efflux of CO_2 and CH_4 from riparian soils were measured in the chambers once per month from November 2007 to February 2008, but every two weeks thereafter until August 2008, followed by once per month intervals in September and October 2008. We encountered technical difficulties with measuring N_2O flux (explained below) and so only obtained robust data at two time points (August and October 2008), although we obtained samples for N_2O analysis in June and July 2008 as well.

Operating Problems We had initially intended to measure N_2O flux ourselves using a gas chromotograph (GC; SRI Inc., model# 8610) available to us in the Biology Department at the University of Louisville. The GC had been purchased in 2003 by a professor colleague who had left our department in 2005 for another position in Washington, D.C., and it had been used successfully by students in my lab for measuring CO_2 and CH_4. This colleague had also set up the GC to measure N_2O, and since I have been in frequent touch with this colleague following his departure, he was willing to assist with technical information for using the instrument for measuring N_2O. This was because the company that sold the GC was located in California and does not make site visits to trouble-shoot problems. After four months of difficulties trying to measure N_2O with this GC, which involved many phone calls with the GC company and even one visit to UofL by my colleague, it was determined that the Electron Capture Detector for measuring N_2O was faulty and beyond warranty. We could not replace the unit on this grant, because it cost approximately $6000 and our total working funds were approximately $11,000. I made the decision to search for a lab that would measure N_2O for us. No local labs in Louisville or Lexington were set up with an ECD for measuring N_2O. I inquired of colleagues throughout the nation and finally found one lab that was not only set up for this measurement, but would also contract with us to do the measurements. This was the lab of Professor William H. McDowell, Director, New Hampshire Water Resources Research Center (http://www.wrrc.unh.edu/) at the University of New Hampshire. We determined that we would have enough funds to sample and measure N_2O four times. Because gas samples had to be shipped to New Hampshire we determined that we had some sample leakage occurred from vials in our June and July 2008 sampling dates and will not use those data. We solved our leakage problems and did obtain robust N_2O data for the August and October 2008 sampling dates.

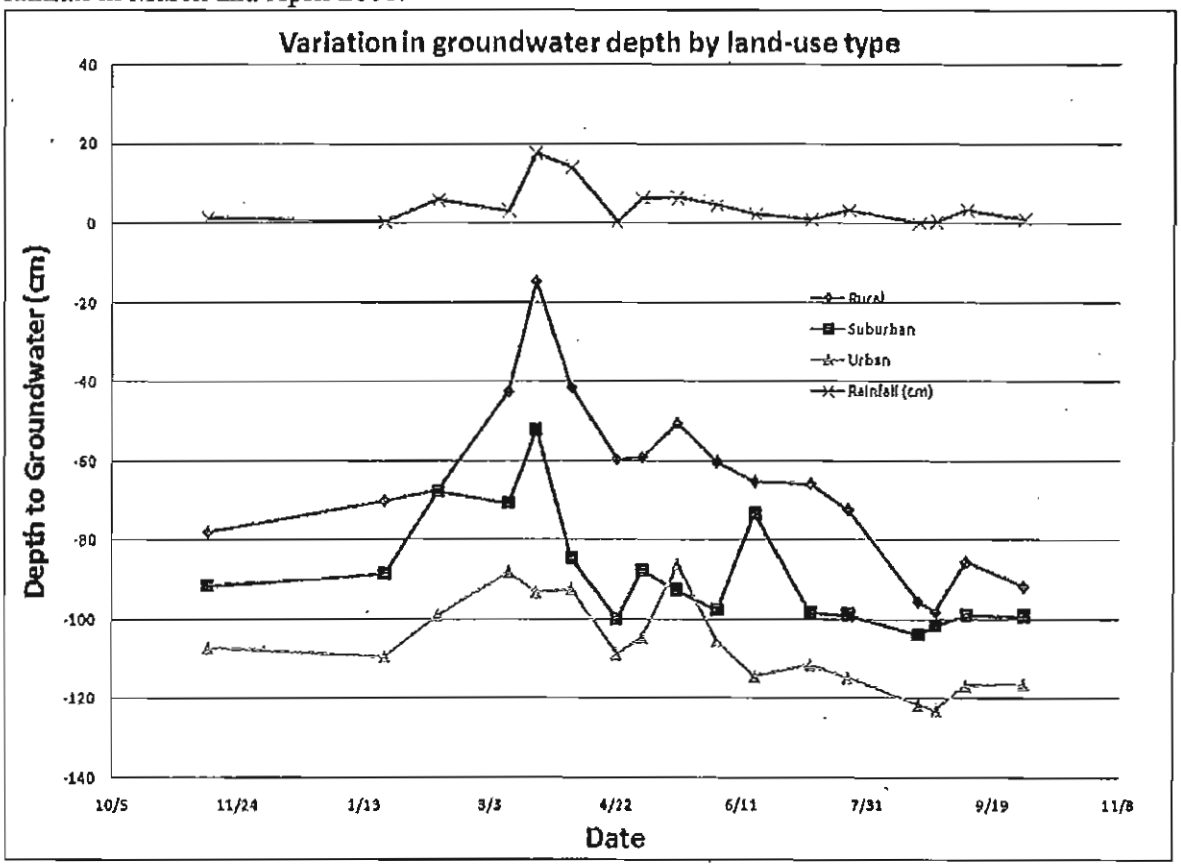
Budget The total grant amount from MSD was $15,000 with 26% going to F&A costs to the university. Most of the remaining $11,905 was used for supplies and a small amount (about $650) for travel to the sites. Supplies covered the costs for 28 gas chambers, a peristaltic pump to remove groundwater, replacement piezometer wells, and chemical analysis for nitrate, DOC, CH_4, CO_2 and N_2O.

Preliminary Results

Sampling was completed in late October 2008. Therefore, my graduate student and I have not completed data analyses of this time series. However, we can present some preliminary findings for some of the data.

Depth to Groundwater

Our initial hypothesis that depth to groundwater would on average be greater in urban riparian areas appears to hold true (Figure 1). Therefore, on average more of the soil column in urban streambanks would be drier (less saturated) over the year than those in suburban and rural sites. Depth to groundwater in the 5 urban sites remained deeper than 80 cm throughout the year and progressively declined down to 120 cm as the dry spell in our area worsened from mid-July through October. Depth to groundwater for the four suburban sites were intermediate and ranged from a high of 50 cm to a low of 100 cm. On average the soils in the rural riparian sites were more saturated than those of suburban and urban sites, and ranged from a high of approximately 20 cm to groundwater to a low of 100 cm during the height of the summer dry spell. The shallowest depth to ground water across all sites occurred after a period of high rainfall in March and April 2008.



NO_3 and DOC concentrations in groundwater wells

Consistent urban, suburban and rural trends throughout the entire year are not apparent and data averaged by land use are presented in Tables 1 and 2. From November 2007 to April 2008, nitrate concentrations in urban groundwater were often two orders of magnitude higher than those in suburban and rural areas. However, from May to October 2008 rural nitrate concentrations were equivalent to or greater than those in urban groundwater. From July to October nitrate concentrations fell by one or two orders of magnitude from those measured from January to June. Interestingly, nitrate concentrations at the suburban sites were lowest of all and not as responsive to change over this one year interval. Land use and vegetation cover and

activity levels at scales smaller than that of the catchment will be examined for their potential to explain these variations in nitrate concentration.

Unlike nitrate concentrations, DOC concentrations neither varied greatly by land-use type nor over the one year period (Table 2).

Table 1. Mean ± 1 S.E. nitrate-nitrogen concentrations in riparian piezometer wells in catchments that vary by land-use type in Jefferson and Oldham counties.

	Nitrate - mg NO3-N/L (SE)

Greenhouse Gas Fluxes Since the annual sampling period just ended, we have not fully analyzed the data above and are compiling the gas flux data. More information on our findings will be reported to MSD by spring 2009.

Environmental benefits We will not only provide information on the amount and variation of nitrate and DOC concentrations in groundwater, but also estimates of the variation in the ability of riparian soils to remove these chemicals before they enter stream water. We will not only be analyzing the extent to which catchment scale factors may predict these riparian characteristics and processes, but also the extent to which more localized site factors may do so. If the analysis indicates that that some catchments with similar impervious surface can vary a great deal in depth to water table, nitrate concentration in groundwater and gas fluxes in riparian zones, it suggests that factors o *operating at scales that can be dealt with by riparian restoration projects*, might reduce problems caused at the larger catchment scale. Restoring or reducing negative impacts to riparian functioning could become part of assessment protocols for determining optimal riparian buffer ***widths*** depending on land-use type and impervious surface coverage in their respective catchments.

Subject: **Proposal for Consulting Services**
Grinstead/Lexington Road Riparian Buffer Project
Jefferson County, Kentucky
Redwing Proposal 08-031

Dear Ms Croce:

Per your request, Redwing Ecological Services, Inc. (Redwing) is pleased to submit this proposal to the Louisville/Jefferson County Metropolitan Sewer District (MSD) for consulting services in support of the Grinstead/Lexington Road Riparian Buffer project in Jefferson County, Kentucky. The study area includes an approximately one-acre basin adjacent to Middle Fork of Beargrass Creek located in the northwest quadrant of the intersection of Grinstead Drive and Lexington Road, adjacent to Jim Porter. The goal of these proposed services is to assess the existing detention and treatment potential of the existing basin, evaluate the feasibility of improving the basin's treatment efficiency for stormwater runoff, and provide recommendations for improving the basin's ability to handle, detain, and treat stormwater runoff through wetland and riparian restoration and enhancement activities.

PROPOSED SERVICES

The proposed services consist of an assessment task, the preparation of a Feasibility Report, and client meetings and coordination. The individual tasks associated with this proposal are outlined below.

Task 1 – Assessment of Existing Basin Capabilities: Under this task, Redwing will collect and analyze stormwater inputs, estimate pollutant loads entering and leaving the basin, and model hydrologic capabilities and treatment efficiency within the basin. This analysis will include: 1) modeling stormwater inputs to the basin; 2) determination of existing infiltration rates and detention capacity of the basin; 3) a topographic survey of the basin; and 4) water quality monitoring at two inlet and one outlet locations to identify pollutant loads entering and exiting the basin.

Stormwater Modeling – Modeling activities will include the analysis of stormwater inputs into the basin based on historical precipitation data for the area. Information will be obtained from MSD and LOJIC regarding the amount of surface water runoff directed into the basin through stormwater sewers in the area, and a stormwater runoff model will be used to determine the stormwater inputs to the basin for several storm events. We have budgeted a half-day visit in the field for two Redwing personnel to conduct a field survey and 16 hours to complete the stormwater modeling analysis.

Infiltration Rates and Detention Capacity – An analysis of soils will be performed in the field to identify the infiltration rate of the basin. A topographic survey of the basin will be performed and used to determine the existing detention capacity of the basin based on stormwater inputs and infiltration rates. The topographic survey will also be used to determine the potential detention capabilities for the basin. We have budgeted 20 hours to complete the field work and modeling analysis, in addition to the cost of the topographic survey.

Water Quality Monitoring – Water quality monitoring activities will be performed at two inlet and one outlet locations to identify existing pollutant loads entering and leaving the basin. Three wet weather sampling events will be performed and one duplicate sample will be taken. Samples will be taken as grab samples using sterile containers provided by Microbac Laboratories, Inc. The grab samples will be collected within three hours of a 0.1-inch storm event to capture the "first flush" of pollutants within the stormwater runoff. Each event will be conducted following a minimum of 72 hours of dry weather. The following tests will be run on the collected stormwater samples:

- Total phosphorus
- Total nitrogen, nitrate and nitrite
- Total suspended solids
- Oil and grease
- Ammonia nitrogen
- Fecal coliform

Immediately after grab samples have been taken, water quality field measurement parameters will be collected using a Hydrolab Quanta. These parameters include: temperature, pH, dissolved oxygen and conductivity. The collected water quality samples will be taken immediately to Microbac Laboratories, Inc. located on Gilmore Industrial Boulevard in Louisville for analysis. All samples will be analyzed according to standard lab procedures. Once the laboratory results are obtained, the stormwater input pollutant loads will be compared with the pollutant load in the

sample collected from the outlet of the basin. This comparison will assist in identifying the existing treatment capability of the basin.

We have budgeted ten hours for Redwing personnel to perform the water quality monitoring events, one hour for lab transport of samples per event, and eight hours for data analysis, as well as the fees associated with the lab analysis.

Task 2 – Plan Development: Redwing, in coordination with MSD and Spence Nursery, will prepare a Feasibility Report for the project. The report will contain a summary of the stormwater modeling and treatment efficiency of the basin, an analysis of the potential capacity of the basin, a discussion of the feasibility of utilizing the basin to treat stormwater, a list of recommendations for the restoration of the basin area, a conceptual design for the project and proposed planting plans for wetland treatment areas and riparian buffer restoration areas.

We have budgeted one, half-day field visit for two Redwing personnel, 60 hours (including professional, clerical, and drafting time) to complete the draft report for your review, and 12 hours to prepare the final document incorporating your comments.

Task 3 – Client Meetings: Under this task, Redwing will provide project coordination with MSD, Louisville Metro Parks and Spence Nursery. We have budgeted for one client meeting (two hours) for two Redwing personnel and one Spence Nursery personnel and one conference call with Spence Nursery (two hours).

Task 4 – Coordination: Under this task, Redwing will coordinate with Spence Nursery regarding planting plans and the utilization of wetland species for stormwater treatment within the basin. We have budgeted eight hours to complete this task in addition to 12 hours for Spence Nursery consultation.

DELIVERABLES

The deliverables in these Proposed Services include: 1) pre-monitoring water quality data, stormwater pollutant loads, treatment potential and detention capacity for the basin; 2) a Feasibility Report with recommendations, a conceptual design and planting plan; 3) client meetings, and 4) coordination with Spence Nursery through phone calls, email, and memos.

SCHEDULE

We can begin the assessment task within two weeks of our receipt and acceptance of your authorization to proceed. Water quality monitoring and the topographic survey will be dependent on weather conditions. We anticipate having the water quality monitoring and modeling done by May to June of 2008. We also anticipate submitting the draft Feasibility Report to you for review in June of 2008. We understand that this project is on a tight timeline and implementation activities need to be completed by August 31, 2008.

COSTS

The cost of the services for this proposal is $17,000 and includes:

Task 1 – Pre-Monitoring	$10,900
Task 2 – Plan Development	$6,400
Task 3 - Meetings	$1,100
Task 4 – Coordination	$1,500
Total	**$19,900**

Any additional services will be performed as discrete lump sum change orders, following specific written authorization by MSD. These additional services could include wetland delineation and agency permitting, project implementation, or additional client/public coordination.

AUTHORIZATION AND CONTRACTUAL CONDITIONS

These Proposed Services will be provided on a lump sum basis. MSD will be invoiced at the completion of discrete tasks, and invoices are payable upon receipt. To authorize us to proceed with the Proposed Services, please sign the attached Professional Services Agreement and return one original to Redwing.

We appreciate the opportunity to assist you on this important project, and look forward to working together as it proceeds. Please call Kiersten Fuchs or Brian O'Neill at (502) 625-3009 with any questions regarding this proposal or the overall project.

Sincerely,

Brian J. O'Neill

Attachment: Professional Services Agreement

PROFESSIONAL SERVICES AGREEMENT

PROJECT NAME: Grinstead/Lexington Road Riparian Buffer Project
LOCATION: Jefferson County, Kentucky

PROPOSAL NUMBER: Redwing Proposal 08-031
CLIENT: Louisville/Jefferson County Metropolitan Sewer District

1.0 SCOPE OF WORK. Redwing Ecological Services, Inc., through and by its officers, employees and subcontractors (hereinafter REDWING), is an independent consultant and agrees to provide CLIENT, for its sole benefit and exclusive use, professional consulting Services set forth in our proposal. No third party beneficiaries are intended by this Agreement.

2.0 STANDARD OF CARE. REDWING will perform its Services using that degree of skill and care ordinarily exercised by reputable members of its profession practicing in the same or similar locality at the time of Service. No other warranty, express or implied, is made or intended by our proposal or by our oral or written reports.

3.0 CLIENT'S RESPONSIBILITIES. CLIENT will provide REDWING with an accurate description of the Site where the Services are to be performed and will furnish REDWING with all available information (including the physical characteristics, legal limitations and utility limitations) at the Site. CLIENT will provide for or arrange for a right of entry to REDWING, its agents, staff, or subcontractors, for the purpose of performing and with the right to perform all soils, studies, and research including, without limitation, the making of tests and evaluations, pursuant to the agreed Services. Subject to applicable law, CLIENT will provide REDWING, its employees and subcontractors, reasonable access to the Site.

4.0 INSURANCE REQUIREMENTS. REDWING will maintain reasonable insurance coverages for general liability, auto, worker's compensation, and professional liability (E&O). Certificates will be provided upon request.

5.0 PROFESSIONAL LIABILITY. For additional consideration of $10.00, receipt of which is hereby acknowledged, CLIENT agrees that REDWING's liability to CLIENT or any third party due to any negligent professional acts, errors or omissions or breach of contract will be limited to an aggregate of $50,000 or the amount of the total fee, whichever is greater.

6.0 PAYMENT TERMS. REDWING shall submit invoices for approved Services to CLIENT upon completion of the Services, or on a two to four-week basis for longer projects. CLIENT agrees to pay Redwing's invoices upon their receipt. If payment is not received within thirty (30) days from the invoice date, CLIENT agrees to pay interest on the past due amount at the prevailing legal rate, plus a service charge, including reasonable attorney's fees, if collected through an attorney. If CLIENT objects to a portion of any invoice, CLIENT shall notify REDWING within ten (10) days from date of the invoice, give reasons for the objection, and pay that portion of the invoice not in dispute.

7.0 UNANTICIPATED CONDITIONS. Should REDWING encounter conditions at the Site where Services are being performed which were not reasonably anticipated and not previously revealed to REDWING in writing by the CLIENT, upon notice to CLIENT, REDWING at its sole discretion may: 1) continue with the Services to completion; 2) suspend activities and prepare a change order request for approval by CLIENT prior to proceeding, or 3) terminate all Services after five days' prior notice to CLIENT.

8.0 DOCUMENTS. REDWING will furnish CLIENT the agreed upon number of written reports and supporting documents. These are provided for CLIENT's exclusive internal use and reliance, use of CLIENT's counsel, use of CLIENT's qualified bidders, and for regulatory submittal in connection with the project or Services provided for in the Agreement. Any reuse on another project, or redistribution to third parties shall be at sole risk of CLIENT. There are no third party beneficiaries to this Agreement.

9.0 CONFIDENTIALITY. REDWING will maintain as confidential any documents or information provided by CLIENT and will not release, distribute or publish same to any third party without prior permission from CLIENT, unless compelled by law or order of a court or regulatory body of competent jurisdiction. Such release will occur only after prior notice to CLIENT.

10.0 SEVERABILITY. In the event any provision or part hereof shall be deemed invalid or unenforceable, the other provisions or parts hereof shall remain in full force and effect, and binding upon the parties hereto.

11.0 SURVIVAL. All obligations arising prior to the termination of this Agreement and all provisions of this Agreement allocating responsibility or liability between CLIENT and REDWING shall survive the completion of the Services and the termination of this Agreement.

12.0 GOVERNING LAW. This Agreement shall be governed in all respects by the laws of the state in which the Services are performed.

13.0 TERMINATION. This Agreement may be terminated by either party at will, or upon a failure of the other party to perform its obligations hereunder in accordance with the terms of this Agreement or in a good and workmanlike manner, upon giving thirty (30) days written notice of such termination. Upon termination of this Agreement, the Subcontractor shall be paid for services provided and not previously paid, but shall have not right to perform further services under this Agreement or to receive any compensation for services or material provided after the date of termination.

14.0 ENTIRE AGREEMENT. The Parties agree that the provisions of this Agreement shall control and govern over any form or preprinted writing signed by the Parties, such as Client Purchase Orders, Work Orders, etc., and that such forms may be issued by CLIENT to REDWING as a matter of convenience to the Parties without altering any of the terms or provisions hereof. This Agreement, the attached documents and those incorporated herein, constitute the entire Agreement between the Parties and cannot be changed except by a written instrument signed by both parties.

