

WET WEATHER
STAKEHOLDER TEAM

Meeting Summary

Meeting Summary
Wet Weather Team Stakeholder Group
April 21, 2022
Tour of Waterway Protection Tunnel

The Wet Weather Team (WWT) Stakeholders, chartered by the Louisville and Jefferson County Metropolitan Sewer District (MSD), met on April 21, 2022 for a tour of the nearly completed Waterway Protection Tunnel (WPT). The objective of the meeting was to:

- Tour the WPT to learn more about MSD's single largest capital project and key component of MSD's overflow mitigation strategy

Welcome and Tour

Clay Kelly of Strand Associates, Inc.[®] opened the meeting by welcoming everyone and introducing Jacob Mathis, MSD's Project Manager for the WPT. Jacob provided a summary of the WPT purpose, capabilities, and components. He then went over the safety precautions and rules before leading the WWT below ground for an in-person tour of the tunnel.

Observer Comments, Wrap-Up, and Adjournment

Numerous questions were asked by the attendees about the specifics of the WPT and how it would help improve water quality. Several long-serving WWT members shared their pride on seeing the last major project of the program they advised become a reality.