Appendix G – SEP Supporting Documents

Appendix G -6 – Farm Literacy Project at Oxmoor Farms August 2007 and Summary Sheet

August 29, 2007

Dear Ms. Croce,

Please accept this letter as a grant report for MSD's *Sustainable Landscapes* Supplemental Environmental Project with the Food Literacy Project at Oxmoor Farm.

Description of SEP As Implemented

Since the SEP began in June 2006, the Food Literacy Project has taken great strides towards reconnecting the Louisville community with the source of their food by facilitating farm experiences for young people. In addition to significant curriculum theme and activity developments (see attached Appendices), the Food Literacy Project's two programs—hands-on agricultural education on the farm, and technical assistance to urban farmers—have begun fully functioning, touching a total of over **1,000 young people since the SEP began.**

Throughout the 2006 growing season, the Food Literacy Project served public and private school groups, church groups, immigrant and refugee Girl Scout troops, the Kentucky Women in Agriculture group, the Collaborative Regional Alliance for Farmer Training, and the Community Catholic Center, an agency serving at-risk teenagers in Louisville's Portland neighborhood. In November of 2006 the Food Literacy Project **celebrated our first public school field trip to the farm,** delivering a program focusing on nutrition and edible plant parts to a special needs class from Chancey Elementary in Louisville.

Over the winter of 2006-07, the Food Literacy Project engaged in aggressive outreach and promotion of the program among diverse populations, including a series of classroom visits delivering a portable, indoor version of food and agriculture programming to elementary schools in the Jefferson County Public School district. Food Literacy Project staff developed this classroom workshop program and **visited 19 classrooms between January and March 2007, giving 553 students the experience of planting a seed, investigating earth worms, and playing the food web game.**

Teacher feedback from the classroom visits included comments such as:
"The most memorable thing about my classes' experience was the hands-on observation of worms."
"Everything was terrific! The content was engaging and supported the curriculum being taught."

Once the growing season got underway in the spring of 2007, groups began coming out to the farm for field trips. **A total of 661 students have visited the farm since the SEP began in June 2006.** Participant groups have included elementary, middle and high school students; inner-city community centers such as the Urban League and the Louisville Central Community Center; YouthBuild Louisville's E-Corps program participants; a Jewish day school celebrating earth day with a visit to the farm; a U of L anthropology class studying industrial vs. sustainable food systems; and a class of developmentally disabled elementary school students. **Eighty percent of the school-age children who visited the farm were from low-income families, and qualify for free or reduced lunch at their schools. Thanks to MSD funding, as of 2007 the Food Literacy Project has offered bus transportation to low-income participant groups whose visit would otherwise be prohibited.**

Students who visited the farm had lots of feedback and thanks to the Food Literacy Project for their experience:
"It smells like nature out here!"
"I really thank you for teaching me a lot about what I eat and where it comes from."

"I loved tasting new foods."
"My favorite part of the visit was when we got to plant a lima bean. My lima bean is growing in my room by my window."
"One thing I learned from your visit was that worms help plants, like turning waste into nutrients."
"I learned that Oxmoor Farm came before the mall because they needed it more than the mall."
"Our experience was overflowing with fun. I enjoyed learning where food comes from and where it was produced. When you asked us to pull up the weeds away from the potato plants I was really against that but then when I tried it, it was kind of fun. Thanks."

The Food Literacy Project's technical assistance program began in 2006 by working with two newly established city gardens: the **St. Peter Claver garden in the Smoketown neighborhood** (coordinated by ACTIVE Louisville), and the community garden at **Americana Community** Center **in Louisville's South end.** Both of these agencies requested on-site support from the Food Literacy Project during the 2006 season.

Food Literacy Project staff provided a consistent (bi-weekly) presence at the Americana Community Center garden from June through September 2006—including regular work project management, consultations, farmer "office hours," and educational programming for immigrant and refugee youth through Americana's after-school program. **Thirty-six families in south Louisville maintained a 9'x9' plot in the garden in 2006,** the majority of which are immigrant and refugee families. Food Literacy Project staff spent a total of **68 hours on the site assisting the gardeners**—many of whom were farmers in their countries of origin—in acclimating to Kentucky's climate and growing season, trouble-shooting, and adopting organic growing practices.

The St. Peter Claver garden's needs were more specialized. Food Literacy Project staff provided **hands-on educational programming at the garden site in Smoketown for a total of 90 children and teenagers in 2006.** In 2007, we have worked more deeply with smaller groups of young people in the garden, including most notably the 4th District Clean Team, a group of 10 neighborhood teenagers hired through the Presbyterian Community Center to do neighborhood improvement and beautification work. **Each week throughout the 2007 growing season, Food Literacy Project staff has guided the Clean Team through the process of growing food through games, lessons about sustainable agriculture, and practical work projects in the garden. Lessons and activities have focused on a variety of topics, including organic and sustainable agriculture, water and nutrient cycles, nutrition, and the basics of how plants grow.** A field trip to Oxmoor Farm complimented the Clean Team's experience in the garden by enabling the students to compare the scale and practices on an 8-acre working farm with that of their urban garden. Programming in the garden with the Clean Team will continue through the fall of 2007.

In 2007 the Food Literacy Project built on this work by developing a garden curriculum for use by neighborhood groups seeking to engage youth in the garden. This will help the St. Peter Claver garden, and other urban community gardens throughout Louisville, to make their community garden programs sustainable, orienting youth program staff to how to infuse the garden into their programming.

Finally, thanks to MSD SEP funding, the Food Literacy Project facilitated a **free three-hour professional development workshop for teachers** in April 2007, demonstrating for teachers strategies, including written lesson plans, for infusing their curricula with food and agriculture themes, and making the case for food-based environmental education.

Operating Problems and Solutions

Staffing the work has been a challenge for the Food Literacy Project since the beginning. As a startup organization starting from scratch, the FLP board and solo staff person had our work cut out for us. In 2006, FLP not only delivered experiential environmental programming on the farm to almost

300 youth, developed all our curriculum, materials and systems, and did the outreach work to recruit participants; the FLP board also formed itself, incorporated as a nonprofit organization, filed for tax-exempt status with the IRS, and hired an executive director. The Food Literacy Project's focus in the year 2007 has been aggressive programming that reaches many of the diverse populations within our city. With a small but highly hands-on board, a staff of one person, and a few committed volunteers, the organization has served over 1,000 youth in its short history. As we receive more requests for programming than we can accommodate, the ongoing challenge we face is how quickly to expand our young program. Our solution is to develop a short-term staffing plan for 2008 as well as longer-term strategic plan for the organization.

By December 2007 the Food Literacy Project will have a staffing plan for the 2008 season and a fundraising plan to support it. Meanwhile, in July 2007, the FLP board began a long-term strategic planning process, beginning with a full-day board retreat. Over the course of the fall of 2007, working groups within the board, together with the director, will develop a strategic plan—including program planning, fundraising, staffing, and public relations—that will guide our work over the next 3-5 years.

Environmental and Public Health Benefits

Food is the universal thread that connects all humans with the natural world. The Food Literacy Project uses a working farm to teach people about the connection and interdependence between humans and their environment. In a world where the average meal travels 1500 miles from farm to plate and the conventional farms where that meal started flush synthetic fertilizers and pesticides into streams and rivers, **the Food Literacy Project at Oxmoor Farm engages people in a new agriculture.**

By demonstrating the viability and positive impact of local, urban, and organic agriculture—while exposing young people to fresh fruits and vegetables while they are still in the ground—this program enables low-income youth and adults to develop a greater capacity to grow their own food. The Food Literacy Project uses an inquiry-based, experiential approach—meaning that participants plant seeds, taste fresh vegetables from the farm, and use all their senses to engage in farm activities—to **challenging both youth and adults to ask themselves what kind of food system they envision for our city.** By giving people the tools to create a new food system—**based on fossil fuel conservation, watershed protection, and making fresh, healthy food available to all residents in and around Louisville**—the Food Literacy Project promotes healthy eating habits while providing an example of humans in balance with nature.

The MSD *Sustainable Landscapes* SEP has been instrumental in laying the foundation for the Food Literacy Project's work, infusing our city with food and agricultural literacy. Thank you for making this work possible.

Sincerely,

Carol Gundersen

Carol Gundersen, Director
Food Literacy Project at Oxmoor Farm

MSD *Supplemental Environmental Project* Funds Committed, August 1, 2006-July 31, 2007

Expense	Amount
Program and Curriculum Development	$3,800
Free Elementary School Classroom Visits	$1,150
Scholarships for low-income program participants (including technical assistance)	$2,130
Free teacher professional development	$ 535
Program Personnel on Farm	$7,080
Telephone/Internet	$ 732
Site Development (Classroom, portable toilet)	$ 761
Materials (seeds, potting soil, tools, etc)	$1,707
Printing/Copying/Promotional Supplies	$ 234
Consultants and Training	$ 500
Mailing/Postage	$ 223
Insurance	$ 933
Program Participant Transportation	$4,000
IRS fee to file for 501(c)3 status	$ 750
Total SEP Expenses	**$24,535**

MSD *Supplemental Environmental Project* Report
Funds Spent, August 1, 2006-July 31, 2007

Expense	**Amount**
Program and Curriculum Development	$3,800
Free Elementary School Classroom Visits	$1,150
Scholarships for low-income program participants (including technical assistance)	$2,130
Free teacher professional development	$ 535
Program Personnel on Farm	$7,080
Telephone/Internet	$ 732
Program Site Development	$ 761
Materials (seeds, potting soil, tools, etc)	$1,707
Printing/Copying/Promotional Supplies	$ 234

The Food Literacy Project at Oxmoor Farm

MSD *Supplemental Environmental Project* Spending as of January, 2007

Full scholarships for low-income program participants	$ 929
Printed materials for curriculum and promotional materials	$ 114
Program Materials and Equipment	$ 653
Site Development	$ 326
Staff time for curriculum development and program facilitation	$2,532
Total SEP Funds Spent to Date	$4,554

Program Theme Selection and Activities

We want to make your group's experience at Oxmoor Farm as relevant to your group as possible. The following are program themes with examples of lessons that are part of a developing curriculum at Oxmoor Farm. Check off one theme of particular interest to your group; or, choose any combination of activities that you would like your group to experience, keeping in mind that each activity typically takes between 20 and 40 minutes. Indicate specific curricular guidelines at the bottom of the page. *Activities within each theme may vary based on time, weather, and resources available.*

☐ Organic Farming and Interdependence

Topics include sustainable and organic agriculture, plant growth and development, interdependence, and exploring the interrelationships between people, the natural world and our food system. Sample activities:

Activity	Core Content	Science Module
☐ Compost/worm exploration	(SC-EP-3.4.1 PL-3.1.04, SC-BP-3.4.4)	Animals 2x2, Structures of Life
☐ *The Magic Seed/Plant-a-seed	(SC-BP-3.4.1, SC-EP-3.4.4)	New Plants, Diversity of Life
☐ *Food web game	(SC-EP-4.6.1)	Insects, Food chains & Webs
☐ Garden scavenger hunt	(SC-EP-4.7.1, SC-04-4.7.2)	Insects, Food chains & Webs
☐ *Potato bug game	(SC-EP-4.7.1)	Insects, Food chains & Webs

☐ Food and Nutrition

This theme explores the 'what' and 'why' of our food choices. We will sample fresh foods from plants grown on the farm and learn how they help unlock our bodies' full potential. Sample activities include:

Activity	Core Content	Science Module
☐ Healthy food vs. junk food	(PL-1.4.1, PL-1.2.01, PL-1.3.1, PL-04-1.2.01)	
☐ *Six plant parts burrito (tasting tour)	(SC-EP-3.4.3)	New Plants, Structures of Life
☐ *Food and nutrition Who-am-I Game?	(PL-1.4.1, PL-1.2.01, PL-1.3.1, PL-04-1.2.01)	
☐ Trace-your-lunch/map our food system	(PL-3.1.1, PL-1.1.06, SC-04-4.7.2, PL-05-3.1.02)	Structures of Life
☐ Bake bread using the solar oven and make butter		
☐ Cooking or food prep with vegetables from the farm	**This activity requires at least three weeks advance notice, as it necessitates coordination with our partners in the Master Food Volunteer program to facilitate the activity.*	

☐ Plant structures

This theme addresses plant parts, adaptations, and classification, all within the context of food and farming.

Activity	Core Content	Science Module
☐ Six plant parts burritos (tasting tour)	(SC-EP-3.4.3)	New Plants, Structures of Life
☐ Three sisters garden	(SC-E-3.3.2, SC-E-3.1.3)	New Plants, Structures of Life
☐ *The Magic Seed/Plant-a-seed	(SC-EP-3.4.1, SC-BP-3.4.4)	New Plants, Structures of Life
☐ Edible Plant Parts Twister		
☐ *Plant classification (monocots & dicots)	(SC -E-3.1.3)	New Plants, Structures of Life

☐ Introduction to Food, Agriculture, and the Environment

Activity	Core Content	Science Module
☐ Tasting tour of the farm		New Plants, Animals 2x2
☐ Compost/worm box exploration	(SC-EP-3.4.1 PL-3.1.04, SC-EP-3.4.4)	Animals 2x2, Structures of Life
☐ *The Magic Seed & Plant-a-seed	(SC-EP-3.4.1, SC-BP-3.4.4)	New Plants, Structures of Life
☐ *Service learning/work project		

*teacher-led activities. (Teacher-led activities are written up for you, but due to our small staff, we may ask that you facilitate the activity with each small group).

Note: Activities and themes can be tailored based on group's interest. If you do not see relevant activities or core content here, please indicate what you would like your group to get out of their experience, so we can develop a program that will best compliment your group's interests: _____

December 16, 2008

Phyllis Croce
Landscape Restoration Specialist
Metropolitan Sewer District
700 West Liberty Street
Louisville, KY 40203-1911

Dear Ms. Croce,

Please find enclosed our report needed for the EPA regarding our rain garden project, made possible by the funding support from Louisville MSD.

On behalf of Americana Community Center, I want to express my deep appreciation for the opportunity that was made possible by this funding. This was truly one of the most exciting projects at the Center and it was a pleasure to watch the construction progress over the summer. We are glad to do a small part to reduce our impact on the environment by decreasing the amount of storm water entering the city's sewers.

What makes this rain garden truly special is that it was built by a work crew of refugee and immigrant youth from all around the world. Over the course of the summer, eight youth originally from Bosnia, Croatia, the Congo, Haiti, Liberia and Somalia were working side by side with the Garden Manager and learning valuable job skills from the experience.

Thank you again for this opportunity and please do not hesitate to contact me with any questions.

Sincerely,

Edgardo Mansilla, Executive Director

Americana Community Center – Rain Garden Project
Report to Metropolitan Sewer District
December 2008

i) Description of SEP as Implemented

The rain garden at the Americana Community Center has been implemented to channel rain water from the roof of our gym into our garden and has been successful in reducing our storm water runoff. The idea for this project came after the copper downspouts from the exterior wall of the building were stolen, causing large amounts of water to fall down the side of the building directly adjacent to the foundation. Initially, a rain garden was designed and installed to capture rainwater from the gym roof before it flows into the storm drain. Plants used in the rain garden are wildflowers and grasses provided by Dropseed Nursery. These native plants soak up the water and will also create a more permeable soil in time. In addition, an 800 gallon water tank, purchased from National Tank Outlet, was installed to store water for the garden in periods of drought and provide sustainable irrigation for areas around the community center.

Equipment for pre and post-flow monitoring was purchased to quantify the amount of water the rain garden absorbs. Using an excel spreadsheet and the measured dimensions of the roof a table was formed to calculate pre-flow monitoring of water diverted into the garden and the tank during rainfall events. Post flow monitoring is conducted using a Lt Levelogger Junior and its software package made by Solinst Canada LTD. This instrument measures changes in barometric pressure in order to extrapolate the volume of water surrounding the meter and the amount of time in which water flows out of the drain.

The physical work necessary to complete the project was provided by a work crew of eight teenage immigrant and refugee youth who are youth program participants at Americana Community Center. These youth represent six different countries from around the world. All participants completed 25 volunteer hours before they were eligible to earn stipends of seven dollars an hour. Their ages ranged from 14-17 and the efficiency was exceptional.

Project Oversight was conducted by Will Pierzala, former ACC Garden Manager. His efforts included designing the garden, consulting with experienced service providers, and training the youth work crew in safety and fundamental landscaping and construction techniques. Isaiah Wiles, Garden Manager, is continuing this work.

ii) Operating Problems

Written by Will Pierzala in the beginning of August:
The design of the garden had to be modified to avoid excavating over an existing gas line. The people who we communicated with at LG&E gave differing opinions about whether or not we could excavate over the lines.

After planting in the end of June, it is apparent one month later that some plants are not suited to be immersed in water. This seems to be most evident with the Joe Pye Weed (Eupatorium). We are considering now replacing the eupatorium with a more wetland suited species such as Juncus.

It was somewhat of an obstacle to motivate the youth crew when the work became monotonous. Often taking time to explain the bigger picture of why we were doing the work and what kind of recognition we would get helped keep them focused.

One other potential problem is that water will pool up on the sidewalk directly below the rain garden. This is the fault of whoever installed the gas line that runs to the building. The new section of sidewalk is below the grade of the old one. I think the rain garden contributes very little to this.

Update from Isaiah Wiles:
The rain garden has worked well with few problems. It is rare that it rains so hard and quickly that the garden cannot soak up the water. This being the case, it is rare for the water filtering through the garden to reach the drain that channels it back into the sewer. The problem we have encountered mostly lies in the measurement of data. We have a device called a Levelogger that measures the pressure exerted upon it at any given minute. This device is located adjacent to the drain, yet on the other side of the fence that catches the water and holds it in the garden until it reaches capacity. However, to get any accurate information from this device, we need accurate barometric pressures minute by minute for the times of the rain to calibrate the amount of water pressing on the device and discover how much water we are actually saving the city.

iv) Certification that the SEP has been fully implemented

Please see attached pictures, newsletter, and press clippings. The link below is to a story done by WHAS 11 on the grand opening of the rain garden on 08/06/08.

http://www.whas11.com/news/local/stories/whas11_localnews_080806_RainGarden.1e83c783.html

I certify that this project has been completed and the money spent.

Signed: _____ Date: 12-17-08

Edgardo Mansilla, Executive Director

v) Description of the environmental and public health benefits resulting from the implementation of the SEP

The rain garden does its job in preventing rain water from entering the city's sewers where it could contribute to excess sewage run-off, creating environmental and health dangers. It collects the water, instead of pushing it into the sewer. This helps concentrate the sewage that requires treatment and may help to avoid contamination of local waterways. It also collects water, instead of forcing it into the streets, where it could become a safety hazard for children around the community and those in cars driving by. The rain garden has provided reintroduction for native plants into the area and has benefited the soil, as well as curbed invasive weeds species growth in the area. It has raised awareness on the issues at hand by the newly arrived refugee and immigrant communities living in the area, as well as for the U.S. born residents in the area. The rain garden provides spiritual health in its aesthetic position around the Center, as well as by creating a peaceful place for people to come.

Additionally, the students and families involved in the project are now better equipped to discuss and implement environmental change from the bottom up. The crew of eight youth workers has affirmed that they are aware of the environmental benefits of this project, and would be able to recreate a similar project elsewhere. They have also been infused with a healthy dose of entrepreneurship by learning marketable skills useful in a niche market such as

environmental reclamation and landscape restoration. They have learned to work as a team, and what it means to have responsibilities which will make them more competitive in future endeavors. As stated in our original request for funds, the solution to the environmental crisis must be initiated by people from both sides of the poverty line and across the entire spectrum of ethnicities.

"Rain garden" unveiled at Americana Community Center

03:12 PM EDT on Wednesday, August 6, 2008

WHAS11 coverage

(WHAS11) -One group of young people is showing their support for the community. Students in the "cultivating our future" youth program at the Americana Community Center unveiled a huge project they've been working on called a rain garden.

When the community center lost its copper drainage pipes due to theft, they turned a problem into a solution for the entire community. They couldn't afford new drainage, so they used the run-off rainwater from the gym's roof to build a "rain garden." It uses rainwater to sustain a community garden, preventing gallons of rainwater from going into the sewage system.

One inch of rainwater on the gym's roof can save 4,000 gallons of rainwater from sewage.

Watch this story

The project was possible through a grant from Louisville MSD, the Anthonian Foundation and Operation Brightside. But garden manager Will Pierzala says it wouldn't have happened at all without the help of six teenagers who worked on the garden from the ground up.

"At times you write off the youth of today," he says. "But the truth is, this group of students worked hard and soaked it up really well."

The six young men are from all over the world. None were born in the United States. They represented countries like Haiti, Congo, Ivory Coast, Liberia, Tanzania, Croatia and Bosnia.

"We're like a family here, all working together," says John Karnwie, a 14-year-old from Liberia. "I never imagined this could come together like this."

FOX41 WDRB LOUISVILLE

Americana Community Center unveils new rain garden

The Americana Community Center is doing its part to improve the health of our local waterways. Wednesday the center unveiled its new rain garden.

It's designed to soak up runoff from the roof of the gym. The project reduces the amount of water that would have to be treated at the sewage treatment plant.

Garden Manager Will Pierzala explains, "What happens is instead of the water going directly from the roof into the sewer department storm drains, it gets diverted out into the garden, which, one, takes time before it gets back into the drain and, two, it soaks up a whole lot of that water before it goes back into the sewer where it can be a problem."

The project was built by students who use the center. It took about eight weeks to complete.

Recent News:

- The Family Health Center Americana celebrated its one year anniversary in September.
- In addition to the new rain garden, the community garden was expanded to double its original size thanks to funding from Operation Brightside.
- Americana will soon be offering immigration counseling services.

On August 6th, 2008, Americana Community Center was proud to celebrate the opening of our brand new rain garden, an exciting project that took place this summer. Construction of the garden began in early June, and was completed at the end of July.

What is a rain garden? Rain gardens help capture storm water runoff before it reaches the storm drains. Designed with shallow level bottoms, rain gardens soak up runoff and filter out pollutants. By diverting storm water into rain gardens from our roofs or driveways, we improve the health of our local waterways and create beautiful gardens which sustain biodiversity (Louisville MSD). Americana's rain garden, located next to the community garden, accepts the storm water runoff from our gym roof instead of sending it into the sewers.

What makes this garden truly special is that it was built by a work crew of refugee and immigrant youth who have been consistently attending Americana Community Center's youth programs since their arrival in Louisville. They were all excited to have a summer job and see their hard work pay off upon completion. Under the supervision of Will Pierzala, Garden Manager, the work crew consisted of eight teenage youth representing six different countries, including Somalia, Liberia, the Congo, Bosnia, Haiti, and Croatia. This is a part of the "Cultivating our Future" Initiative, which works with youth age 14 and up to develop job skills with a focus on gardening and landscaping.

A view of Americana's new rain garden on opening day.

This project was made a reality in thanks to funding support from the **Metropolitan Sewer District (MSD) of Louisville**, the **Anthonian Association**, and **Operation Brightside.**

We would like to say a special thank you to Will Pierzala, former ACC Garden Manager and Youth Program Staff for his work toward this project. Will recently moved to Virginia to further his education.

Above: A group picture of the work crew on opening day, with supervisor Will Pierzala.
Left: A view of the garden after the first big rain.

Top: Family Education celebration at Iroquois Park for the end of the school year.

Bottom: Over the summer, families participating in the program took a field trip to the zoo.

Family Education Expansion

Americana Community Center's Family Education program has gone through some exciting new changes recently and will continue to transform in the future. The evening program has expanded from two to three nights per week which enables the parents and children to focus more intensely not only on learning English, but also on other important skills that will help to ensure their family's success. The evening program takes place Tuesday through Thursday from 6:30pm to 8:00pm.

Additionally, Family Education recently added a morning program in the beginning of October which will allow those families who are unable to attend in the evening to have another option to participate. The morning sessions take place Monday through Thursday from 9:30am to 11:30am. The morning program focuses on those families with children from ages 3-5. It will serve to not only help prepare the children for school, but also to help the parents understand the developmental stages that their children are going through, all while practicing their English language skills.

Another recent expansion of the Family Education program is the monthly Family Night. These Family Nights take place the first Thursday of every month. The first two focused on School Readiness and Stress Management. Both were a success and allowed the parents to speak to experts in the fields that were being discussed. Upcoming topics will include behavior management, financial literacy, driving and insurance, safety, and more.

Wellness Information Zone Launch

The launch of the Wellness Information Zone, located on the first floor lobby of the Americana Community Center.

On August 29, 2008 Americana Community Center hosted a launch for the newly installed Wellness Information Zone.

The Wellness Information Zone (WZ) project aims to provide health information in everyday language to members in the community. The project was developed by the Humana Foundation in partnership with Libraries for the Future. The project's primary goal is to increase health literacy in local communities. The project consists of three components: health information centers, health information guides, and an informational website, wellzone.org. Americana will host the WZ Center and provide trained Health Information Guides to assist users. This will benefit the Center in several ways. Americana plans to incorporate the WZ Center into many of its programs including Family Education, ESL Classes, and various computer workshops, one of which will focus on wellzone.org navigation. The WZ Center will also offer extra support to the services provided by the Family Health Center-Americana located on Americana's campus.

This project will help to provide access to reliable health information that is easy to understand, and the information is available in multiple languages. Funding support for this project is also provided by the Gheens Foundation as a part of the Bridges to Tomorrow Initiative.

The mission of VISTA: To start, strengthen, or expand programs, systems or services that help people move out of poverty.

Americorps* VISTA

Under the South Louisville VISTA project, Americana Community Center, Arcadia Community Center, Adelante Hispanic Achievers, and South Louisville Community Ministries are partnering together and each organization has at least one full-time VISTA working to build capacity for the organization in order to work toward the mission of VISTA which is to help people move out of poverty. Americana has two year-long VISTAs who recently joined us: Francesca Pribble and Carey McCoy.

Summer Program 2008

138 youth from 18 different countries were registered in our summer program, which was held for eight weeks in June and July. The program ran Monday through Thursday and included a morning ESL program in partnership with JCPS, Kids Café which provided lunch in partnership with Dare to Care and South Louisville Community Ministries, and an afternoon "summer fun" program, run by ACC staff, interns and five AmeriCorps VISTA Summer Associates. The afternoon included a variety of educational and enrichment activities, including art and recreation opportunities and field trips to the pool, the movies and roller skating.

In the afternoon, the youth were split up by age and gender and spent an hour each day in the classroom participating in structured educational activities and reading time. As a part of the "Right to Read" program, each classroom picked a book to read together book club style such as "Charlotte's Web", and multiple copies were borrowed from the public library.

Two special opportunities this summer included a soccer camp in partnership with Cabbage Patch Settlement House and Louisville Collegiate and an overnight camping trip in partnership with Boy Scouts. 12 youth from ACC and 13 from Cabbage Patch participated in a week-long soccer camp. The morning was dedicated to soccer at Cherokee Park and in the afternoon a variety of fun activities. On the final day, a tournament was held. 4 teams played, all mixed between Americana and Cabbage Patch players. ACC staff Sara Renn and intern Justin Roush assisted with the camp, as well as Abdikadir Mohamed, an ACC youth program participant who plays soccer for Waggener High School.

Eight youth went on an overnight camping trip at Tunnel Mill Boy Scout Camp, which they earned through attending weekly Boy Scout meetings during the summer program and participating in the activities. This was their first experience camping in this way. They learned about setting up a campsite, fishing, gathering firewood and starting a campfire. Three ACC staff and interns and one Boy Scouts leader accompanied the boys on their first camping trip.

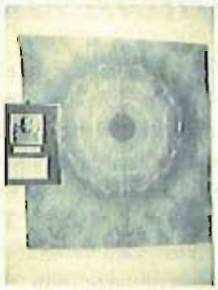
Eight summer program participants went on an overnight camping trip with Boy Scouts. Pictured above is the group catching their only fish and completing an obstacle course.

The youth enjoyed field trips to the pool as a part of the summer program.

Weaving Art and Literacy

The women of the Americana Fiberworks program had their artwork on display at the Iroquois Library throughout the month of September. A reception was held on September 9th.

The art exhibit, titled "Weaving Art and Literacy", is accompanied by statements from the artists and photographs of the women. A quilt representing images of International Women's Day is also on display. The quilt was crafted by the Fiberworks women and volunteers utilizing quilting squares that were designed during the International Women's Day celebration held at Americana Community Center in April.



Americana Fiberworks is a program which uses the art process to encourage international women to develop essential life skills as they adjust to life in the U.S.

The quilt crafted by Americana Fiberworks for International Women's Day, on display at Iroquois Library.

GOVERNMENT: STATE SENATOR PERRY CLARK, MAYOR JERRY ABRAMSON, COUNCILMAN DAN JOHNSON, CONGRESSMAN JOHN YARMUTH, LOUISVILLE METRO GOVERNMENT: METRO HUMAN SERVICES, OFFICE FOR YOUTH DEVELOPMENT, OPERATION BRIGHTSIDE, LOUISVILLE METRO SEWER DEPARTMENT

ORGANIZATIONS: ADHAWKS ADVERTISING AND PUBLIC RELATIONS, AL DIA EN AMERICA, AT&T FOUNDATION, BROADWAY BAPTIST CHURCH, BROWN-FORMAN CORPORATION, CITIZENS UNION BANK, CHURCHILL DOWNS, CHURCH OF THE EPIPHANY, DUPONT MANUAL HIGH SCHOOL KEY CLUB, ERNST AND YOUNG, GE CONSUMER & INDUSTRIAL, GIRARD'S HARDWARE, JEFFERSON COUNTY TEACHER'S ASSOCIATION, LIMBWALKER TREE SERVICES, INC., METRO UNITED WAY, OWEN FUNERAL HOME, PHELP'S HARDWARE, PNC BANK, ST. WILLIAMS CHURCH, STAPLES, SUBWAY, TARC, TOYOTO MOTOR MANUFACTURING KENTUCKY, VALUMARKET

WORLD FESTIVAL SPONSORS: COCO'S BAKERY, E.ON U.S., FAMILY HEALTH CENTERS, INC., FIFTH THIRD BANK, KINGSTON PARK APARTMENTS, NATIONAL CITY BANK, PASSPORT HEALTH PLAN, STS MARY & ELIZABETH HOSPITAL, SITTIES & HARBISON, TARC, UNIVERSITY OF LOUISVILLE HOSPITAL, UPS, VALUMARKET, WHITTENBURG CONSTRUCTION

PROGRAM PARTNERS: JEFFERSON COUNTY PUBLIC SCHOOLS: ESL K-12 AND ADULT AND CONTINUING EDUCATION (JCPSACE), NATIONAL CENTER FOR FAMILY LITERACY, GIRL SCOUTS, BOY SCOUTS, DARE TO CARE, KID'S CAFÉ, SOUTH LOUISVILLE COMMUNITY MINISTRIES, KENTUCKY REFUGEE MINISTRIES, EVERY1 READS, EDUCATIONAL RESOURCES, AMERICORPS VISTA, LOUISVILLE AMERICORPS, U OF L KENT SCHOOL OF SOCIAL WORK, SPALDING UNIVERSITY, HISPANIC LATINO COALITION, ARTIST GREGORY ACKER, LOUISVILE VISUAL ARTS ASSOCIATION, SANKOFA DRUMMERS, ADELANTE HISPANIC ACHIEVERS, ARCADIA COMMUNITY CENTER, CATHOLIC CHARITIES, JEWISH FAMILY AND VOCATIONAL SERVICES, LOUISVILLE FREE PUBLIC LIBRARY--IROQUOIS BRANCH, YMCA, BICYLCING FOR LOUISVILLE, LOUISVILLE ASSET BUILDING COALITION, LOUISVILLE POLICE DEPARTMENT COMMUNITY RELATIONS DIVISION-4TH DISTRICT, AND ALL THOSE WHO SUPPORT THE CENTER'S EFFORTS!

Americana's Mission:
We are a non-profit 501-C3 organization which seeks to provide a spectrum of services for the many diverse residents of South Louisville and the surrounding area. This enables people to discover and utilize resources to build strong families, create a safe, supportive community and realize their individual potential.

Americana World Festival

The 18th annual Americana World Festival was held on Saturday June 7th, 2008, on the grounds of Americana Community Center for the second year and it was a success! The festival included all day music and entertainment from around the world, international food, a children's area, exhibits, and information booths.

Thanks to everyone who helped make this year's festival a success, including sponsors, vendors, participants, entertainers, volunteers, and of course everyone who was in attendance. Join us next year on Saturday June 6, 2009.

Entertainment from around the world: Burundi drummers (top left); Bosnian dancers (bottom left), Flamenco dancers (above)

Appendix G – SEP Supporting Documents

Appendix G-8 – Food Literacy Project Outdoor Classrom Curriculum

December 10, 2008

Dear Ms. Croce,

Please accept this letter as a grant report for MSD's *Sustainable Landscapes* Supplemental Environmental Project with the Food Literacy Project at Oxmoor Farm.

Description of SEP As Implemented

This SEP supported the Food Literacy Project in achieving two critical goals in 2008:

1. To develop our outdoor classroom, deepening students' experience on the farm and demonstrating city gardens using storm water for vegetable plants
2. To create a scholarship program, exposing low-income urban young people to new foods in our outdoor classroom, giving them the opportunity to taste, touch, smell, hear and observe life on the farm, and to participate in the pleasures and rewards of farming

Thanks to the MSD grant, the Food Literacy Project now has a shaded meeting space in our Youth Learning Garden. For the first time, therefore, we have permanent infrastructure on our program site, demonstrating a sustainable approach to storm water management and urban agriculture. This shade pavilion will impact Food Literacy Project participants for years to come. In October of 2008, YouthBuild Louisville constructed an open-air shade pavilion with slanted roof and rain barrels to collect storm water. This sustainable irrigation system and meeting space greatly enhances our outdoor classroom, and will advance the Food Literacy Project's vision to set an example of humans in balance with nature.

The SEP also contributed over $5,000 to the Food Literacy Project's overall Scholarship Program of $8,577 (with matching funds from the Mayor's Healthy Hometown Movement). The Scholarship Program builds a base of program support and participants by offering need-based scholarships to Title 1 schools in the Jefferson County Public School system, including transportation and program fees for an experiential education program on the farm. Our pre- and post-visit curriculum, which includes an in-school visit from FLP staff before the farm field trip, accompanies and reinforces the farm program. Food Literacy Project staff specifically targeted the public schools in the Jefferson County Public School district with the highest percentage of students qualifying for free or reduced lunch. As of December 2008, three elementary schools have participated—Hazelwood, Roosevelt-Perry, and Breckenridge-Franklin—meaning that 154 students have gotten their hands dirty and tasted new foods on the farm at no charge; 300 more will participate in the spring of 2009. The scholarship program approach, including pre- and post-visit curriculum and program evaluation methods, were field-tested with Kennedy Elementary in October of 2008; Kennedy students and faculty were instrumental in helping the Food Literacy Project refine the content of our Scholarship Program before offering it to Title I schools.

The scholarship program consists of three elements: a pre-visit experience in the classroom (as described in more detail below) including pre-visit curriculum, a hands-on experience on the farm, and post-visit curriculum for after the field trip.

Operating Problems and Solutions

The SEP helped the Food Literacy Project to solve one key problem that we have faced since inception: the sensory overload students often experience on the farm, due to their lack of exposure to open, green space and the natural world. Thanks to SEP funding from MSD, every student participating in our scholarship program on the farm experienced an in-class visit from Food Literacy Project staff the week before their trip to the farm. During the 1-hour visit per classroom, FLP staff administered a pre-visit test for program evaluation, and facilitated several activities to help build excitement and prepare students for their experience on the farm:

- Asking students to share any previous experience with farming, gardening, or growing food
- Showing slide photographs of the farm fields, farmers working, and other students participating in Food Literacy Project activities
- Facilitating The Magic Seed activity, in which students dissect a soaked lima bean seed, and discover the embryo inside
- Introducing the sensory graphic organizer for use with a kinesthetic exercise where students imagine that they are part of the farm, then record their observations from the perspective of that plant or animal (see enclosed graphic organizer)

The impact of this pre-visit experience exceeded expectations. Students arrived on the farm with a much clearer sense of what to expect, and were excited to meet the farmers, plant seeds, taste vegetables, get their hands dirty, and engage in a learn-by-discovery way with the work of the farm. Before even arriving on the farm, students understood that they were going to be visiting a working farm, where farmers grow vegetables for people in Louisville to eat. They were already connecting that the food they eat must come from a farm somewhere too, and wondering whether the farm that grows their food is like Oxmoor or different.

Itemized Costs

Item	Funds Committed
$10 per student program fee	$2,450
Pre- and post-visit curriculum, including in-class visits before the field trip	$1,472
Transportation to the farm	$750
Program Materials, including building materials for outdoor classroom and storm water irrigation system	$1,328
Labor for outdoor classroom development	In-kind donation from YouthBuild
Total Project Cost	$6,000

Environmental and Public Health Benefits

The Food Literacy Project's effort to measure the impact of the scholarship program on students yielded noteworthy results. Our Scholarship Program evaluation, demonstrates that the

pre-visit classroom experience and farm field trip increases students' knowledge and attitudes about food and farming; furthermore, it reinforces life science concepts from their classroom studies, and prepares them for testing in the spring. For example, 92% of students reported an increased understanding of food webs and food chains after their experience on the farm.

The scholarship program changed the way students perceive food and farming, as well as giving them experiences in the natural world that they have not had before. Seventy-seven percent of the students participating in the Scholarship Program reported tasting a vegetable fresh from the garden for the first time in their lives. There was a 35% increase in the number of students recognizing all the parts of a plant that people eat, and a 22% increase in students' knowledge of how and why worms are important to farmers.

Many students demonstrated an increased understanding of the work of farming. The number of students recognizing that farmers grow our food increased by 40% after the farm field trip. There was a 32% increase in the number of students recognizing that all vegetables grow in the ground.

Seventy-nine percent of students indicated that they would like to have fresh vegetables from Oxmoor Farm available in their school cafeteria, suggesting that students who participate in growing vegetables are more open to eating them.

Feedback from school personnel was also positive. 100% of adults evaluating the Scholarship Program indicated that the activities on the farm met curriculum needs, were well balanced and well presented, and students enjoyed them and learned from them. They also commented that the farm was very conducive to students learning by exploring. One school administrator whose students participated said,

> *"The teachers came back yesterday raving about your wonderful field trip. Mrs. Adkins said it was fabulous and that it was totally full of core content for the kids. Thank you so much for inviting our school to visit your farm! They had a wonderful time."*

Meanwhile, after their experience on the farm, 81% of students reported a desire to grow vegetables, while only 30% indicated that they have access to a vegetable garden. These data suggest that there is much more work for the Food Literacy Project to do to meet the need for Louisville youth to participate in growing food.

The MSD SEP has been instrumental in laying the foundation for the Food Literacy Project's work, encouraging Louisville youth to consider the impacts that their food choices have on the health of their bodies, their communities, and the earth. Thank you for making this work possible.

Sincerely,

Carol Gundersen

Carol Gundersen
Executive Director

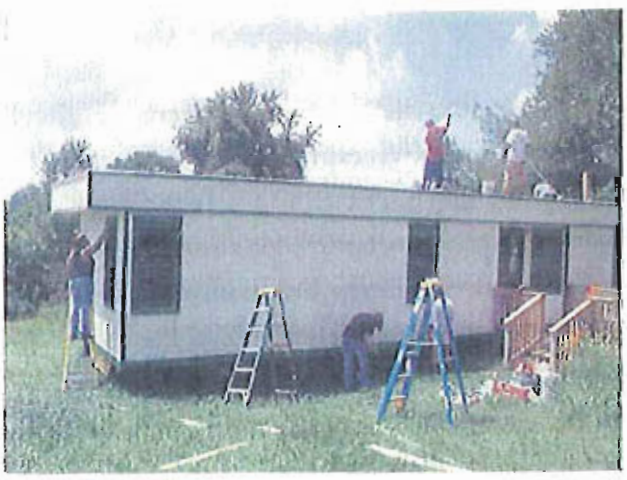
"Using what the earth gives us at the right time and not overusing anything helps me appreciate what we do have."

The Food Literacy Project at Oxmoor Farm

Fall 2008 Newsletter

The Food Literacy Project's mission is to inspire Louisville residents to make food choices that sustain their bodies, their communities and the earth through educational programs and technical assistance offered in partnership with a local vegetable farm.

YouthBuild and MSD Help Develop FLP's Facility



YouthBuild Louisville, a non-profit job skills training and education organization, has generously donated their labor to make two significant facility additions at the farm. Youth Build completed rehab and beautification work on the exterior of our office trailer this spring and summer: constructing front and back decks with stairs, painting the siding and trim, sealing the roof and insulating the floor.

The YouthBuild crew returned to the farm this fall to construct our outdoor classroom, complete with rain barrels. Funding for the classroom's building materials was provided by a grant from Metropolitan Sewer District (MSD). Our outdoor classroom provides a wonderful space adjacent to our Youth Learning Garden. It will allow us to have a covered area to work with students as well as demonstrate the benefits of collecting rain water for use in the garden.

Thank you to Phyllis Croce at MSD for your support, and to YouthBuild for all your hard work!! We invite everyone to come out to the farm to see their fine craftsmanship.

Food Literacy Project Recognized for Excellence in Nourishing Kids and Community!

"I wish my mom would buy me this food!"

"The worms were awesome."

"The most memorable thing I experienced at the farm was picking the carrots, looking at the cabbage, and eating leaves."

For its outstanding efforts in fighting hunger through providing children with lasting education in agriculture, health and the environment, the Food Literacy Project was one of 25 organizations—and the only one in Kentucky—to receive a Victory Against Hunger Award from the Congressional Hunger Center. This $1,000 award will provide a full scholarship for a class to participate in our program, including transportation to the farm and pre- and post-visit curriculum.

"I am proud of the Food Literacy Project's accomplishments in reconnecting Louisville youth with food and farming," said Congressman John Yarmuth. "Their work provides Louisville youth with a unique opportunity to connect with healthy food and engage minds, bodies, and stomachs in a new experience that effectively promotes healthier choices and connects them with their community and environment."

Help magnify the impact of this award!

You can invest in your local community and the future of agricultural education by giving one student, a group of students, or a whole class the opportunity to get their hands dirty and taste new foods on the farm. Your tax-deductible donation ensures that the farm will remain a community resource. For more information about the Food Literacy Project's plans for the future, and how you can help make them a reality, visit http://www.foodliteracyproject.org/VolunteerDonate.html, email carol@foodliteracyproject.org, or call (502) 491-0072.

Casey "Kohlrabi" Bids Farewell to the Farm and Louisville

It is with much sadness that I leave the staff of the Food Literacy Project as Associate Director. It has been a wonderful experience to work alongside Carol, Ivor and the farm crew to bring our much-needed educational program to Louisville youth. It has been a tremendous learning experience to see the students move outside the classroom environment to learn more about the source of their food. I thank all of the FLP volunteers – Board members, teachers and donors - who make our program excellent. They set the standard of what it means to be engaged in positive change in our community and world!

— *Casey Sterk*, October 2008

Staff Positions Open at FLP

The Food Literacy Project will be filling staff positions over the next few months. If you are interested in applying or know someone who might be, please check our website for details: www.foodliteracyproject.org

We have a new phone number

The Food Literacy Project staff and volunteers can now be reached at (502) 491-0072. Please make a note of the change.

An interview with Beth "Broccoli" Brokaw

I first met Beth Brokaw at a health fair, a few days after she had retired from a 33-year public school teaching career. At the time, Beth said that she had met a lot of students who had no idea where their food came from, and that she would like to share her love of gardening with children by volunteering on the farm. Since then, Beth "Broccoli" has become one of our most regular volunteer teachers on the farm; without her, the Food Literacy Project would not be where it is today.

—*Carol Gundersen*

Beth facilitates as students demonstrate the interdependence of plants, animals and people by creating a food web and exploring how humans affect the environment.

What keeps you coming back to volunteer?

Volunteering on the farm connects two of my greatest loves--working with kids and working with plants. As a classroom teacher I was always academics oriented, and the push to cover curriculum sometimes interfered with having fun. Now that I am volunteering on the farm, I am always having fun with kids, and no lesson plans or papers to grade! Another bonus is that I get to be outdoors and not cooped up in a stuffy classroom.

What do you find most rewarding about the work?

It's most rewarding when a child gets an "aha" moment. For example, when they smell an herb for the first time and connect it with a food that they eat. It's always great to know that you may be presenting something that they have never experience before, like touching a worm.

Do you have a favorite quote or story from working with students on the farm?

My favorite quote was after we had been talking about our farm names--Leah Zucchini, Judy Tomato, Beth Broccoli. Then we took a walk past the okra field and a kid said "Okra Winfrey."

What is your favorite vegetable and why is it your favorite?

Broccoli, of course. I love it because it's good steamed, in my favorite salad, and in broccoli cheese soup. Not only that, but it grows great in my own garden.

Thanks to Beth Broccoli for her tireless commitment to our work! If you would like to become a volunteer teacher on the farm, please call (502) 491-0072 or email info@foodliteracyproject.org.

Thanks to our friends and supporters

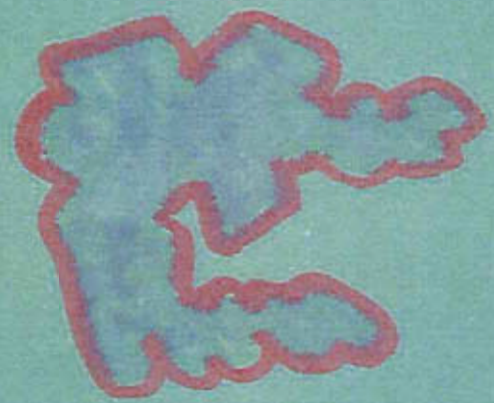
Thank Oxmoor Farm you guys
Rock! My favorite thing at the
Oxmoor farm was walking around
Eating Fruit. Thank You for
Everything You did for Roosevelt
Berry

Love,
Latyia
Nalor

Thank You



Oxmoor

Farm!

By: LaTyia Major

Dear Oxmoor farm,
Thank you for letting
us come to your wonderful
farm and letting us come again.
We all loved it. My 2 favorite
Parts was when we made
doe for bread and when the
chickens got up close to us.
I don't think my friend
liked the chicken part
because tey walked up
to him and pecked him. Think
you for teaching us
about all of the things
things about farm life. See you coming
again sometime. Love, Alexis

Dear Teachers,

We are very excited about your upcoming trip to our farm! We have many hands-on activities prepared to enhance your students' understanding of the complexities and inter-relatedness of the farming environment. We also know that 4th grade students have a very important writing portfolio due this year. To assist students in recording their experiences in writing, at the end of their day at the farm, students will be able to choose from one of several graphic organizers to capture the day in words. The graphic organizers are designed to promote poetry writing upon their return to school. To benefit from the graphic organizers, prior to the trip to the farm, it would be beneficial for students to participate in a variety of pre-writing poetry exercises. Please examine the packet provided, and try some of the exercises in each of the areas of personification, metaphors and similes. There are also samples of poetry to supply any needed inspiration.

All lessons, worksheets, and sample poems are from *Painting the Sky* by Shelley Tucker, GoodYearBooks, 1995.

PERSONIFICATION:

Honest Potatoes worksheet
Trucks Giggle worksheet
Stars Speak work.
Voice of the Wind worksheet.

Sample poems using Personification:

My Friends
I am the ocean,
Salty and swirling.
My cousins are the rivers,
the seas, and the lakes.
When I don't have company,
I wave at the sky
because I know
moon or sun will wave back. - Nicholas Quint, age 10

Sky and Sun
A forest sings to the sky.
The day whispers as it goes by.
A flower brags to a weed
And earth beckons to a seed.
The rainbow says goodbye to day
And night comes out to play. - Caroline Tucker, age 11

Voice of Dawn
The voice of dawn
whispered as it crept
Through the blackness,
Its silvery voice
Breaking the shadows. - Erica Fairchild, age 11

Arms of Clouds
Arms of clouds
seem to wrap around the stars.
Night spies on you
as you walk moonless
in the dark. - Hilarie Milligan, age 8

Listen
Voice of the river
roars in triumph.
Tongue of the ocean
laps up boats.
Breath of the wind
smells like salt.
Ears of the sea
listen to the animals. - Kellen Rack, age 9

Pickles
Pickles like to gossip with their friends
In pickle barrels
Rubbing shoulders
Bumping hips
Bobbing in the waves.
They talk excitedly all at once
Happy and safe in their life preservers,
Slurring, glurring, gulping
Giggling, wiggling, jiggling
In their vinegar sea. - Katie Chalfant, adult

METAPHORS AND SIMILES

I am worksheet
Night Falls Like Leaves worksheet
Laughter is as Old as the Sea worksheet (emotions in similes)
Fast as Popcorn worksheet (verbs in similes)

Kangaroo Sea
When I was eight years old,
I sailed on a kangaroo sea.
It was stormy
and tides whipped through the air like tails.
Sometimes, the waves rose 25 feet
and held in their pouches
driftwood, seaweed, and conch shells,
the treasures of the sea. - Shelley Tucker

Snow Leopard Winter
Snow leopard winter
creeps along the mountainside.
It is quiet, cold, and gray.
Rocks peek out like black spots.
Snow leopard winter lives alone. - Emily Grosenick, age 7

Rain
Rain falls like crystals
in magic puddles
on glaciers
standing tall on the earth. - Briana Aspini, age 11

Laughter
Laughter is a box of peanuts
and the song of purple.
Laughter is shaped like an oval
and dreams about feelings.
Laughter is a dance of friends
and the season of spring.
Laughter sounds like a bird
and carries a pocket of seasons. - Maiya Exum, age 9

Please let us know if we can be of further assistance.

Name _____ Date _____

Honest Potatoes

Give a Thing a Personality

First, choose an object, a color, or an emotion. Then, answer the following questions about it. Be sure to write in complete sentences.

Example: 1. I am a potato.
2. I live in the earth and stay warm with a thick, brown blanket.

Start with the words, "I am," shown above, or begin sentences with the name of the object:

Example: Potatoes live in the earth with their families.
Honest potatoes work in underground banks.

1. What are you?_____

_____

2. Where do you live?_____

_____

3. What are your favorite colors?_____

_____

4. What clothes do you like to wear?_____

_____

5. What is your job?_____

_____

6. Who are your family and friends?_____

_____

7. Where do you go on vacation?_____

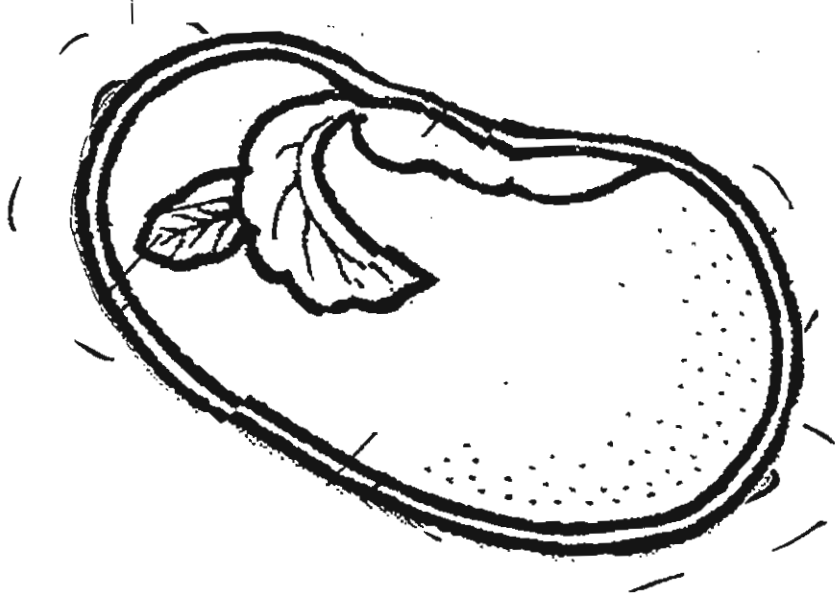
_____

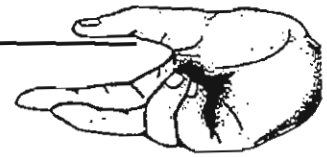
8. What is your favorite holiday?_____

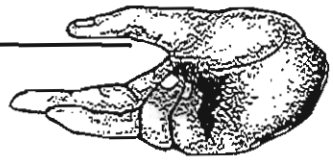
_____

9. How do you move?_____

If I were a Seed, I'd....

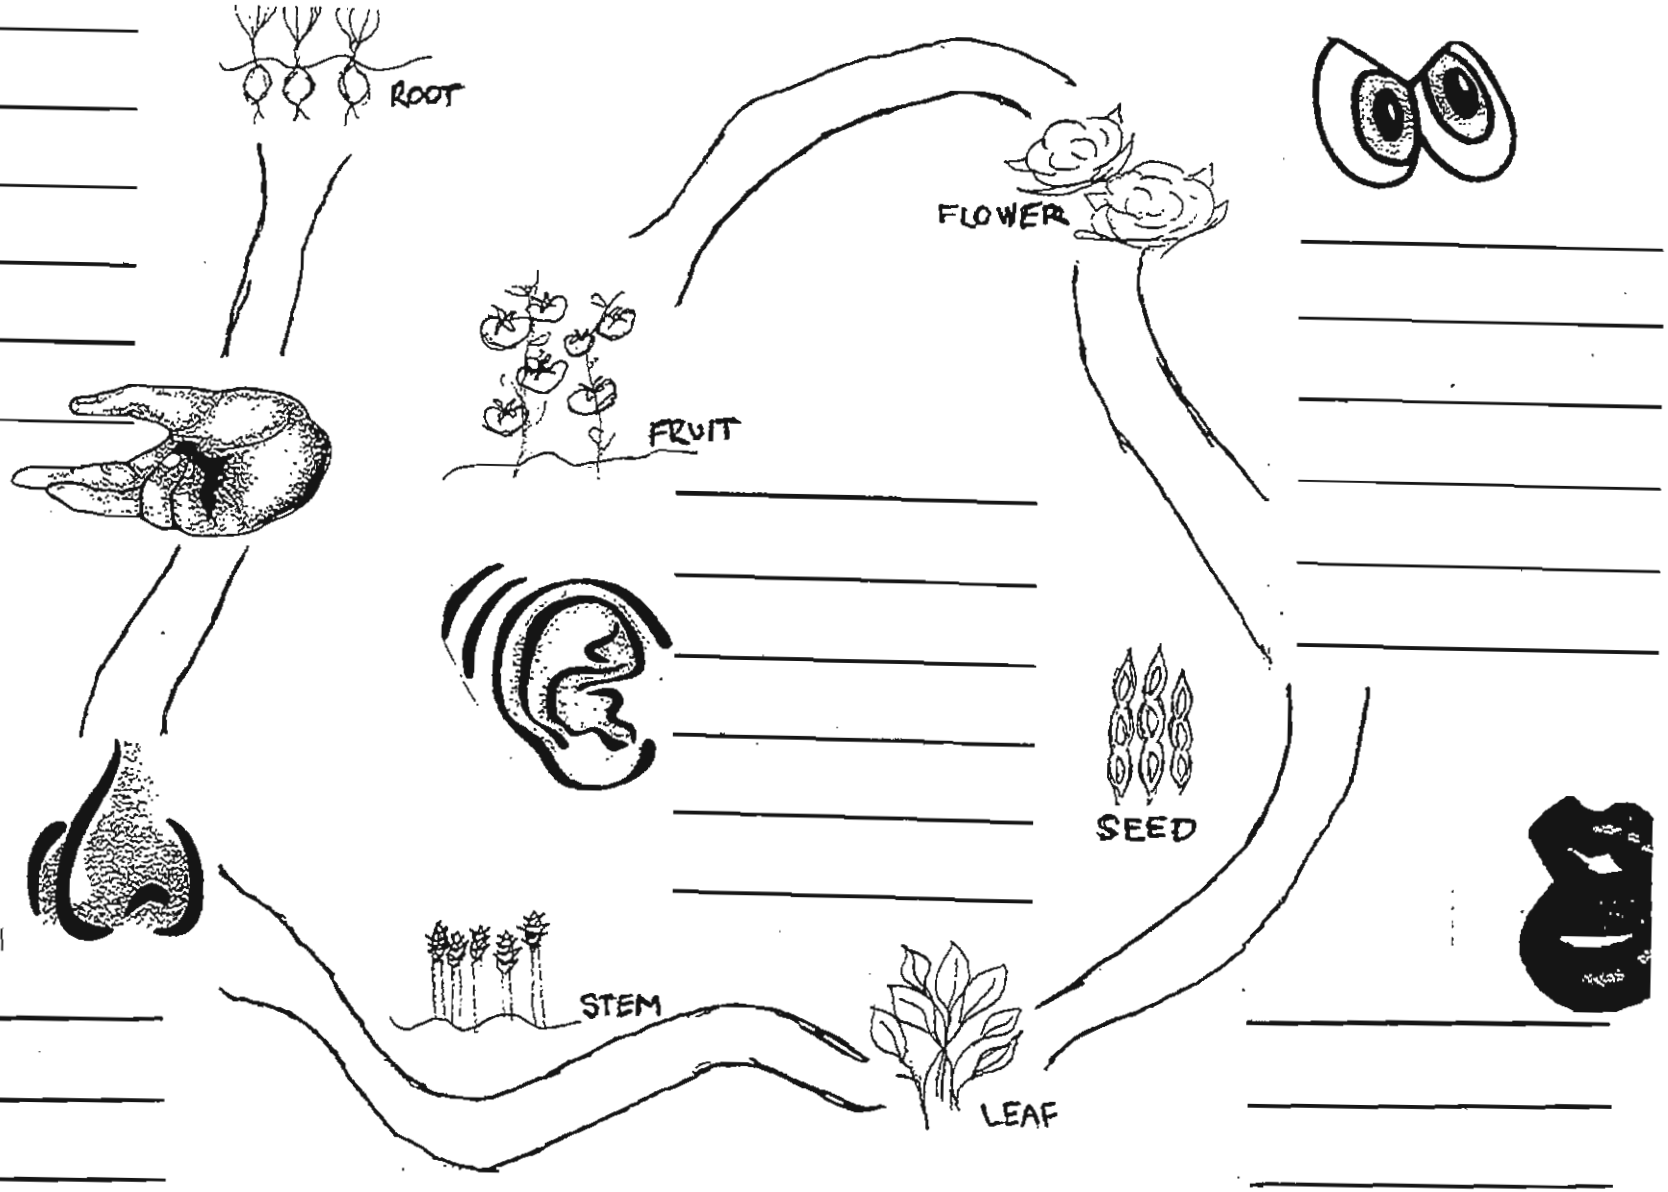






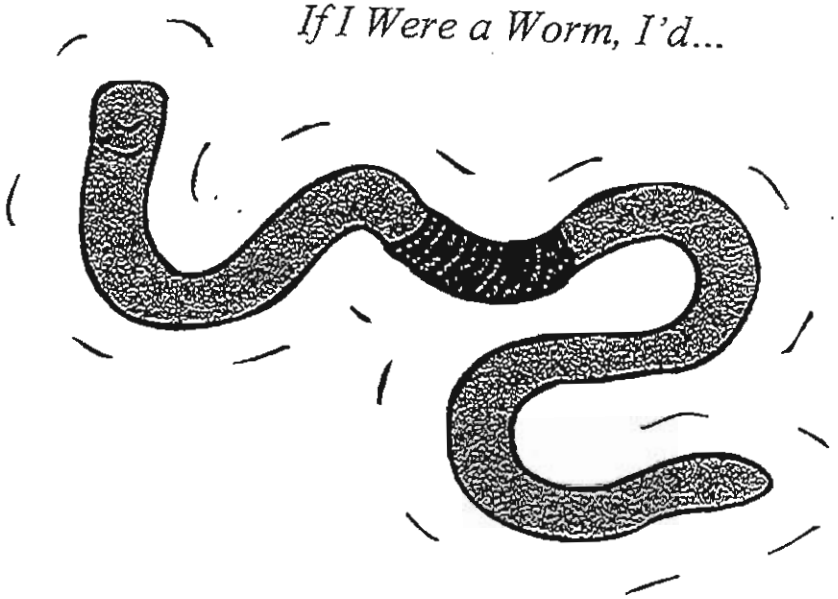
In the Food Web I'd be _____

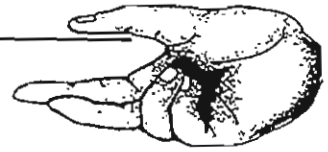
and I'd...



On the Tasting Tour I'd be a _____ *and I'd...*

If I Were a Worm, I'd...





I would ...

I would ...

If I were

a farmer

I would ...

I would...

I Am a Watermelon

Push, Push, Push
Farmer shoves my seeds
in his chilly, damp garden
hoping for me to grow
Big, Big, Big!!!

Slurp, slurp, slurp
sipping drops of water
bursting out my seed coat
root shooting deep
Down, down, down.

Boost, boost, boost
I shift my way to the top
growing huge
peaking out to meet the sun
HOT, HOT, HOT!

H
C
T
E

STRETCH, STRETCH, STR
my wrinkled leaflets
unfold to receive the sun's light
Photosynthesis
Food, food, food

Bloom, bloom, bloom
Petals stretching
Bees buzzing
Coming to pollinate me
Buzz, buzz, buzz

Now, now, now
I am fully grown
Like the rest of my friends
Bigger than a beach ball
Huge, huge, huge

Ouch, ouch, ouch
Snap! Goes my stem
Help! I get yanked from the stem
Hurting, hurting, hurting

Dark, dark, dark
farmer slams the trunk shut
hiding my sunlight
my lifeline
Scared, scared, scared

Sliced, sliced, sliced
Chopped into pieces
Plopped on a plate
For a picnic
Juicy, juicy, juicy

Munch, munch, munch
Sweet, luscious juice runs down the chin
child gathers seeds from my pink inside
Pick, pick, pick

Push, Push, Push
child shoves my seeds
in his chilly, damp garden
hoping for me to grow
Big, Big, Big!!!

The cycle starts again!

Lynn Rippy, Executive Director

YouthBuild Louisville

December 19, 2008

Phyllis Croce
MSD
Louisville, KY 40203

Dear Phyllis,

Please find attached a copy of the summer E-Corps report. We are so happy to have had the opportunity to partner with MSD again this year. Your SEP commitment of $4,000 went a long way to making our summer program a reality.

I think you will agree after reading the report that the investment was well worthwhile. It is great working with you.

Have a great holiday.

Sincerely,

Lynn Rippy, Executive Director
YouthBuild Louisville

Summary of E-Corps Summer Launch
Funded through SEP funds from Metropolitan Sewer District
Written 9/11/08

MSD's continued financial and resource investment in YouthBuild Louisville's Summer E-Corp program enabled our 2008 program to serve more youth and expand our projects this summer. The summer 2008 E-Corp crew was comprised of 8 young adults from the community, 3 interns from the Office of Youth Development, and 5 students from Liberty High School. We also hosted 38 Middle School Mission's volunteers from a total of 5 states. Mike Mudd directed the summer program and Brad Nations, Maria Bartschi, and Johnny Brinkworth worked as crew leaders. The program was 8 weeks long, Monday-Thursday 8:30-4pm and Friday 8:30-12, with a week vacation from June 30-July 4.

Students rotated among various projects throughout the 8 weeks to gain experience in a variety of work. In 2007, students were assigned to one crew (i.e., garden crew, construction crew, Food Literacy Project crew) and remained with that crew for the duration of the program. In the end of program evaluations, many students expressed a wish to learn different skills or switch crews, thus the 2008 students rotating among projects. All students worked retrofitting rain barrels, constructing trails, weeding and maintaining outdoor classrooms, removing invasive species, constructing gardens, picking up litter, landscaping and groundskeeping.

Over the course of the 8 week program, the students and volunteers finished a trail in the Jefferson Memorial Forest, retrofitted 60 rain barrels, and mulched over 160 trees at downtown school. A number of the students worked at Waterfront Park for the 4th of July Festival collecting recycling during the two evening concerts. Students and volunteers prepared, watered, planted, weeded, maintained and removed invasive species from 6 outdoors classrooms at Farnsley and Lassiter Middle Schools and J-Town, Kennedy Montessori, Foster Traditional, and Stonestreet Elementary Schools.

Additionally, they installed a rain garden at Stonestreet Elementary. One student described how work challenges became personal challenges for her, and then personal triumphs once she had achieved her goals. All the students appreciated the positive attitudes and genuine teamwork the group displayed.

This Summer's E-Corps program also had the opportunity to continue past partnerships and develop a number of new ones with organizations in the Louisville Metro community. Past partnerships with MSD and Dropseed Nursery continued with students maintaining the native plant landscaping at the downtown office. Students also learned about job opportunities with MSD. At St. Peter Claver Community Center students finished the final pieces of the walkway constructed last summer; at the Falls of the Ohio they collected litter, removed driftwood from the fossil beds, and visited the museum; for Jefferson County Public Schools they maintained outdoor classrooms as described above, and at Jefferson Community and Technical College they did groundskeeping work. New partners developed with students collecting litter and building trails with Metro Parks at Jefferson Memorial Forest, touring Louisville Water Company and creating test plots for native grasses that the Water Company will use in future landscaping and recommend for private residence lawn coverings, weeding and cleaning up the landscaping at the Muhammad Ali Center, and removing invasive species and mulching at Waverly Park.

In addition to the environmental work projects, guest speakers taught educational workshops with the students. Donna Michaels from the Jefferson County Extension Service taught proper planting techniques, plant care, and soil testing and care. Larry Hilton and Carl Suk from Jefferson Memorial Forest taught students proper pruning techniques, trail maintenance, trail building and proper, safe use of a Dingo and various hand tools. Phyllis Croce from MSD and Margaret Shea from Dropseed Nursery taught students about native plants and invasive species. Connie Farmer from the Falls

of the Ohio taught students about the history of the Falls of the Ohio. John Hilliard at the Muhammad Ali Center trained the students in landscape maintenance and led them in a service project to clean up the landscaping around the building. Marsha Meyer from the Louisville Water Company took the students on a tour of the facility and taught them about water purification and water sources for the city

Media exposure.

What operating problems did the program have?

A minor operating problem was that some program tools need to be repaired and sharpened. A more important consideration for future summer programs is the need to make more connections with teachers, faculty, students and parents at the schools with outdoor classrooms. The E-Corps students leave with a greater sense of the impact of their work when they are able to form relationships with the people they are working for. Also, there is a smoother transition of maintenance and greater likelihood the outdoor classrooms will continue to be well maintained if the people responsible for maintenance during the year have at least some involvement during the summer. Teacher involvement led to a particularly special situation at Lassiter Middle School. The principal there has been very involved with all the Summer E-Corps students' work, this year and last, and this summer, he reconnected with a youth he had met and mentored years prior but had since lost contact with. The principal was then able to write a letter of recommendation for the student to join the same fraternity of which the principal had been a member when he was in college.

For the Summer E-Corps in 2009, the 2008 crew would like to see more construction projects, more trail work, train to use more machines, work with outdoor classrooms at high schools, and plant more. It would also be beneficial to look into a lunch program YouthBuild could partner with, as many of the students come from low-income families and it was difficult for them to bring lunches everyday.

The efforts of the Summer E-Corps crew of 2008 have made a visible impact on the environment and the health of our community. The environmental effects of this program are readily apparent – all of the summer projects were devoted to environmental improvement. The 160+ new trees on downtown schoolyards that the E-Corps crew tended through mulching and watering will cool the schoolyards and surrounding areas by providing extra shade and soaking up the reflected urban heat, beautify the neighborhoods, and clean up the air by sequestering 2,080-5,600 lbs of carbon dioxide per year as they grow. This expanded urban tree canopy will improve public health for the school children and surrounding neighborhood residents for generations to come. The 6 outdoor classrooms maintained will impact over 3,000 students this year alone by enriching their educational experience with the opportunity to learn about and participate in environmental stewardship.

Considering an average rainfall of 42.8 inches per year, the 60 rain barrels the students retrofitted will divert as much as 17,000 gallons of water from the sewer system each year. This water can then be used to water plants and lawns, further saving water. The downtown landscaping maintained at the MSD offices, the Muhammad Ali Center, and the JCTCS campus provides permeable surfaces for rainwater to replenish to the ground water system.

Then, of course, there are the benefits to the 16 students, which they will be carrying back to their families and friends. They spent a summer forming good habits of physical exercise and labor, learning about environmental issues and stewardship, and training to become environmental leaders in their community. The Summer E-Corps program afforded these 16 young adults unique training, educational and work experiences, contact with numerous local business and organizations within the community, exposure to a range of job opportunities, time to meet at get to know a

diverse group of youth and instructors, a new understanding of our city by seeing so many different parts of it, and the chance to make a lasting impact Louisville

Summary of Impact (Numerical)

RE: Quarterly Report – Environmental Education SEP – More Kids in the Woods

Ms. Croce,

With this letter I am reporting on the status of the $4,000 in funds that MSD provided to Metro Parks in support of our More Kids in the Woods Grant with U.S. Forest Service. This grant was initiated in early September of 2008 and runs through the end of the school year in May 2009. As part of this grant we are exposing 200 4th grade students from three urban schools in west Louisville to multiple experiences in nature.

As of December 22nd, we have not spent any funds from this account, however have invoices totaling approximately $2,000 (for teachers stipends) that will be paid by the end of January. The remainder of the funding will be spent on grant expenditures dated prior to May 30th, 2009.

Sincerely,

Bennett Knox, Parks Administrator

CHECK REQUEST

AMOUNT $ 5000 VENDOR# _____

TAX ID# on file, Metro Parks. SS# _____

PAYABLE TO: Metro Parks ~~Attention: Bennett Knox~~

Send to: Jefferson Memorial Forest Attention: Bennett Knox

ADDRESS: 11311 Mitchell Hill Rd. PO Box 467, Fairdale KY 40118

DESCRIPTION: This program is a local one based on national effort to get elementary students outside using local parks for environmental education. This money would go to permanent use-usable materials - sleeping bags, binoculars, field journals. MSD is also providing staff time.

ACCT/CENTER/WBS/ORDER# J06130000 56203

REQUESTED BY: [signature] DATE 7/14/08

APPROVED BY: [signature] DATE 7/18/08

INSTRUCTIONS

Check Request may be used by any department to authorize a check to be issued by the Accounting Department for payment of non-routine procurements which are not supported by an invoice, subscription form, or other vendor documents which would substantiate the payment thereof. In addition, these services are not normally acquired through the Purchasing Department. Examples of these type transactions are as follows:

Travel Advances Registration Fees Easement Acquisitions Refunds

Subscriptions Court Settlements Professional Dues Deposits

For those transactions where no original vendor prepared document exists, the Check Request must be supported by some other document that describes the expenditure. Transmittal letters, unexecuted court orders and easement agreements, memorandums, and other similar r documents may be used.

Check Requests must be approved in accordance with MSD's Pre-Procurement Approval Procedures, except that the Purchasing Manager's approval is not needed. When approved, the Check Request must be routed to Accounts Payable. After the check is prepared, it will be forwarded to the Office Services Department for mailing, or if requested, returned to the requestor.

Louisville Metro Parks is a nationally accredited parks and recreation agency.

Forest Service and Partners commit $2.0 million to spark children's curiosity of our nation's forests and grasslands...

Forest Service Chief Gail Kimbell announced 16 new national recipients of its More Kids in the Woods funding. By awarding $500,000 for a second year the U.S. Forest Service continues its commitment to help children begin to investigate and understand the benefits of our nation's forests and grasslands. The Forest Service contribution plus matching funds and services from partners will top $2 million. Partners in these projects represent schools, environmental and youth non-profit organizations, Native American Tribes, and other federal, state and local governments.

Continuing America's conservation legacy into the future will depend on people who care about the natural wealth and the clean air, clean water and other ecological services forests and grasslands provide to America. The Forest Service funding for More Kids in the Woods projects will help children be better prepared in the future to care for the land as they cope with climate change, demographic change, and demands for clean air, clean water and healthy wildlife habitats.

News Release:

NEWS RELEASE

USDA Forest Service
Washington, D.C.

Release No. 0805 **Contact:** Press Office
(202) 205-1134

Forest Service Mobilizes Kids for Conservation

WASHINGTON, April 24, 2008—The U.S. Forest Service today awarded a half-million dollars in matching funds to mobilize our nation's most important conservation resource: kids. The funds will be used to get more kids outside, up close and personal with nature so they can have fun, get dirty, get healthy and learn!

Gail Kimbell, Chief of the Forest Service, announced awards to 16 Forest Service project leaders and their partners from around the country. The awards plus matching funds by partners will top $2 million. Partners in these projects represent schools, environmental and youth non-profit organizations, Native American Tribes, and other federal, state and local governments. The projects will help urban and rural children connect to the land in a hands-on way.

"The Forest Service and its partners want to help kids understand the natural world and to know how important wildlands are to their quality of life. By getting outdoors, kids will learn that forests and rangelands provide clean air, clean water and a multitude of goods and services for their benefit and for the benefit of future generations, and learn the conservation of these lands is important. These projects will encourage kids to experience the great outdoors, whether it is a remote mountain wilderness or a spot of nature in the heart of a city," said Chief Kimbell.

More than 270 proposals were considered for the awards. The Forest Service sought proposals focused on underserved and urban youth; recreation and environmental stewardship; solid, broad-based partnerships; and innovative techniques. Funding will help with costs such as transportation, supplies, tools and safety equipment to ensure a healthy learning experience. While many of the projects will take place on national forests, others will bring nature to children in their schoolyards and community green spaces.

The Forest Service has a long history of working with teachers, youth groups and others educating children about the natural environment. This year's funding for More Kids in the Woods continues that tradition by helping children be better prepared in the future to care for the land as they cope with climate change, demographic changes, and increasing demands for clean air, clean water and other benefits from nature.

The mission of the Forest Service is to sustain the health, diversity and productivity of the Nation's forests and grasslands to meet the needs of present and future generations.

Project Summary (250 words)

This new program is part of a broader effort in Louisville to connect youth to nature. This program reaches 200 fourth grade students and 8 teachers located in three urban west Louisville schools. Through multiple field trips, this program will increase these students' comfort in the outdoors and knowledge of their connection to nature. It provides teachers with tools to integrate the outdoors into their curriculum so that using the outdoors as a venue for learning is valued and sustained. Through a series of professional development sessions with the teachers, a strong team of educators will be formed that works together with Forest Service staff and project partners to create experiences for students in forests and riparian areas within their neighborhoods, the surrounding community and the Kentucky's wonderful Red River Gorge Geologic Area. Students will explore these diverse areas; engage in habitat restoration projects in their local parks; and will share their experiences with others.

Our main local partner is Louisville Metro Parks along with Jefferson County Public Schools, Olmsted Foundation, Metropolitan Sewer District, Jefferson County Soil and Water Conservation District, LOJIC, Louisville Metro Council, and the Portland Preserve America Project, and U.S. Army Corps of Engineers. Grant funding will cover cost of program supplies/planting material, field trip transportation, program fees, salaries of project interns and professional development for the teachers. Project partners are providing both in-kind and cash support.

Project Justification

Project Goals/ Objectives and Criteria	Over a school year, this project will result in seven significant day-long nature experiences for each of 200 urban 10-year olds. It is estimated that this will cost approximately $166 per child for each eight hours spent in nature. The majority of these children have had limited meaningful experiences in forest or meadow environments and lack the positive role models necessary to help them develop positive connections to nature. Children in the program live in the Portland (a Preserve America Community) and Shawnee neighborhoods of west Louisville and many of the participants come from families living at or below the poverty level. The program includes field-based experiential education within riparian, meadow, and forest ecosystems. It will also include recreational teambuilding activities to promote group cohesion and fun in the outdoors. With the assistance of project partners, the program will focus on a multitude of environmental issues including watershed management and ecosystem health. This program will support each of the three Forest Service mission areas including promoting kids in nature (the purpose of the program); promoting healthy forests (through the programs stewardship and land ethic components); and promoting water quality (the program will focus on introducing children to basic concepts of hydrological function of forests and greenspace within an urban environmental). Aside from a program-ending trip to the Red River Gorge, field trips and service projects will take place in local urban and suburban parks and natural areas. The program includes curriculum and service learning components designed to promote a stewardship ethic and help participants understand their relationship to the environment. Students will participate in ecological restoration activities including removal of invasive plants and tree planting as part of this project. This project is part of a larger effort by various Metro Louisville agencies, including Metro Parks, to provide children with meaningful experiences in the natural world. Metro Parks is working to secure other grant funding to support a program targeted to pre-school children with the goal of having these younger kids "graduate" to participate in similar age-specific programs as 4th graders. This More Kids in the Woods funding will be utilized as seed money to make this a reality.
Project Audience	The target population for this project was identified by selecting three inner city schools that have not utilized Louisville's Jefferson Memorial Forest for field trip experiences. Each of these schools is identified as a Title I school meaning 100% of their student population receives a free or reduced lunch and all of their fees are waived do to demonstrated economic hardship. This project targets the 4th grade and program content is designed to meet the specific learner goals outlined in Kentucky's Core Content and learning standards for fourth grades. This project will reach 200 students and their families, as well as 8 teachers.
Line Officer Support	

Project Description

This project generally seeks to help make nature a part of the lives of participating urban youth. Utilizing a "stepped" process, it will first introduce students to natural areas within their neighborhoods, then to increasingly rural settings, and then ending with an overnight trip to the Red River Gorge. Through sustained teacher training and support, multiple field trip experiences, and exploration of a variety of outdoor venues and ecosystems it will focus on the following Objectives: 1) increase the amount of time students spend experience the outdoors; 2) increase student's comfort level and enjoyment of the outdoors; 3) increase students' environmental literacy including knowledge of the species of plants and animals that inhabit their community; 4) develop students' understanding of the ecosystems within Louisville Metro and the human relationship to the ecosystems; 5) increase teacher's comfort level in using the outdoors as a learning venue; and 6) provide teachers with the materials, knowledge and confidence to use the outdoors as an integral part of their curriculum.

Teacher professional development will take place in July. Initial field trips will take place in August 2008 and continue through May of 2009. Louisville-area field trips will be planned and organized by Louisville Metro Parks staff with Forest Service staff and staff from project partners operating in support roles as instructors and presenters. Forest Service staff will take a leadership role in the planning of curriculum related to the overnight camping experience within Red River Gorge. Efforts to share and replicate these efforts will come through presentations at the Kentucky Association for Environmental Educators, and Kentucky Recreation and Park Society Conference. Because Jefferson County Public has signed as a partner there is great opportunity for this program to expand throughout Jefferson County. Marketing opportunities have been identified through JCPS through their KY Educational TV show "Our Kids", the "Parent Connection" newsletter, articles in the Courier-Journal, and local network coverage. Articles will also appear in the KY Association for Environmental Educator's newsletter and Metro Parks' publications.

Project Evaluation and Sustainability

This program will utilize the following indicators and performance measures to evaluate program effectiveness in meeting the objectives defined in the Project Description section.

Objective 1. Our goal is to provide a minimum of 50 hours of outdoor experiences per participant spread across seven field trips. This is a quantitative indicator and hours will be tracked by participant.

Objective 2. The desired outcome is that participants will feel at ease in the outdoor environment, seeking out opportunities to explore the outdoors in their communities. This objective will require qualitative indicators to determine if the desired outcome is achieved. This will be accomplished through a pre- and post-program surveys administered prior to the first field in August 2008 and after the final field trip in May 2009, supplemented with anecdotal teacher observations.

Objective 3. Success of this objective will be measured through use of the pre- and post-program surveys of both students and teachers to determine knowledge of local plant and animal species

Objective 4. The desired outcome is to have participants come to a greater knowledge of area ecosystems and an understanding of the human impact on their local environment. Success of this objective will be measured through use of the pre- and post-program survey

Objective 5. We will conduct a pre-program interview with the teachers to determine the amount of time they current spend in teaching in the outdoors and utilizing environmental education methods. This will provide our baseline for comparison of results after the first year of this program. Those results will come from a log kept by the teachers and post program interviews. Each subsequent year, will also be compared for on-going success.

Objective 6. As part of this program teachers will receive a collection of curriculum materials and supplies to utilize moving forward

More Kids in the Woods funding will be utilized as seed money to establish this new program. Its effectiveness will be evaluated and the demonstrated benefits of the program will be disseminated to the community through various media. Building upon the success of the initial program, Métro Parks and project partners will work to secure sufficient funding to replace the More Kids in the Woods funding and continue the project in 2009 and beyond. Metro Parks and other project partners are making along term commitment to providing this type of programming for the Louisville community and are prepared to dedicate the resources. Louisville's Mayor has made environmental education a priority in his 5-year strategic plan these community partners are responding to this vision. Furthermore, the program has been designed with sustainable elements. The selected schools' close proximity to area parks offering unique environmental education opportunities coupled with the materials and professional development that are being provided to teachers, is intended to promote use these area parks as outdoor classrooms for these schools.

The conditions in Louisville that make this program attractive (e.g., based in an urban area with nearby parks/natural areas underutilized for nature play) are representative of conditions in other municipalities across Kentucky and indeed the nation. Thus, this program is well suited for replication. Metro Parks, in cooperation with JCPS will prepare presentations on the goals and implementation of this program at various venues including the Kentucky Association for Environmental Educators Conference, and the Kentucky Recreation and Parks Society (KRPS) Conference. It will be promoted in other ways including in the local media as well as through Metro Parks' newsletters and website as well as KRPS publications.

RE: MSD Grant

Jeffersontown Elementary has over 800 students that have access to and help plant and maintain, a growing Outdoor classroom that includes a Sensory Garden for Kindergarten, vegetable garden and butterfly gardens to enhance learning of life cycles, a weather station, and an Energy Garden. Monies were used to purchase items to improve the Outdoor Classroom that is used to enhance the Life Sciences program at Jeffersontown Elementary and to make the campus more ecologically sustainable through the planting of native species and increasing tree cover.

Specifically during the summer and fall of 2008,
- working with a community organization, E-Corps, we used the monies to plant a garden of native species in an area of mown grass. We also planted six seedlings, established a Sensory Garden and are in the process of purchasing and planting two larger trees. Our goal is to try to increase the tree cover and reduce run-off by replacing the acres of lawn on our campus.
- In order to teach children about the changes in climate we participate in several of the Journey North online global studies of wildlife migration and seasonal change. We bought tulips for the Tulip Garden program that helps students plot the arrival of spring.
- We bought a hose system that allows us to water the gardens more easily.
- Students keep track of weather conditions. We purchased thermometers for our weather station.
- To make the gardens more user friendly we purchased sturdier plant markers to identify the plants.

In Spring 2009 two 2 ½" trees will be planted.

Report on SEP grant to the Kentucky Environmental Education Council by the Louisville Metropolitan Sewer District, June 2006-June 2008

Background and description of the program:

In the summer of 2006, the Louisville Metropolitan Sewer District (MSD) granted $50,000 to the Kentucky Environmental Education Council for the development and implementation of Kentucky's Certification Program for Nonformal Environmental Educators. (KCEE) At that time, the KCEE was a new program designed to substantially improve the knowledge base and professional competency of the people who teach our children and the general public about the environment. At that time, only four states had operational programs and only three of those (KY, UT and TX) had programs designed around the national standards for what environmental educators should know and be able to do (see NAAEE.org). In addition, all three programs, though differing in delivery strategies, are performance based, measuring each student's progress with a series of assessments.

Though all three standards-based state programs began at the same time (2004), Kentucky's has been by far the most successful with 115 graduates compared to 6 for Texas and 16 for Utah. This is despite the fact that Kentucky's program is course based and requires students to attend four, three-day workshops and complete one independent study over the one year course of the program. This compares to the other state programs which are portfolio based. There are many reasons for this success but one of the most important has been the support of the MSD grant.

All expenditures were complete by June 30, 2008. Work conducted between June 2007 and June 2008 included completion and graduation of one class and the first two workshops of the 2008 class, including topics on environmental systems, scientific inquiry, environmental issues and appropriate instruction about controversial topics.

Operating problems and solutions

To date, the program has been evaluated in four ways.

1. Through the cumulative results of the student assessments. Student assessments (tests, essays, units) are continually assessed for areas of weakness and the course is strengthened in those areas. For example, in the first two classes, student assessments showed a lack of understanding of the appropriate use of technology in EE. That part of the course was reviewed and strengthened with resulting higher scores.
2. Through focus groups conducted with each class at the last workshop of the year. These focus groups have resulted in changes to both content and logistics. For example, students asked that we include more urban environmental education and that workshop dates be moved to the winter months. Both of these suggestions were implemented in the next year.
3. Retention. Over 90% of all students entering the program complete it.
4. Formal evaluation by an outside evaluator. A formal evaluation of the program was conducted by an outside evaluator in 2006. No problems were identified. Another comprehensive evaluation is set for this spring.

The only major problem to date has been a philosophical issue over signing the code of ethics. Three students (all from Louisville) initially declined to sign the voluntary code of ethics due to a provision stating that environmental educators will attempt to teach in a balanced way. A meeting of the Certification Task Force (a body of EE agency and organization directors) was called and the Task Force decided that the code of ethics be made mandatory since it deals mainly with the safety of children. All three applicants eventually signed the code.

Budget

Salaries for instructors for the 2006, 07, 08 classes	36,000
Scholarships for students unable to afford the program	14,000
Total	$50,000

Environmental and public health benefits of the program

The course based nature of the Kentucky program (as opposed to the portfolio design of the Texas and Utah programs) is designed to model best practices in EE while allowing students to interact with experts in the field of EE. The SEP grant has allowed us to hire several nationally recognized instructors with doctorates in environmental education as instructors. We believe this has helped build the reputation of the program while providing excellent instruction for our students who report not only a better knowledge base and instructional skills but also a general increase in the amount of EE the teach. .

In addition to providing support for excellent instruction, the SEP monies have allowed us to provide numerous scholarships to folks who wanted the training but could not afford the room and board costs required to participate in the workshop. The program covers all costs except the $50 application fee and the costs for room and board at the workshops. This means that educators from small nature centers, church camps and other nonprofits have been able to take the course along with folks from federal and state agencies and other organizations with the resources to cover these costs.

We have been surprised at the variety of people who have enrolled in the course. Most, of course, hold positions such as extension agents, zoo personnel, nature center directors, etc. However, we have also certified physicians, lawyers, librarians, retired persons, public health officials and even one county judge! This broad based interest in teaching people about their environment has spilled over into areas such as literacy, public health and even government.

Through this grant, we believe MSD and the SEP program have been partners with us in the development and evaluation of a groundbreaking program. Currently, over 25 other states are in the process of developing their own EE certification program and most of those are using Kentucky as a model. This would not have been possible without your generous support.

All funds from this grant were expended as of June 30, 2008.

Respectfully submitted,

Jane W. Eller

RE: SEP Report – LJCET Monitoring Position

Ms. Croce,

Please find below the SEP report for the LJCET Monitoring Position

Description of the SEP as implemented:

In December 2005, Metro Parks received $50,000 from MSD to fund an intern position for monitoring conservation easement properties by the Louisville/Jefferson County Environmental Trust. The funding under the SEP was used as seed money by Metro Parks to hire an individual with a classification of Landscaping Supervisor II. This individual was tasked with performing baseline environmental assessments of new easement properties and performing annual monitoring of easement properties to ensure that easement stipulations are being met.

Description of any operating problems encountered and the solutions thereto:

Metro Parks has not encountered any problems with this SEP project.

Description of the environmental and public health benefits resulting from the implementation of the SEP:

This SEP has served the greater community interest by providing monitory of properties in the Jefferson County that are protected by conservation easements, including a number that involve properties with wetlands or containing sensitive features. Funding under this SEP has bolstered the ability of LJCET to meet its obligations as a land trust and is particularly helpful as the land trust seeks accreditation through the Land Trust Alliance. The SEP

has benefit all citizens of Jefferson County by supporting efforts to conserve valuable green space in this increasingly urbanizing area.

Certification that the SEP has been fully implemented:

Metro Parks spent all funding associated with this SEP as of June 30th, 2008. Metro Parks spent $25,000 of this funding in fiscal year 2006/2007 (period ending June 30th, 2007) and $25,000 in fiscal year 2007/2008 (period ending June 30th, 2008). Metro Parks began fully funding the position responsible for the duties outline above as of July 1, 2008.

Please feel free to contact me if you should have any additional questions or require any additional information.

Sincerely,

Bennett Knox, Parks Administrator

Ms. Phyllis Croce
Metropolitan Sewer District
700 W. Liberty Street
Louisville, KY 40202

Dear Ms. Croce:

The Jefferson County Soil and Water Conservation District (SWCD) is issuing this final report to the Louisville Metropolitan Sewer District regarding the Supplemental Environmental Project (SEP) grant that was awarded to our agency in January of 2006. The project officially came to a close on September 30, 2008, when the project goals were measured and a satisfactory level of success attained. Also, at this time, all SEP funds had been expended. The residuals of the program continue today as an integral part of the SWCD's educational program. The SEP awarded to the SWCD was to emphasize an educational outreach program dealing specifically with water quality in the Beargrass Creek watershed. Quarterly reports have been submitted regarding the activities of the SEP and this final report, in brief, summarizes the outcome and extent of success we experienced through the program.

The watershed and water quality programs implemented though the SEP resulted in providing hands-on environmental education experiences to 16,687 school-aged students from 48 different schools, groups, community centers and other organizations. Most of the students ranged in age from eight to eighteen. During the course of the SEP, the SWCD utilized activities such as stream walk programs where students gained knowledge of the flora and fauna along healthy and unhealthy segments of the stream, performed biological studies related to water quality, evaluated soils and gained an understanding of how porous, compacted, pervious and impervious surfaces affect runoff and water quality. The programs were designed to allow students to analyze problems and think through the process of how they or the community might address water quality concerns of Beargrass Creek. Approximately 65% of the funding was allocated directly to conducting the hands-on, outdoor classroom style studies directly with students. This means the students used the actual Beargrass Creek and portions of its watershed as their learning laboratory. The specific use of this resource, and what it had to offer, provided students with a way to engage in a practical scientific approach where they could utilize the knowledge and skills they already possessed plus develop tools to add to their continuing education in the areas of science, biology and critical thinking. The remaining 35% went to provide program support. This included field testing supplies, sampling equipment, field tools and transportation cost when necessary to move the students from the indoor classroom to the watershed classroom.

The Watershed Education program sponsored through the SEP funding also entailed the development of a curriculum which was used by teachers to support their classroom activities and their student's studies on water quality. The curriculum was modeled from the Floyd's Fork watershed curriculum developed in 2006. The success of the project's implementation is mirrored in the fact that the students, teachers and those

accompanying the classes to the field studies learned and retained knowledge on what types of activities can be implemented by individuals to help address water quality impairments and reduce stormwater runoff volumes. Actively engaging the students in site specific field level activities also ensured that they saw immediate results of their testing and could relate their findings back to what they may have previously learned in the classroom. Overall, the 16, 687 participants all walked away with an increased awareness of stream and watershed health and the causes and effects our decisions have on water quality. Hopefully, this knowledge will be used to enable these young individuals to make more informed decisions as they become older and in positions to help spearhead efforts to address this communities water quality concerns. Within the younger part of our society, obtaining a basic working knowledge of water quality and how our activities impact water quality will be a key to actually helping our community address our on-going water quality problems.

Sincerely,
Jefferson County SWCD

John H. Colliver

John H. Colliver, Chair
Board of Supervisors

Think the efforts of one individual cannot make a difference? Think again!

Message from the Chairman

Our community of Jefferson County, KY is blessed with an abundance of natural resources unique to a community of our size in the United States. I am honored to serve as the Chairman of the Jefferson County Soil and Water Conservation District, as we are one of 121 Districts in the Commonwealth of Kentucky. Our heritage is rich with many accomplishments over our 64 year history as a Conservation District. We have many challenges as we move forward into the next few years.

A glimpse of my background; I have served as a supervisor on the Jefferson County SWCD board for 20 years; the past 6 years as Vice-Chairman. I own and operate JHC Insurance Agency and also operate a Dairy Farm in Barren County, Ky. My interest in soil and water conservation dates back to my high school days. As a member of the FFA, we learned the practices of soil

Jefferson County SWCD's Chairman, John H. Colliver

management and how important the control of soil erosion was to our earth and it's environment. Living in an urban county, we have opportunities as landowners, developers, farmers and residents to practice good principles of soil and water conservation. Every cubic foot of water and every square foot of land is important—we need to be good stewards of our precious environment.

One mission of our board is to inform and educate our citizens about the importance of good soil and water conservation practices. As our community expands, this becomes a greater challenge. Our Board of Supervisors and staff are committed to providing natural resource related assistance to our citizens; giving as much time and resources as we can allow. We see many exciting opportunities in the near future and will be sharing these with you. In the meantime, call our office with your concerns and suggestions. We are here to serve you.

Attention Small Farm Operators

State and federal cost-share dollars are being made available to assist small farm operations with problems related to livestock water, eroding pastures, manure management and streambank erosion issues. Coming out of two years of almost drought conditions, many small farm operations have seen their pastures perish and water resources simply dry up. Regardless of whether the grazing animals are horses, cattle or alpaca, they all need a good supply of clean water and adequate forages to graze. Deficiencies in either of these areas often lead to problems such as overgrazing (erosion) and destruction of sensitive areas along steams or in woods.

Applications are being taken now to assist landowners in addressing these problems. Call 502.499.1900 and find out more information on the cost-share programs. Don't assume you won't qualify for the program.

Kentucky Envirothon–Looking for Competitors!

Put five high school students, an adult coach or teacher and a desire to learn more about the environment than what's found in text books and there you have it — a dynamic recipe for a Kentucky Envirothon Team!

Each spring, schools from around the state put together 5 member teams to compete in Regional and State Envirothon competitions. State winners, the top ten teams (five from the East and five from the West regional's) go on to compete at the Canon Envirothon at the International level which, this year, will be held in Asheville, North Carolina. Students compete for big-money scholarships and prizes from Canon--the camera and copier folks!

For the Kentucky competition, students compete outdoors in five areas: Forestry, Aquatics, Soils, Wildlife and a Current Issue. This year, the current issue is "Biodiversity in a Changing World." Teams compete in half- hour tests in each subject area which include applied knowledge to solve problems as well as field skills, such as calculating board feet of lumber in a tree, wildlife identification from scat or feathers, determining water quality from a biological assessment and much, much more. In addition to these tests in the field, at the state level, students are given a problem to solve. They must orally present their solution as a team to a panel of judges who are professionals in the environmental field.

This is a challenging and rewarding competition just for high school students. For more information about the International Envirothon go to www.envirothon.org or for the Kentucky Envirothon go to http://www.conservation.ky.gov/educations/

If your school or club would like to put together one or more teams, please contact Cheryl Bersaglia for more information. The soil and water conservation district will provide an Envirothon notebook of training materials.

Nature, Kids and 'Dogs = Good Times!

"Aren't there bears at the Memorial Forest?" This is just one of the many questions asked by the fourth grade students from King, Young and Portland Elementary schools. These students are participating in "More Kids in the Woods," a program funded with a grant from the US Forest Service to Jefferson County Memorial Forest to provide urban children with outdoor experiences, such as an overnight campout and trip to Red River Gorge.

As a partner in the grant, the Jefferson County SWCD is providing hands-on, outdoor lessons on soils as the students become more familiar and comfortable with their neighborhood parks and natural surroundings.

John Colliver, Chairman and his daughter, Sara, help serve the food!

A special "Thank You" goes to the Jefferson County Conservation District Board of Supervisors for sponsoring the first campout meal for 77 King Elementary students, some of their parents and teachers. Ray "King of the Grill" Adams, board member, grilled the hotdogs for some very hungry students--some even had thirds! Thanks also goes to Redwing Ecological Services, Inc. www.redwingeco.com and Tetra Tech, Inc. www.ttwater.com who "stepped up to the plate" to sponsor meals for the Young and Portland elementary schools' campouts. A great time was had by all!

Secretary-Treasurer, Harold Quick (right), ensures everyone has a cold beverage!

Cheryl Bersaglia, Education Coordinator and friend, Steve "Sasquatch" Freitas, cook up the Mac-n-Cheese!

"To cherish what remains of the Earth and to foster its renewal is our only legitimate hope of survival." ~ Wendell Berry

Stay Away from the Water–A Little Bit of Good Advice

Growing up an adventurous boy on a farm that had ponds and a creek on it, I used to get this advice from my mother all the time, "Stay away from the water... you might fall in". Well, I guess I never heeded that advice much because I can remember falling in a bunch of times. But still, it was good advice. Now, in my 50+ years of wisdom, and after falling in numerous times, I'd like to pass this advice along to you, "Stay away from the water...and if you fall in...enjoy it".

My reason for advising you to stay away from the water is strictly for water quality purposes. The closer you get to the water's edge, the more apt you are to do something to impair the water quality. Improving water quality in our creeks is going to take a great deal of effort on the part of all, but a good start is by limiting the activities we do next to the water's edge.

Mowing all the way to the water's edge or to the top of the streambank may seem like a harmless act, but that's not exactly true. One of the most critical areas that impact the health of the stream is the first 50 feet adjacent to the water's edge. This zone of the riparian area is the last area of defense to help clean up and filter runoff from overland flows before it enters the stream. The streamside area performs best if it is established to trees and shrubs or native grasses. These deep rooted plants provide the natural mechanisms to filter water through the soil and extensive root system of these plants. Towering trees along the banks provide shade, keeping the water cooler and provides the leaf and organic material needed by aquatic organisms to keep the aquatic food chain in sync.

Dedicate the streamside area as a habitat for wildlife. USDA has two programs that can help private landowners address these streamside management areas: the Wildlife Habitat Incentives Program and the Continuous Conservation Reserve Program.

Wildlife Habitat Incentives Program (WHIP)
A competitive, voluntary program that provides funding aimed at helping landowners create high quality upland wildlife habitat areas that support wildlife populations of state and local significance. The program provides incentive payments to help install practices such as native or warm season grass covers, shallow wetland areas, old field regeneration, tree planting and field borders. This is an excellent tool for landowners who have a dedication to creating wildlife diversity on their property.

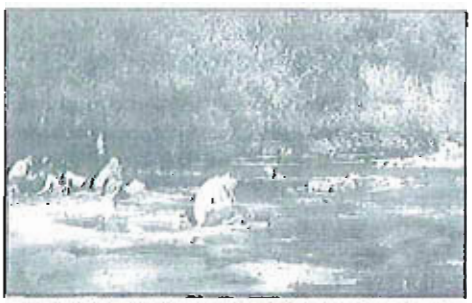
Continuous Conservation Reserve Program (CCRP) - Buffers
An excellent tool that helps to address water quality concerns along streamside areas and at the edges of crop fields by providing incentives (cost-sharing and annual rental payments) for establishing buffers of native grasses, shrubs, and in some cases, trees.

In order to truly begin to address the water quality efforts of this community, we must each do our part. Those who live on the water's edge enjoy the greatest benefits of the stream but also have one of the greatest responsibilities for water quality. My advice to you is, "stay away from the water," that way, we can all enjoy it more!

MSD SEP Funds–An Education Impact for Metro Louisville

In the fall of 2006, MSD granted $50,000 to the Jefferson County Conservation District to fund an education initiative in hopes of gaining community support in protecting and improving the waters of Beargrass Creek, one of Louisville's most important water resources.

Using these funds, the District developed curriculum, implemented educational programs in schools and other venues. These funds were also used to pay transportation costs to give students an opportunity to experience the wonders of Beargrass Creek through highly successful stream walk programs in Cherokee Park. All of these programs provided the public an opportunity to understand the community's impact on Beargrass Creek as well as the role of water quality in their lives.



Students observe the aquatic wildlife in Beargrass Creek.

Since September 2006, the District served *16,687* children and adults with water quality education programs involving *48* different schools, groups, community centers, and adult or other public venues.

It is the hope of the District that, although this funding is no longer available, these education initiatives will continue. Stream walks for school children will continue to be provided as resources become available. Sponsors for transportation costs to support Beargrass Creek stream walks are always welcome!

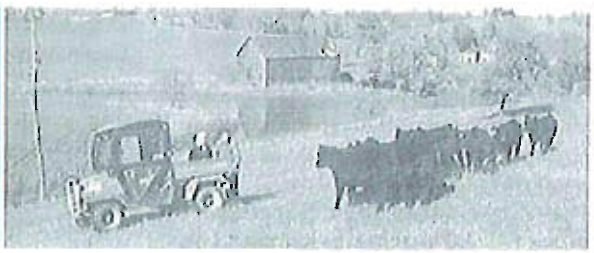
Kentucky Agricultural Water Quality Plan

Best Management Practices For Your Farm



The Agriculture Water Quality Act was passed by the Kentucky General Assembly in 1994 with the goal to protect surface and groundwater resources from pollution as a result of agriculture and forestry activities. The Kentucky Agriculture Water Quality Plan consists of best management practices (BMP's) in six areas: Forestry, Pesticides and Fertilizers, Farmstead, Crops, Livestock and Streams and Other Waters.

The Act requires all landowners or land users with 10 or more acres of land, currently used for agriculture or forestry activities, to develop and implement a Water Quality Plan. Plans were to be developed and fully implemented by October 23, 2001, and new landowners must develop and implement their plans as soon as possible.

Various tools are available to help develop your plan. This website contains an online tool to help you assess your operation and identify best management practices to be included in your individual plan:http://warehouse.ca.uky.edu/AWQP2000/

You will also find information regarding regulatory requirements, design information, cost share assistance, recommendations and references, and much more.

Cheryl Bersaglia, District Coordinator can assist you with developing your plan. Kurt Mason with the USDA Natural Resources Conservation Service can provide you with free technical assistance and provide information on various available federal programs for water quality protection.

Individuals applying for cost-share assistance through the KY Soil Erosion and Water Quality Cost-Share Program must have an agricultural water quality plan on file with our office. Call (502) 499-1900 or email:cheryl.bersaglia@ky.nacdnet.net or kurt.mason@ky.usda.gov for assistance.

December 5, 2008

Louisville Metropolitan Sewer District
c/o Ms. Phyllis Croce
700 West Liberty Street
Louisville, KY 40202

Dear Ms. Croce,

Attached is Living Lands & Waters' June 2007-June 2008 Watershed Education Project report. Enclosed you will find details of the activities engaged, challenges, environmental and public heath benefits of the project, and budget.

Overall, we feel that each endeavor was a huge success. The XStream Cleanup brought together a partnership of over a dozen community agencies and organizations, to clean up 21 different sites along Louisville's streams and rivers. It was also exciting to host 59 college students as part of our Alternative Spring Break program. In just 3 weeks, we were able to fill one and a half barges, an estimated 75 tons, with debris collected from the Ohio River.

As in previous years, it was a joy to work with you and all the others at MSD. It's been an honor to work in the Louisville community, and we look forward to returning in future years.

If you have any questions regarding this report, please do not hesitate to call me at 309.236.0740.

Sincerely,

Chad Pregracke
President and Founder

WATERSHED EDUCATION 2007-2008 PROJECT REPORT

I. Detailed Description of the SEP

Living Lands & Waters (LL&W), a 501(c)3 non-profit environmental organization based in East Moline, Illinois, hosted a series of watershed education events in the Louisville metropolitan area beginning in November of 2007 and continuing through the end of April, 2008. All activities within the Watershed Education Project aimed to:

- Aid in the protection, preservation and restoration of the natural environment of the Ohio River watershed in the Louisville area;
- Expand awareness of environmental issues encompassing the Louisville area watershed;
- Create a desire and an opportunity for Louisville residents to become responsible stewards of their local river environment.

LL&W accomplished this through three main programs: River Cleanups, Invasive Plant Removal and Big River Educational Workshops. Through these primary projects, LL&W worked directly with approximately 350 volunteers in the Louisville community. Media coverage of the cleanup events from approximately 10 different newspaper, magazine and television outlets allowed the mission of LL&W's Watershed Education Project to be seen and heard by countless members of the metropolitan community.

Program Details

XStream Cleanup-

On March 15, 2008, LL&W, MSD and partners held the first ever Louisville XStream Cleanup. This cleanup consisted of 21 different sites along 10 creeks, rivers, and streams in the Louisville metro area. Over 130 volunteers braved the weather and collectively removed 403 bags of debris, 283 tires, 15 barrels, 8 appliances and propane tanks and much more.

Community-Based River Cleanups-

LL&W hosted several community-based river cleanups throughout the month of April 2008, in celebration of Earth Day. These 7 cleanups took place along the Ohio River with 78 volunteers participating. At each cleanup, volunteers would board a LL&W work boat and were driven to a predetermined work site. From there, they would collect garbage (barrels,

appliances, pop bottles, tires, propane tanks, etc.) and place into piles along the shore. After the cleanup had concluded, the LL&W crew then picked up all piles of garbage, loaded them into the boat and then unloaded onto the barge to sort for recycling.

Also of note, nearly everyday of April, the LL&W crew was out cleaning—even when there were no volunteers. Throughout LL&W's time in Louisville, an estimated 75 tons of refuse was removed from shorelines and islands of the Ohio River watershed.

Alternative Spring Break-
From March 9-22, 2008, LL&W hosted an Alternative Spring Break program in which students traveled from across the country to help the LL&W crew clean up the Ohio River. During that time, 59 students from New York, Illinois, and Maine volunteered 7 hours a day removing garbage. As an incentive to participate, LL&W arranged and paid for food and lodging at the local Baptist seminary. In just 2 short weeks, the volunteers and crew removed an estimated 65 tons of debris, including over 2,000 tires.

Invasive Plant Removal-
Two LL&W crew members, along with staff and volunteers from Louisville Metro Parks and Youthbuild, began work on removing invasive species from the Bear Grass Creek Greenway. This particular area is used heavily by the public, with bike and walking trails running parallel to the Creek. Utilizing chainsaws and loppers, Japanese Honeysuckle was removed and treated to prevent re-growth. From November through the end of February, LL&W and partners were able to remove and treat an estimated 2 acres of this non-indigenous plant. Native trees and shrubs will now be able to thrive throughout these areas.

Big River Educational Workshop-
The Big River Educational Workshop was a one-day event hosted by LL&W aboard our floating classroom, garbage barges and large aluminum plate boats. Targeting a local at-risk group involved in the YouthBuild program, these events taught the 30 participants about the varied dynamics of the Ohio River and the impacts to the Ohio River Watershed. Topics covered at the workshop focused on five major areas: the river as a natural resource, watershed and impacts to the system (emphasizing non-point source pollution), commercial and recreational uses of the river, the water use cycle, and river stewardship. Guest speakers from local and federal agencies including Louisville Metropolitan Sewer District, the US Army Corps of Engineers and LL&W staff presented on these topics. Classroom activities and boat trips on the river to visit various points of

interest such as Bear Grass Creek, CSOs (combined sewer overflows), and the Louisville lock and dam took place at the workshop.

Partners

To ensure success and the greatest impact, LL&W partnered with several long-standing Louisville organizations, city, state and federal agencies, schools, organizations, companies and coalitions. Specific partners included:

-Louisville Metropolitan Sewer District
-The Partnership for a Green City (This coalition includes three of Louisville's largest entities: Jefferson County Public School System, the University of Louisville, and Louisville Metro Government)
-Brightside
-Louisville Metro Parks
-USDA/NRCS
-Muhammad Ali Institute
-U.S. Army Corps of Engineers
-YouthBuild
-St. Francis Middle School
-American Commercial Lines
-Brown Foreman Corporation
-Sierra Club
-University of Kentucky
-Blackacre State Nature Preserve
-Boy Scouts
-Greenwood High School
-Sappi Paper Products
-Kentucky Division of Air Quality
-Portland NOW Inc.
-APES
-Louisville Male High School
-Meyer's Middle School
-J.B. Atkinson Elementary
-Crescent Hill Baptist Church
-The Captain's Quarters
-Kentucky Farm Bureau
-Anheuser-Busch Companies

Each of these partners contributed staff, volunteers and/or resources to LL&W's programs.

ii. Description of Operating Problems and Solutions

Challenges-

The biggest challenge that LL&W faced while implementing all of the above projects was dealing with the unpredictable weather. Snow, Ice, cold, and rain plagued us throughout the winter and spring. Most of our time working as a full crew, the weather was mostly cold and wet—it seemed to rain almost everyday.

The consistent rain also brought about a change in river levels. These quick and significant increases lead to several challenges including:

-forcing LL&W to relocate the barges and floating classroom from a Jeff Boat fleet to a further yet much safer location
-as a result of relocating the barges, LL&W had to ensure that all participants of events were aware of new locations and meeting points
-finding accessible cleanup locations that were not flooded
-finding garbage that was not completely submerged

As a solution to the high water issue, LL&W moved the barges to a safer location in a quarry owned by Nugent Sand. Because of the new location of the barge, LL&W had to email and call each participant on short notice to inform them of new meeting locations and provide new driving directions. When performing cleanups, LL&W had to scout for garbage on high islands or levees that were safe and easily accessible by boat.

On the day of the XStream Cleanup, the forecast called for very cold and wet conditions. Likely due to the dreary forecast, nearly half of our registered volunteers did not show up, even though the rain held out.

Another challenge regarding the XStream Cleanup was a large city-wide cleanup (concentrating on land-based sites) scheduled two weeks after the XStream Cleanup. This cleanup, organized before ours with a long history in the Louisville area, likely competed with the XStream Cleanup for volunteers.

Solutions-

To remedy the above problems, LL&W is looking to return to Louisville later in the year, when the weather is more consistent and pleasant. Later in the year the river is also less prone to flooding and drastic fluctuations. LL&W is also looking into returning when there is are no other major community-wide stewardship events happening that could compete with LL&W's efforts.

III. Itemized Costs

The enclosed budget details the expenditures incurred through program expenses and general operating costs. All expenses exceeding the $100,000.00 received through SEP were absorbed by other donations to LL&W.

V. Environmental and Public Health Benefits

River Cleanups-

Garbage that enters the waterway by undefined users is a prevalent non-point source pollutant. In addition to dramatically reducing the aesthetics of these natural areas, many items removed from the river system are harmful to the entire ecosystem, adversely affecting the health and habitat of plants, fish, wildlife, and human beings. Items such as refrigerators containing Freon, 55-gallon barrels containing mysterious liquids and chemicals, batteries, propane tanks, oil cans, plastic six-pack slings, fishing line, etc. are literally picked up by the thousands by the LL&W crew and volunteers, freeing the river of potentially hazardous materials and improving the quality if the water.

About 50% of those items collected at cleanup are recycled, saving energy costs and resources. Had these items not been recycled, they would have ended in a local landfill.

Furthermore, getting people out on the river, in a boat, is a memorable experience. From that day on, participants possess a deeper connection to the river than before. By taking a stance and helping to clean up the river, these same citizens will be more inclined to participate in other stewardship events.

Invasive Plant Species Removal-

Plants such as Japanese Honeysuckle *(Lonicera japonica)* are prolific in many of the parks and public areas of Louisville. If not controlled, these plants out-compete native species for nutrients, light, and moisture. They also degrade wildlife habitat; threaten the future of forests, wetlands, prairies, and other natural areas; contribute to erosion by shading out other plants that grow on the forest floor; serve as host to other pests such as crown rust fungus and soybean aphid; form an impenetrable layer of vegetation; and lack "natural controls" such as insects or disease that could curb their growth.

Further, by involving volunteers in the removal project, awareness on the issues of invasive species was instilled.

Big River Educational Workshops-

These workshops create a consciousness among participants about how amazing the Ohio River is as well as the issues that confront its health. Participants understand how the health of the river affects the well-being of all living things dependent on the river, and the things that they can do, on a personal level, to reduce human impacts. For example, many of the same students that participated in the workshop also volunteered at the XStream Cleanup.

LIVING LANDS & WATERS

Annual Expense Budget/Daily Costs

Daily Costs Based on 299 Work Days Per Year

Louisville Metropolitan Sewer District Project--June 30, 2007-June 30, 2008

The whole crew worked on the project the entire months of March and April, 2008. Following are costs for those 61 days based on Living Lands & Waters' budget. Additional costs follow.

Project Expenses	**Annual**	**Daily**	**61 days March, April**
Personnel			
Salaries - 7 crew members	280,038	937	
Payroll taxes	19,510	65	
Unemployment tax	5,000	17	
Health insurance	17,000	57	
Retirement	30,000	100	
Total personnel	351,548	1,176	71,736
Contract services			
Pilot fees	12,000	40	
Crew contract labor	2,000	7	
Other contract labor	28,000	93	
Total contract services	42,000	140	8,540
Travel/lodging expenses			
Lodging	24,000	80	
Food	24,000	80	
Groceries	10,000	34	
Travel	22,000	74	
Total travel/lodging	80,000	268	16,348
Operating expenses			
Gas and oil	55,000	184	
Operating supplies	19,000	64	
Safety	1,000	3	
Small tools	3,500	12	
Equipment rent	2,500	8	
Cellphones	16,500	55	
Auto license/title	2,000	7	
Disposal costs	12,000	40	
Total operating	111,500	373	22,753
Repair expense			
Vehicle repair	16,000	53	
Marine repair	7,500	25	
Equipment repair	1,000	3

Appendix G – SEP Supporting Documents

Appendix G-16 Bicycle and Pedway Connections – Louisville Waterfront Development

December 8, 2008

Ms. Phyllis Croce
Landscape Restoration Specialist
Metropolitan Sewer District
700 W Liberty Street
Louisville KY 40203-1911

Dear Phyllis,

All work on the the Supplemental Environmental Project described on the attached sheet is now completed.

Please don't hesitate to contact us with additional questions.

Best regards,

Ashley Cox
Marketing and Event Manager

Enclosed: 1

Louisville Waterfront Development Corporation
129 East River Road Louisville, Kentucky 40202
502.574.3768 Fax 502.574.4111 www.LouisvilleWaterfront.com

i. The Supplemental Environmental Project is a master planned project in progress that will ultimately be a continuous nine mile pedestrian and bicycle loop linking Louisville Kentucky and Southern Indiana Communities via the Big 4 Bridge and the K&I Bridge, known as the Kentuckiana River Trail (Trail). Virtually the entire Trail exists in one form or another with the Waterfront Park, Louisville RiverWalk and the Ohio River Greenway Project. In January 2007, an engineering study of the existing RiverWalk was completed that provides an update on current conditions of the existing multi-use path and recommendations about upgrades needed to accommodate pedestrians and bicyclists. Accessibility, Lighting and Maintenance have been identified as key issues.

ii. The primary operational problem encountered by Louisville Metro was a detailed study needed to integrate the Louisville RiverWalk as the entrance to the K&I Bridge. This required a detailed analysis of the existing conditions of the RiverWalk together with an evaluation of how to make it fully integrate into the Trail. A grant from Louisville Metro allowed the Waterfront Development Corporation to hire Construction Solutions to conduct and prepare such an evaluation. This work has now been completed but was not done in a time frame to meet the initial request by the Metropolitan Sewer District. Waterfront Development Corporation is now in a position to move forward on needed modifications to the Louisville RiverWalk.

iii. The itemized costs are as follows:
   a. Priority #1 - Additional Lighting & Relocation of Existing Street Lights is estimated to cost $40,500.
   b. Priority #2 - Demolition of Existing Switchback Ramp and Construction of a new Ramp is estimated to be $92,500.
   c. Priority #3 - Establishing a new river's edge and asphalt repairs to the RiverWalk in between 10th Street and 13th Street is estimated to be $72,000

iv. The Waterfront Development Corporation will commence work immediately on the priorities and provide certification to the Metropolitan Sewer District that the portion of the SEP pertaining to the K& I Bridge and its access has been completed as soon as practical.

v. The Trail is a 9 mile pedestrian/ bicycle loop that will encourage healthful physical activity, provide safe accommodation, and enhance aesthetic routing and design. It will also encourage the use of bicycles as a viable transportation and recreation option. The project will provide a valuable link for non-motorized travel in the Louisville Metro Area, connecting residential, commercial, historic, educational development and recreational areas. It will also enhance the view and experience for the bicycle and pedestrian traveling public by providing streetscape improvements, landscaping, lighting, utility relocation, native plants, roadside vegetation management, and the planning, design and construction of these activities.

Construction Solutions, LLC

Waterfront Development Corporation
River Walk Study – Update
February 26, 2008

The Riverwalk is a completed portion of a master planned project now known as the Kentuckiana River Trail. The Riverwalk is a multi-use pathway that meanders along the banks of the Ohio River in Louisville, Kentucky. It begins at the Big Four Bridge and continues west approximately four miles towards the K&I Bridge. The multi-use path was designed as a means to allow pedestrians and bicyclists to travel along and enjoy the rivers' edge. The intent is to connect this path to other existing and proposed paths circulating throughout Louisville linking it to specific destination points or points of interests. Once access is created on the Big Four Bridge and the K&I Bridge the path will connect with other paths in neighboring Southern Indiana communities.

The purpose of this report is to provide an update on the current conditions of the path and make recommendations for repair on sections beginning at the Waterfront Corporations office building ending at the K&I Railroad Bridge.

Accessibility, lighting, and maintenance have been identified as key issues. The ideal path would be one that is safe, accessible, well lit, and well maintained.

Accessibility

The path needs to be a hard surface with a minimum width of 8' to accommodate both pedestrians and bicyclists.
The main path needs to be accessible year round. Maintaining an elevation higher than 440.00 is necessary to keep the path above the 10 year flood plane; 452.00 is necessary to keep the path above the 100 year flood plane.

Lighting

The main path and adjoining paths need be have adequate lighting so that it is inviting and safe for public use.

Maintenance

The path needs to be maintained such that it is clear of obstructions.
Grass, weeds, and leaves should be kept away from the path at least 6'.
Trees need to be limbed up to a canopy height of 10' to 12'.
Drainage of the surrounding areas needs to be adequate to mitigate and prevent destruction caused by erosion.

Construction Solutions, LLC

Waterfront Development Corporation
River Walk Study – Update
February 26, 2008

The path has been divided into 8 sections to better identify and isolate the various and quite different areas.

Section 1 – Waterfront Development Corporation Office to Belvedere
Section 2 – Belvedere
Section 3 – Belvedere to 10th Street
Section 4 – 10th Street to 13th Street
Section 5 – 13th Street to 15th Street
Section 6 – 15th Street to 28th Street
Section 7 – 28th Street to K&I Bridge
Section 8 – K&I Bridge

Construction Solutions, LLC

Waterfront Development Corporation
River Walk Study – Update
February 26, 2008

Section 1 - Waterfront Development Corporation Office to the Belvedere

Accessibility

Overall accessibility is good for the general public. Sidewalks are present and in good condition up the Belle of Louisville. Some sections of sidewalk in and around the Belle of Louisville need to be removed and replaced due to settlement and frost heave. Sidewalks from the Belle of Louisville to the Belvedere are currently in good condition.

Lighting

Lighting conditions are good. Much of the area is open to natural sunlight. Main sidewalks and parking areas are well lit.

Maintenance

The path and surrounding areas are maintained well from the WDC office to the Belvedere.

Additional Comments

A main path is not identified as part of the Riverwalk. Some sort of signage should be considered to let one know they are in Waterfront Park and that Waterfront Park is part of the Riverwalk.

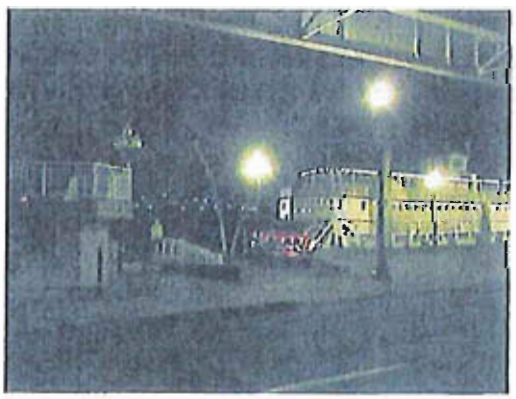
February 26, 2008

Section 1 – Waterfront Development Corporation Office to Belvedere

AFTER



Construction Solutions, LLC

Waterfront Development Corporation
River Walk Study – Update
February 26, 2008

Section 2- Belvedere

Accessibility

Accessibility is poor. Overhead expressway columns, street lighting, retaining walls, and other structures restrict access to 4' in places. Many objects are necessary for the structures and would be costly to relocate. It is possible however to remove or relocate some of the street lighting to provide better access.

Lighting

Lighting is poor under the Belvedere, which poses possibly safety problems for pedestrians. Adding down lighting from the expressway or adding light packs mounted on concrete columns or adjacent walls is an alternative to mitigate this problem.

Maintenance

Maintenance is poor. Garbage cans need to be emptied more frequently. Litter and leaves need to be cleaned up on a more frequent schedule.

Additional Comments

Directional signage should be considered and placed at the bottom of the Belvedere stairs to let people know where they are and how they can continue on the path westerly toward Lannan Park and easterly toward Waterfront Park.

Estimated cost to move lights in order to provide better access	$ 10,500.
Estimated cost to add additional lights to provide safer environment	$ 30,000.

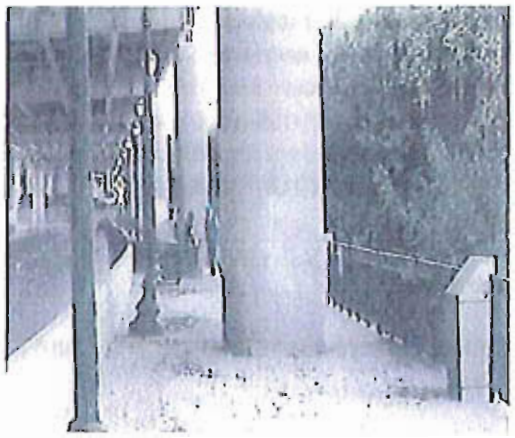
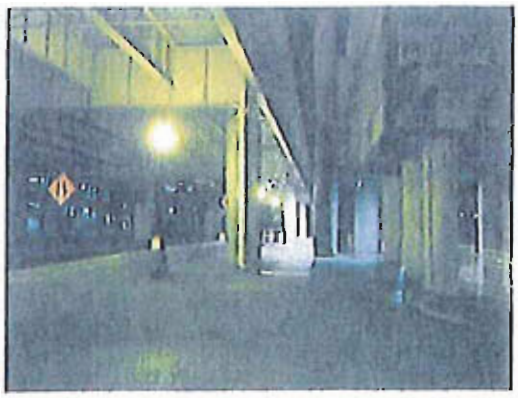
Section 2 - Belvedere

BEFORE



AFTER



Construction Solutions, LLC

Waterfront Development Corporation
River Walk Study – Update
February 26, 2008

Section 6 – 15th Street to 28th Street

Accessibility

Access is good and wide open from 15th Street to about 26th Street. Near 23rd Street and before the McAlpin Dam access become difficult due to obstacles that interrupt the flow of the path. The path crosses two sets of railroad tracks and then rises. Due to the incline of the slope the path enters into a switchback concrete ramp structure. The switchback ramp needs to be removed and redesigned to allow for bicycle access. Consideration should be given to a gradual ramp and new a railroad crossing.

Lighting

Lighting is limited to natural sunlight. There is no path lighting.

Maintenance

Maintenance is good though more attention needs to be given to the Lannan Park area. Grading and drainage is poor thus causing water to accumulate water in many places.

Additional Comments

Estimated cost to demolish switchback ramp	$ 20,000.
Estimated cost to provide new railroad crossing and ramp	$ 65,000.
Estimated cost to regrade spot areas to drain in Lannan Park	$ 7,500.

AGREEMENT

PSC 2007-_____

THIS PROFESSIONAL SERVICE CONTRACT, made and entered into by and between the **WATERFRONT DEVELOPMENT CORPORATION**, ("WDC"), and **CONSTRUCTION SOLUTIONS, LLC** with offices located at 1323 Story Avenue, Louisville, KY 40206, ("**CONSULTANT**").

WITNESSETH:

WHEREAS, WDC is in need of certain professional services with respect to designing and constructing improvements to Riverwalk in Waterfront Park; and

WHEREAS, the Consultant has been determined by WDC to have the necessary experience, expertise and qualifications to provide those services;

NOW, THEREFORE, it is agreed by and between the parties hereto as follows:

I. SCOPE OF PROFESSIONAL SERVICES

A. Consultant shall, at the request of WDC, provide services under the terms of this Agreement. The Consultant's work product may be reviewed from time to time by WDC for purposes of determining that the services provided are within the scope of this Agreement.

B. Consultant, while performing the services rendered pursuant to this Agreement, may utilize agents or employees of such Consultant. However, such use must be documented in the monthly invoice submitted for those services.

C. If from time to time Consultant needs to utilize the records or personnel of WDC in performing the services required in this Agreement, then Consultant shall notify the proper agent of WDC and arrangements may be made to provide the necessary records or personnel. However, at no time shall WDC make available its resources without the full consent of both parties.

D. The services of Consultant shall include but not be limited to designing and constructing improvements to Riverwalk in Waterfront Park, and are more specifically described as follows:

a. Remove switchback ramp adjacent to Lannan Park and construct a handicap accessible sidewalk along existing floodwall that ties back in to the existing asphalt path.
b. Remove (6) lights under the Belvedere to widen path. Install new wall pack fixtures under the Belvedere to provide additional lighting.
c. Remove and replace sidewalk and curb at trolley entrance on River Road to Belle of Louisville to allow handicap and bicycle access to Belvedere.

II. FEES AND COMPENSATION

A. Consultant shall be reimbursed for professional services rendered according to the terms of this agreement in an amount not to exceed the sum of **$125,000.00.**

B. Unless otherwise agreed in writing by WDC, services shall be rendered and payment shall be made monthly throughout the duration of this agreement. Payment shall only be made pursuant to a detailed invoice presented monthly, which invoice shall indicate a descriptive daily accounting of the hours expended in service under the contract, the particular nature of such service and out-of-pocket expenses. Copies of invoices or receipts for out-of-pocket expenses and other third party charges must be included with the Consultant's invoice when payment is requested. In the

event payment is made in lump sum at the end of the service period, Consultant's final invoice shall indicate a descriptive daily accounting of hours expended as described above.

C. Consultant shall only be reimbursed out-of-pocket expenses if such expenses are reasonable in amount and necessary to accomplish the scope of services of this contract. The Metro Government will not reimburse first class air fare, personal phone calls, short term parking expenses, or other premium type expenses. WDC reserves the right to reduce or disallow expenses considered excessive or unnecessary under this contract.

D. Consultant, to the extent that it provides the same or related services to third parties agrees to pro-rate its billings and out-of-pocket expenses to WDC which are of benefit to the third parties and to provide documentation to all parties to verify the pro-ration of such billings and expenses. In no event will WDC pay bills or expenses which are considered to be double billing (i.e. billing two different parties for the same work or expense).

III. DURATION

A. This is a professional service contract which shall begin August 1, 2007, and shall continue through and including June 30, 2008.

B. This Agreement may be terminated at any time without cause by submitting written notice to the non-terminating party of such intent to terminate. In the event of termination without cause, payment for services complete up to and including

date of termination shall be based upon work completed at the rates identified in this Agreement.

C. This Agreement may be terminated at any time for cause by WDC upon breach of any provision of this Agreement by Contractor. WDC shall provide written notice of termination to Contractor specifying the termination date and time. If WDC terminates this Agreement for cause, WDC shall have the right to withhold any payments due under this Agreement and WDC may pursue its remedies in law or equity through all appropriate legal action.

IV. EMPLOYER/EMPLOYEE RELATIONSHIP

It is expressly understood that no employer/employee relationship is created by this agreement nor does it cause Consultant to be an officer or official of WDC. By executing this agreement, the parties hereto certify that Consultant's performance will not constitute or establish a violation of any statutory or common law principle pertaining to conflict of interest, nor will it cause unlawful benefit or gain to be derived by either party.

V. RECORDS-AUDIT

Consultant shall maintain during the course of the work, and retain not less than five years from the date of final payment on the contract, complete and accurate records of all of Consultant's fees and costs which are chargeable to WDC under this Agreement; and WDC shall have the right, at any reasonable time, to inspect and audit those records by authorized representatives of its own or of any public accounting firm

selected by it. The records to be thus maintained and retained by Consultant shall include without limitation: (a) payroll records accounting for total time distribution of Consultant's employees working full or part time on the work (to permit tracing to payrolls and related tax returns), as well as canceled payroll checks, or signed receipts for payroll payments in cash; (b) invoices for purchases receiving and issuing documents, and all the other unit inventory records for Consultant's stores stock or capital items; and (c) paid invoices and canceled checks for materials purchased and for subcontractors' and any other third parties' charges.

VI. INSURANCE REQUIREMENTS

Prior to commencing work, Consultant shall obtain at its own cost and expense the following types of insurance through insurance companies licensed in the State of Kentucky. Insurance written by non-admitted carriers will also be considered acceptable, in accordance with Kentucky Insurance Law (KRS 304.10-040). Workers' Compensation written through qualified group self-insurance programs in accordance with Kentucky Revised Statutes (KRS 342.350) will also be acceptable. **The Consultant shall not commence work under this Contract until all insurance required under the Contract Document has been obtained and until copies of policies or certificates thereof are submitted to and approved by Louisville/Jefferson County Metro Government's Risk Management Division.** The *Consultant shall not allow any subcontractor to commence work until the insurance required of such subcontractor has been obtained and copies of Certificates of Insurance retained by Consultant evidencing proof of coverages.*

Without limiting Consultant's indemnification requirements, it is agreed that Consultant shall maintain in force at all times during the performance of this agreement the following policy or policies of insurance covering its operations, and *require subcontractors, if* **subcontracting** *is authorized, to procure and maintain these same policies* until final acceptance of the work by WDC. WDC may require Consultant to supply proof of subcontractor's insurance via Certificates of Insurance, or at WDC's option, actual copies of policies.

The insurance to be procured and maintained and **minimum** Limits of Liability shall be as follows, unless different limits are specified by addendum to the contract:

1. The Consultant shall purchase and maintain at their own expense a **PROFESSIONAL LIABILITY (Errors and Omissions Liability) insurance** policy, **which includes a minimum limit of liability of $1,000,000 for each Wrongful Act.** In the event that the Consultant's policy is written on a "Claims Made" Form, the Consultant shall, after work has been completed, furnish evidence that the liability coverage has been maintained for at least one year after completion of work, either by submitting renewal policies with a Retroactive Date of not later than the date work commenced under this contract, or by evidence that the Consultant has purchased an Extended Reporting Period Endorsement that will apply to any and all claims arising from work performed under this contract.

2. WORKERS' COMPENSATION Insuring the employers' obligations under Kentucky Revised Statutes Chapter 342 at Statutory Limits, and EMPLOYERS' LIABILITY - **$100,000** Each Accident/**$500,000** Disease - Policy Limit/**$100,000** Disease - Each Employee.

Insurance is to be placed with Insurance Companies with an A. M. Best Rating of no less than "B+ VI", unless proper financial information relating to the Company is submitted to and approved by Metro Government's Risk Management Division.

The Consultant shall procure and maintain insurance policies as described herein and for which WDC shall be furnished Certificates of Insurance upon the execution of the Contract. The Certificates shall include provisions stating that the policies may not be cancelled or materially amended without WDC having been

provided at least (30) thirty days written notice. The Certificates shall identify the Contract to which they apply and shall include the name and address of the person executing the Certificate of Insurance as well as the person's signature. If policies expire before the completion of the Contract, renewal Certificates of Insurance shall be furnished to Metro Government's Risk Management Division at least 30 days prior to the expiration of any policy(s). Certificates of Insurance as required above shall be furnished, as called for:

Louisville/Jefferson County Metro Government
Finance Department
Risk Management Division
611 West Jefferson Street, Room 22
Louisville, KY 40202

WDC and Metro Government shall be listed as additional insureds on the Certificate of Insurance.

Approval of the insurance by WDC and/or Metro Government shall not in any way relieve or decrease the liability of the Consultant hereunder. It is expressly understood that WDC and Metro Government does not in any way represent that the specified Limits of Liability or coverage or policy forms are sufficient or adequate to protect the interest or liabilities of the Consultant.

VII. HOLD HARMLESS CLAUSE

The Consultant shall indemnify, hold harmless, and defend the WDC and Louisville/Jefferson County Metro Government, its elected and appointed officials, employees, agents and successors in interest from all claims, damages, losses and expenses including attorneys' fees, arising out of or resulting, directly or indirectly, from

the Consultant's (or Consultant's Subcontractors, if any) performance or breach of the contract provided that such claim, damage, loss, or expense is: (1) attributable to personal injury or damage to property, including the loss of use resulting therefrom, or breach of contract, and (2) not caused by the negligent act or omission or willful misconduct of WDC or the Louisville/Jefferson County Metro Government or its elected and appointed officials and employees acting within the scope of their employment. This Hold Harmless and Indemnification Clause shall in no way be limited by any financial responsibility or insurance requirements and shall survive the termination of this Contract.

VIII. REPORTING OF INCOME

The compensation payable under this Agreement is subject to federal, state and local taxation. Regulations of the Internal Revenue Service require WDC to report all amounts in excess of $600.00 paid to non-corporate contractors. Consultant agrees to furnish WDC with its taxpayer identification number (TIN) prior to the effective date of this Agreement. Consultant further agrees to provide such other information to WDC as may be required by the IRS or the State Department of Revenue.

IX. GOVERNING LAW

This Agreement shall be governed by and construed in accordance with the laws of the State of Kentucky. In the event of any proceedings regarding this Agreement, the Parties agree that the venue shall be the state courts of Kentucky or the U.S. District Court for the Western District of Kentucky, Louisville Division. All parties

expressly consent to personal jurisdiction and venue in such Court for the limited and sole purpose of proceedings relating to this Agreement or any rights or obligations arising thereunder. Service of process may be accomplished by following the procedures prescribed by law.

X. AUTHORITY

The Consultant, by execution of this Agreement, does hereby warrant and represent that he is qualified to do business in the State of Kentucky, has full right, power and authority to enter into this Agreement.

X. CONFLICTS OF INTEREST

Pursuant to KRS 45A.455:

(1) It shall be a breach of ethical standards for any employee with procurement authority to participate directly in any proceeding or application; request for ruling or other determination; claim or controversy; or other particular matter pertaining to any contract, or subcontract, and any solicitation or proposal therefor, in which to his knowledge:

(a) He, or any member of his immediate family has a financial interest therein; or

(b) A business or organization in which he or any member of his immediate family has a financial interest as an officer, director, trustee, partner, or employee, is a party; or

(c) Any other person, business, or organization with whom he or any member of his immediate family is negotiating or has an arrangement concerning prospective employment is a party.

Direct or indirect participation shall include but not be limited to involvement through decision, approval, disapproval, recommendation, preparation of any part of a purchase request, influencing the content of any specification or purchase standard, rendering of advice, investigation, auditing, or in any other advisory capacity.

(2) It shall be a breach of ethical standards for any person to offer, give, or agree to give any employee or former employee, or for any employee or former employee to solicit, demand, accept, or agree to accept from another person, a gratuity or an offer of employment, in connection with any decision, approval, disapproval, recommendation, preparation of any part of a purchase request, influencing the content of any specification or purchase standard, rendering of advice, investigation, auditing, or in any other advisory capacity in any proceeding or application, request for ruling or other determination, claim or controversy, or other particular matter, pertaining to any contract or subcontract and any solicitation or proposal therefor.

(3) It is a breach of ethical standards for any payment, gratuity, or offer of employment to be made by or on behalf of a subcontractor under a contract to the prime contractor or higher tier subcontractor or any person associated therewith, as an inducement for the award of a subcontract or order.

(4) The prohibition against conflicts of interest and gratuities and kickbacks shall be conspicuously set forth in every local public agency written contract and solicitation therefor.

(5) It shall be a breach of ethical standards for any public employee or former employee knowingly to use confidential information for his actual or anticipated personal gain, or the actual or anticipated personal gain of any other person.

XI. ENTIRE AGREEMENT

This Agreement constitutes the entire agreement and understanding of the parties with respect to the subject matter set forth herein and this Agreement supersedes any and all prior and contemporaneous oral or written agreements or understandings between the parties relative thereto. No representation, promise, inducement, or statement of intention has been made by the parties that is not embodied in this Agreement. This Agreement cannot be amended, modified, or supplemented in any respect except by a subsequent written agreement duly executed by all of the parties hereto.

WITNESS the signatures of the parties to this Agreement. These signatures apply to PSC 2007-_____.

IMS	Information Management System
IOAP	Integrated Overflow Abatement Plan
ISSDP	Interim Sanitary Sewer Discharge Plan
IT	Information Technology
JCPS	Jefferson County Public Schools
KDEP	Kentucky Department of Environmental Protection
KPDES	Kentucky Pollutant Discharge Elimination System
LE	Lateral Extension
LID	Low Impact Development
LIMS	Laboratory Information Management System
LTC	Long Term Control
LTCP	Long Term Control Plan
MDS	Main Diversion Structure
MFWTP	Morris Forman Wastewater Treatment Plant
MGD	Million Gallons Per Day
MOR	Monthly Operating Report
MSD	Metropolitan Sewer District (Louisville and Jefferson County)
NDD	Non-Domestic Dischargers
NMC	Nine Minimum Controls
ORSANCO	Ohio River Valley Water Sanitation Commission

Appendix H - Acronyms for Project WIN Annual Report

PACP	Pipeline Assessment and Certification Program
PCM	Post Construction Monitoring
PI	Plant Information System
PM	Preventive Maintenance
PS	Pump Station
PSC	Property Service Connection
RDII	Rainfall-Derived Infiltration and Inflow
RS	Regulatory Services
RTC	Real Time Control
SCADA	Supervisory Control And Data Acquisition
SCAP	System Capacity Assurance Plan
SIU	Significant Industrial User
SOP	Standard Operating Procedure
SORP	Sewer Overflow Response Protocol
SSDP	Sanitary Sewer Discharge Plan
SSO	Sanitary Sewer Overflow
SSOP	Sanitary Sewer Overflow Plan
SWOR2	Southwestern Outfall Relief - Phase 2
SWPS	Southwestern Pump Station
TM	Technical Memorandum
TMDL	Total Maximum Daily Load
UIM	Utility Information Management
UK	University of Kentucky
USACE	US Army Corps of Engineers
USGS	United States Geological Survey
WDR	Wastewater Discharge Regulators
WIN	Waterway Improvements Now
WQT	Water Quality Tool
WTP	Wastewater Treatment Plant
WWT	Wet Weather Team
